

Norfolk and Norwich University Hospitals NHS Foundation Trust

Taking Organ Transplantation to 2020

In 2017/18, from 31 consented donors the Trust facilitated 22 actual solid organ donors resulting in 48 patients receiving a life-saving or life-changing transplant.

In addition to the 22 proceeding donors there were 9 additional consented donors that did not proceed.

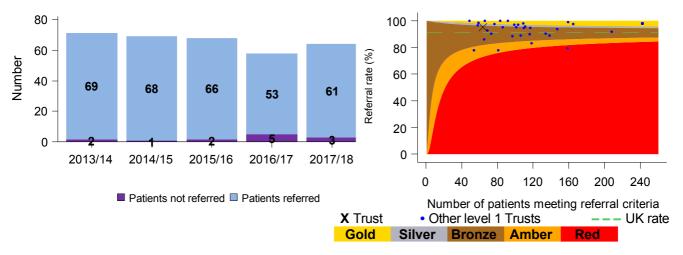

Best quality of care in organ donation

Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

The Trust referred 61 potential organ donors during 2017/18. There were 3 occasions where potential organ donors were not referred.

When compared with UK performance, the Trust was average (bronze) for referral of potential organ donors to NHS Blood and Transplant.

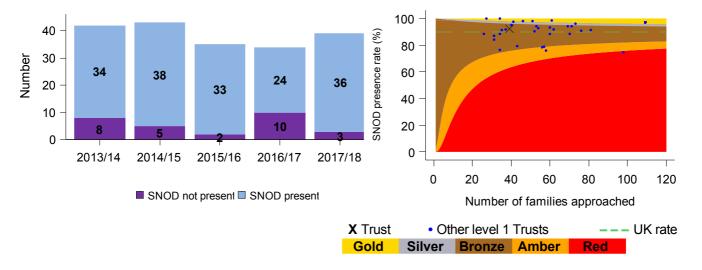

Presence of Specialist Nurse for Organ Donation

Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

A SNOD was present for 36 organ donation discussions with families during 2017/18. There were 3 occasions where a SNOD was not present.

When compared with UK performance, the Trust was average (bronze) for SNOD presence when approaching families to discuss organ donation.

Why it matters

- If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.
- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

Regional donors, transplants, waiting list, and NHS Organ Donor Register (ODR) data								
	East Of England*	uĸ						
1 April 2017 - 31 March 2018								
Deceased donors	162	1,574						
Transplants from deceased donors	374	4,012						
Deaths on the transplant list	36	426						
As at 31 March 2018								
Active transplant list	457	6,045						
Number of NHS ODR opt-in registrations (% registered)**	2,399,780 (39%)	24,941,804 (38%)						
*Regions have been defined as per former Strategic Health Authorities ** % registered based on population of 6.08 million, based on ONS 2								

Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison.
