

East and North Hertfordshire NHS Trust

Taking Organ Transplantation to 2020

In 2017/18, from 19 consented donors the Trust facilitated 9 actual solid organ donors resulting in 27 patients receiving a life-saving or life-changing transplant.

In addition to the 9 proceeding donors there were 10 additional consented donors that did not proceed.

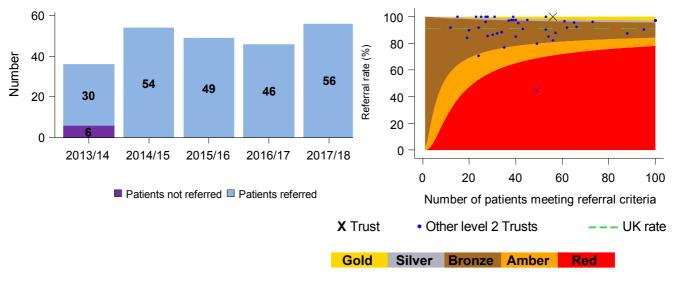

Best quality of care in organ donation

Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

The Trust referred 56 potential organ donors during 2017/18. There were no occasions where potential organ donors were not referred.

When compared with UK performance, the Trust was exceptional (gold) for referral of potential organ donors to NHS Blood and Transplant.

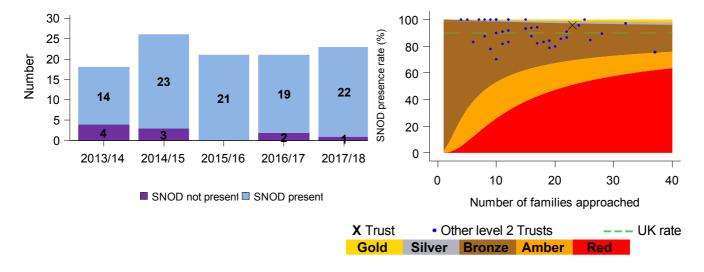

Presence of Specialist Nurse for Organ Donation

Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

A SNOD was present for 22 organ donation discussions with families during 2017/18. There was 1 occasion where a SNOD was not present.

When compared with UK performance, the Trust was average (bronze) for SNOD presence when approaching families to discuss organ donation.

Why it matters

- If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.
- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	East Of England*	UK		
April 2017 - 31 March 2018				
Deceased donors	162	1,574		
Fransplants from deceased donors	374	4,012		
Deaths on the transplant list	36	426		
As at 31 March 2018				
Active transplant list	457	6,045		
Number of NHS ODR opt-in registrations (% registered)**	2,399,780 (39%)	24,941,804 (38%)		

Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison.
