

# **South Warwickshire NHS Foundation Trust**

### Taking Organ Transplantation to 2020

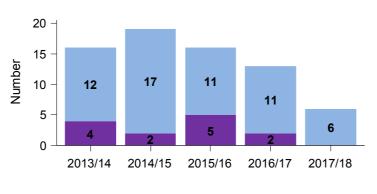

South Warwickshire NHS Foundation Trust had one consented donor during this time period and this patient did proceed to be an actual solid organ donor resulting in 4 patients receiving a life-saving or life-changing transplant.

### Best quality of care in organ donation

## Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

### Aim: There should be no purple on the chart

Patients not referred Patients referred

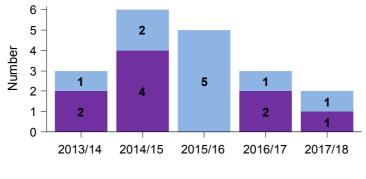

The Trust referred 6 potential organ donors during 2017/18. There were no occasions where potential organ donors were not referred.

# Presence of Specialist Nurse for Organ Donation

# Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

### Aim: There should be no purple on the chart

SNOD not present SNOD present

A SNOD was present for 1 organ donation discussion with a family during 2017/18. There was 1 occasion where a SNOD was not present.

### Why it matters

• If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.

• The consent rate in the UK is much higher when a SNOD is present.

• The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

Regional donors, transplants, waiting list, and NHS Organ Donor Register (ODR) data						
West Midland		UK				
1 April 2017 - 31 March 2018						
Deceased donors	125	1,574				
Transplants from deceased donors	380	4,012				
Deaths on the transplant list	36	426				
As at 31 March 2018						
Active transplant list	538	6,045				
Number of NHS ODR opt-in registrations (% registered)**	1,806,995 (31%)	24,941,804 (38%)				
*Regions have been defined as per former Strategic Health Authoritie ** % registered based on population of 5.75 million, based on ONS 2						

### Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison.

#### Key numbers comparison with UK data, 1 April 2017 - 31 March 2018

	DE	DBD		DCD		Deceased donors	
	Trust	UK	Trust	UK	Trust	UK	
Patients meeting organ donation referral criteria <sup>1</sup>	1	1954	5	6281	6	7978	
Referred to Organ Donation Service	1	1929	5	5615	6	7302	
Referral rate %		99%		89%		92%	
Neurological death tested	1	1676					
Testing rate %		86%					
Eligible donors <sup>2</sup>	1	1582	2	4456	3	6038	
Family approached	1	1471	1	1858	2	3329	
Family approached and SNOD present	1	1394	0	1591	1	2985	
% of approaches where SNOD present		95%		86%		90%	
Consent ascertained	1	1066	1	1115	2	2181	
Consent rate %		72%		60%		66%	
Actual donors (PDA data)	1	955	0	613	1	1568	
% of consented donors that became actual donors		90%		55%		72%	

DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

<sup>2</sup> DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation

Note that a patient that meets both the referral criteria for DBD and DCD organ donation is featured in both the DBD and DCD data but will only be counted once in the deceased donors total
