

A thick, solid blue wavy line that spans across the top half of the slide, starting from the left edge and ending at the right edge, with a slight dip in the center.

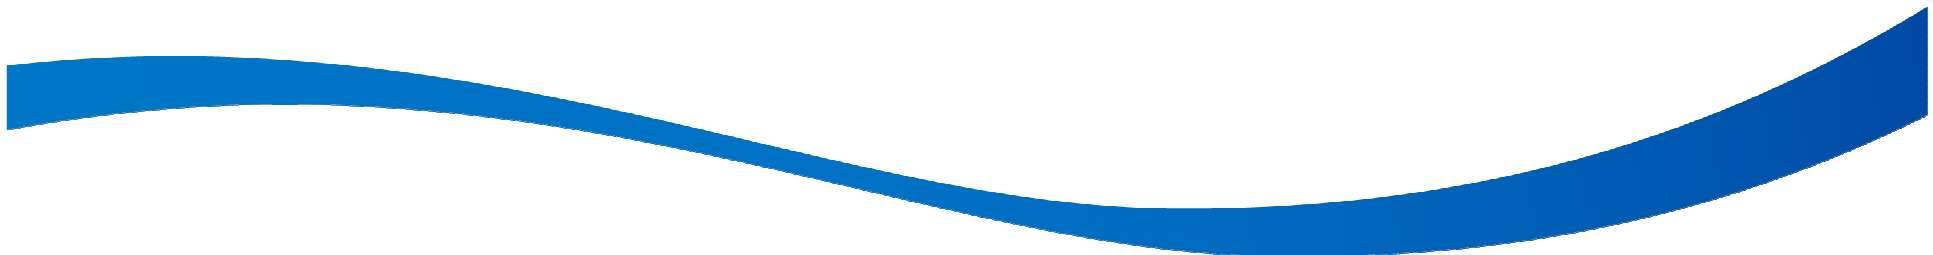

How we induct our apheresis nurses

Christine Hood Education Lead Nurse

28/04/2017

Aims of induction:
Provide comprehensive
training for new nurses
Develop expert knowledge
and skill

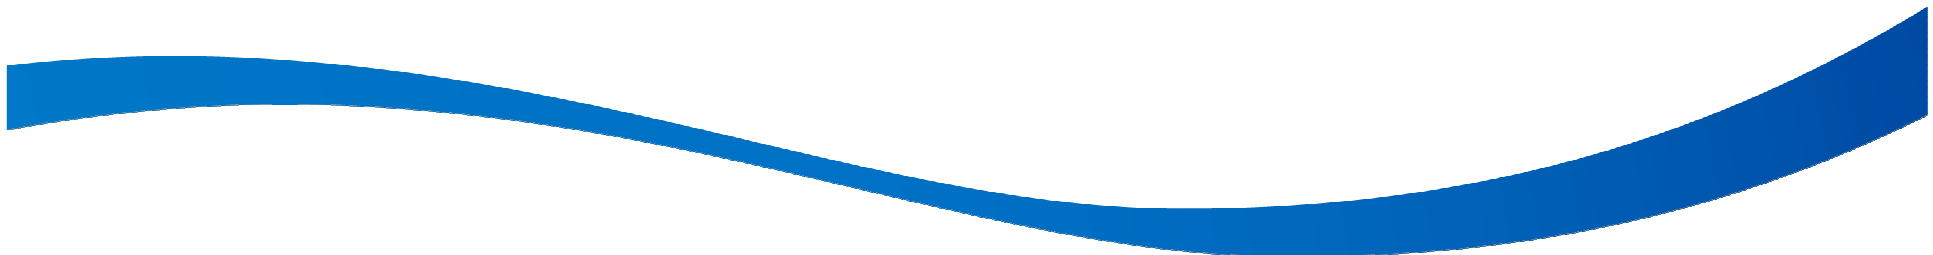

The aim is to develop knowledgeable practitioners not just technicians

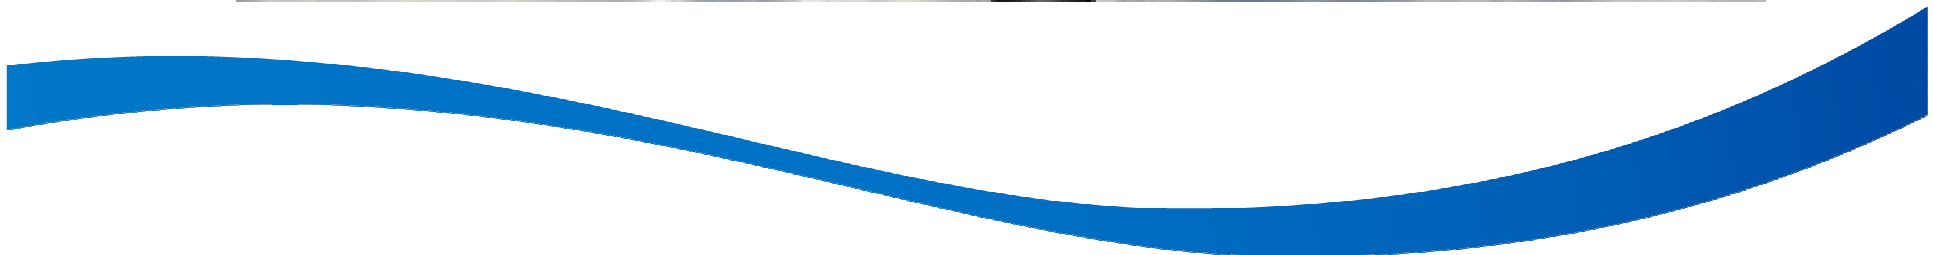

How?

