Radar charts of key rates, 1 April 2016 to 31 March 2017

The blue shaded area represents your Health Board's rates for 2016/17. The latest UK rates and your Health Board's rates for the equivalent period in the previous year are superimposed for comparison. The fuller the blue shaded area the better. The colour of the rate label on each of the radar charts indicates the Health Board performance as shown in the appropriate funnel plot (included in the detailed report) using the gold, silver, bronze, amber, and red (GoSBAR) scheme. Additionally, the funnel plots in the detailed report can be used to identify the maximum rates currently being achieved by Health Boards with similar donor potential.

Key numbers and rates

There are nine measures on the Potential Donor Audit (PDA) which are most likely to affect the conversion of potential donors into actual donors. A comparison against funnel plot boundaries has been applied by highlighting the key rates for your Health Board as gold, silver, bronze, amber, or red. Funnel plots can be found in the detailed report. Between 1 April 2016 and 31 March 2017, your Health Board met a statistically acceptable level in 8 of these measures. Of the 6 potential DBD donors with suspected neurological death, 4 proceeded to donation and 2 did not proceed. None of the 19 eligible DCD donors proceeded to donation. Further details are provided below. Caution should be applied when interpreting percentages based on small numbers.
