

# **Dartford and Gravesham NHS Trust**

### Taking Organ Transplantation to 2020

In 2017/18, from 4 consented donors the Trust facilitated 2 actual solid organ donors resulting in 3 patients receiving a life-saving or life-changing transplant.

In addition to the 2 proceeding donors there were 2 additional consented donors that did not proceed.

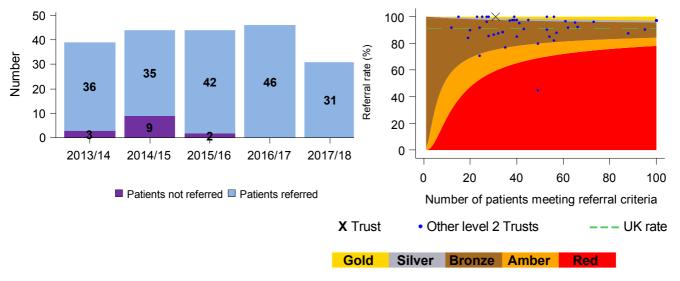

## Best quality of care in organ donation

#### Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

The Trust referred 31 potential organ donors during 2017/18. There were no occasions where potential organ donors were not referred.

When compared with UK performance, the Trust was exceptional (gold) for referral of potential organ donors to NHS Blood and Transplant.

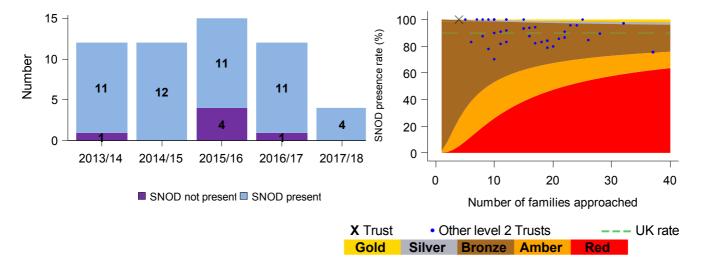

### **Presence of Specialist Nurse for Organ Donation**

Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

A SNOD was present for 4 organ donation discussions with families during 2017/18. There were no occasions where a SNOD was not present.

When compared with UK performance, the Trust was exceptional (gold) for SNOD presence when approaching families to discuss organ donation.

## Why it matters

- If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.
- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	South East Coast*	UK	
1 April 2017 - 31 March 2018			
Deceased donors	86	1,574	
Transplants from deceased donors	224	4,012	
Deaths on the transplant list	14	426	
As at 31 March 2018			
Active transplant list	334	6,045	
Number of NHS ODR opt-in registrations (% registered)**	1,993,087 (43%)	24,941,804 (38%)	

## **Further information**

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison.

	DBD			DCD			Deceased donors
