

## **NHS Fife**

### Taking Organ Transplantation to 2020

In 2017/18, from 7 authorised donors the Board facilitated 2 actual solid organ donors resulting in 6 patients receiving a life-saving or life-changing transplant.

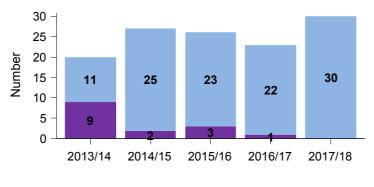

In addition to the 2 proceeding donors there were 5 additional authorised donors that did not proceed.

### Best quality of care in organ donation

### Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

### Aim: There should be no purple on the chart

Patients not referred Patients referred

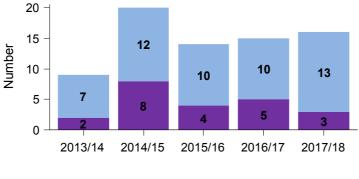

The Board referred 30 potential organ donors during 2017/18. There were no occasions where potential organ donors were not referred.

### Presence of Specialist Nurse for Organ Donation

# Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

### Aim: There should be no purple on the chart

SNOD not present SNOD present

A SNOD was present for 13 organ donation discussions with families during 2017/18. There were 3 occasions where a SNOD was not present.

### Why it matters

• If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.

• The authorisation rate in the UK is much higher when a SNOD is present.

• The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	Scotland*	UK	
1 April 2017 - 31 March 2018			
Deceased donors	102	1,574	
Transplants from deceased donors	375	4,012	
Deaths on the transplant list	38	426	
As at 31 March 2018			
Active transplant list	534	6,045	
Number of NHS ODR opt-in registrations (% registered)**	2,486,216 (46%)	24,941,804 (38%)	

### Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Board are shown below, including a UK comparison.

#### Key numbers comparison with UK data, 1 April 2017 - 31 March 2018

	DBD		DCD		Deceased donors	
	Board	UK	Board	UK	Board	UK
Patients meeting organ donation referral criteria <sup>1</sup>	7	1954	26	6281	30	7978
Referred to Organ Donation Service	7	1929	26	5615	30	7302
Referral rate %		99%		89%		92%
Neurological death tested	4	1676				
Testing rate %		86%				
Eligible donors <sup>2</sup>	4	1582	23	4456	27	6038
Family approached	3	1471	13	1858	16	3329
Family approached and SNOD present	2	1394	11	1591	13	2985
% of approaches where SNOD present		95%		86%		90%
Authorisation ascertained	1	1066	4	1115	5	2181
Authorisation rate %		72%		60%		66%
Actual donors (PDA data)	1	955	1	613	2	1568
% of authorised donors that became actual donors		90%		55%		72%

<sup>1</sup> DBD - A patient with suspected neurological death

DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

<sup>2</sup> DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation

Note that a patient that meets both the referral criteria for DBD and DCD organ donation is featured in both the DBD and DCD data but will only be counted once in the deceased donors total
