

## Midlands Organ Donation Services Team

### Donor outcomes

Between 1 April 2016 and 31 March 2017, your Team had 157 deceased solid organ donors, resulting in 425 patients receiving a transplant. Further details are provided in the table and chart below. If you would like further information, please contact your local Specialist Nurse - Organ Donation (SN-OD).

|                 | Number of donors | Number of patients transplanted | Average number of organs donated per donor |           |
|-----------------|------------------|---------------------------------|--|-----------|
|                 |                  |                                 | Midlands                                   | UK        |
| Deceased donors | 157 (157)        | 425 (423)                       | 3.4 (3.4)                                  | 3.4 (3.4) |

### Number of donors and patients transplanted each year

### Radar charts of key rates, 1 April 2016 to 31 March 2017

The blue shaded area represents your Team's rates for 2016/17. The latest UK rates and your Team's rates for the equivalent period in the previous year are superimposed for comparison. The fuller the blue shaded area the better. The colour of the rate label on each of the radar charts indicates your Team's performance as shown in the appropriate funnel plot (included in the detailed report) using the gold, silver, bronze, amber, and red (GoSBAR) scheme. Additionally, the funnel plots in the detailed report can be used to identify the maximum rates currently being achieved by Teams with similar donor potential.

## Key numbers and rates

There are nine measures on the Potential Donor Audit (PDA) which are most likely to affect the conversion of potential donors into actual donors. A comparison against funnel plot boundaries has been applied by highlighting the key rates for your Team as gold, silver, bronze, amber, or red. Funnel plots can be found in the detailed report. Between 1 April 2016 and 31 March 2017, your Team met a statistically acceptable level in 4 of these measures. Of the 205 potential DBD donors with suspected neurological death, 83 proceeded to donation and 122 did not proceed. Of the 572 eligible DCD donors, 72 proceeded to donation and 500 did not proceed. Further details are provided below. Caution should be applied when interpreting percentages based on small numbers.

|  | Target | DBD                             |       |                                 |       | DCD             |       |                 |       |       |

<sup>1</sup> DBD - A patient with suspected neurological death  
DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

<sup>2</sup> DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation  
DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation

## Further Information

- A detailed report for your Team accompanies this Executive Summary, which also contains definitions of terms, abbreviations, table and figure descriptions, targets and tolerances, and details of the main changes made to the PDA on 1 April 2013.
