

# **University Hospital Southampton NHS Foundation Trust**

## Taking Organ Transplantation to 2020

In 2017/18, from 55 consented donors the Trust facilitated 36 actual solid organ donors resulting in 89 patients receiving a life-saving or life-changing transplant.

In addition to the 36 proceeding donors there were 19 additional consented donors that did not proceed.

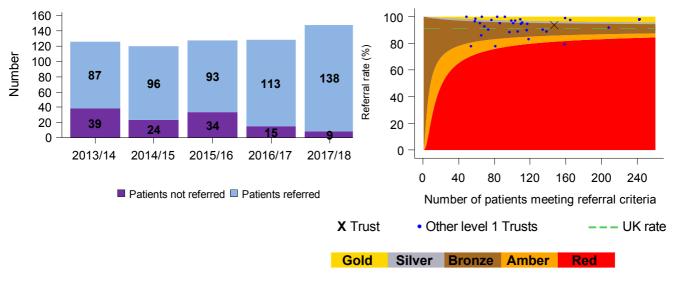

## Best quality of care in organ donation

#### Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

The Trust referred 138 potential organ donors during 2017/18. There were 9 occasions where potential organ donors were not referred.

When compared with UK performance, the Trust was average (bronze) for referral of potential organ donors to NHS Blood and Transplant.

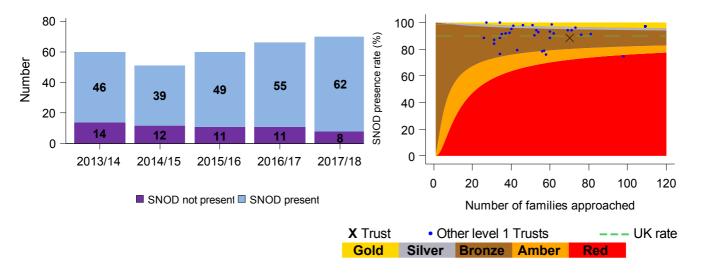

### **Presence of Specialist Nurse for Organ Donation**

Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

A SNOD was present for 62 organ donation discussions with families during 2017/18. There were 8 occasions where a SNOD was not present.

When compared with UK performance, the Trust was average (bronze) for SNOD presence when approaching families to discuss organ donation.

#### Why it matters

- If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.
- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	South Central*	UK	
1 April 2017 - 31 March 2018			
Deceased donors	100	1,574	
Transplants from deceased donors	283	4,012	
Deaths on the transplant list	31	426	
As at 31 March 2018			
Active transplant list	366	6,045	
Number of NHS ODR opt-in registrations (% registered)**	1,804,859 (42%)	24,941,804 (38%)	

## **Further information**

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison.