- 3 month programme
- Blend of theory and practice
- Modules on all aspects of therapeutic apheresis

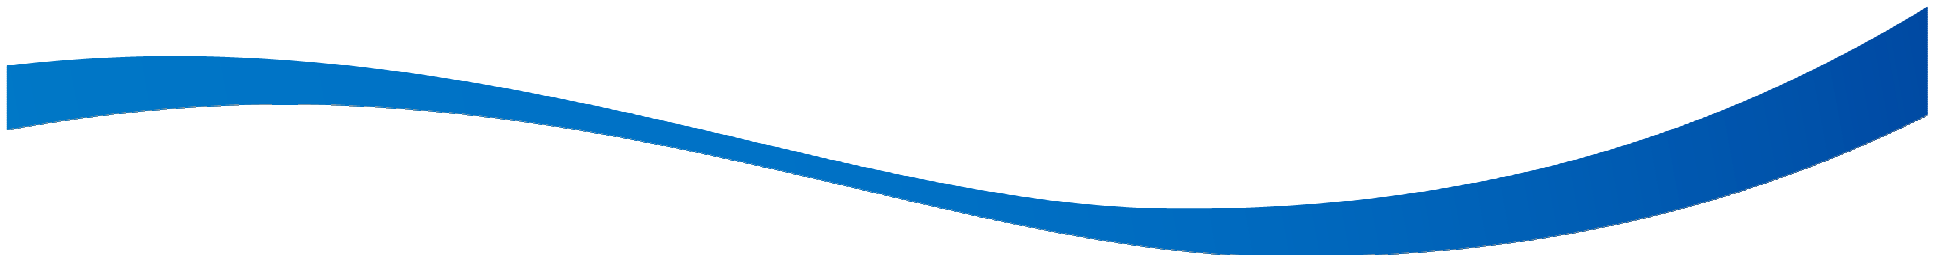

- Learning exercises and quizzes
- Taught sessions
- Practice diaries
- Assessments of practice
- Final sign off

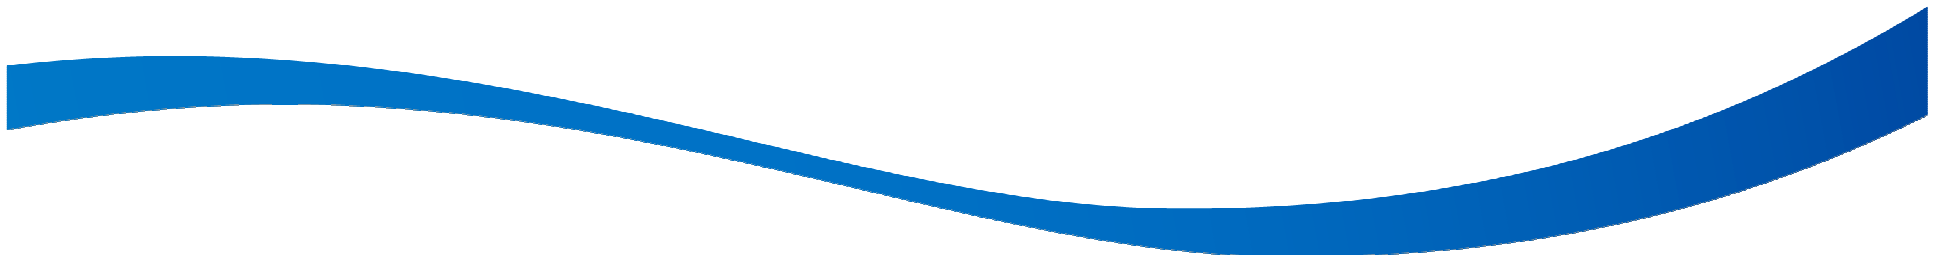

- Induction pack is version controlled
- Reviewed annually
- All nurses have access to library resources and have study time allocated

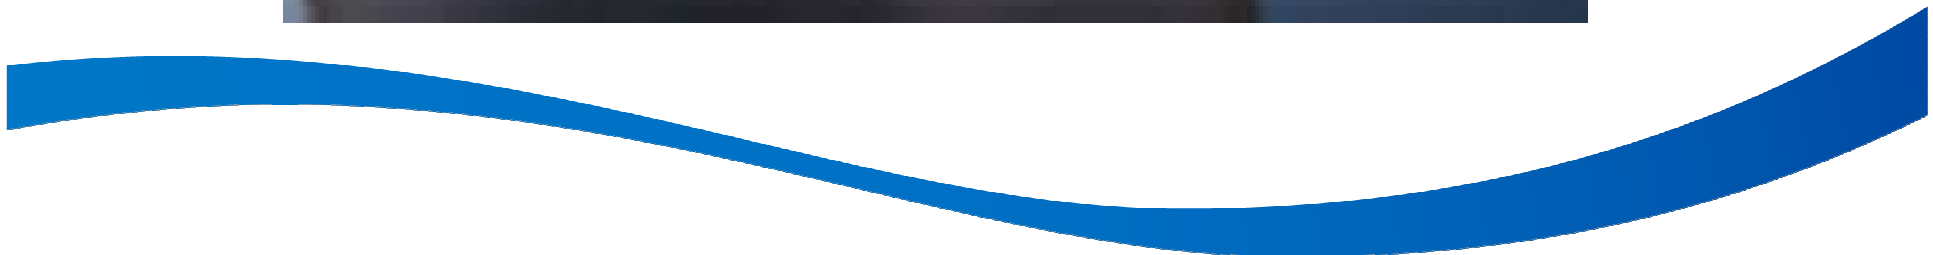

Practical training on units with
supervision and support from
experienced apheresis nurse
colleagues

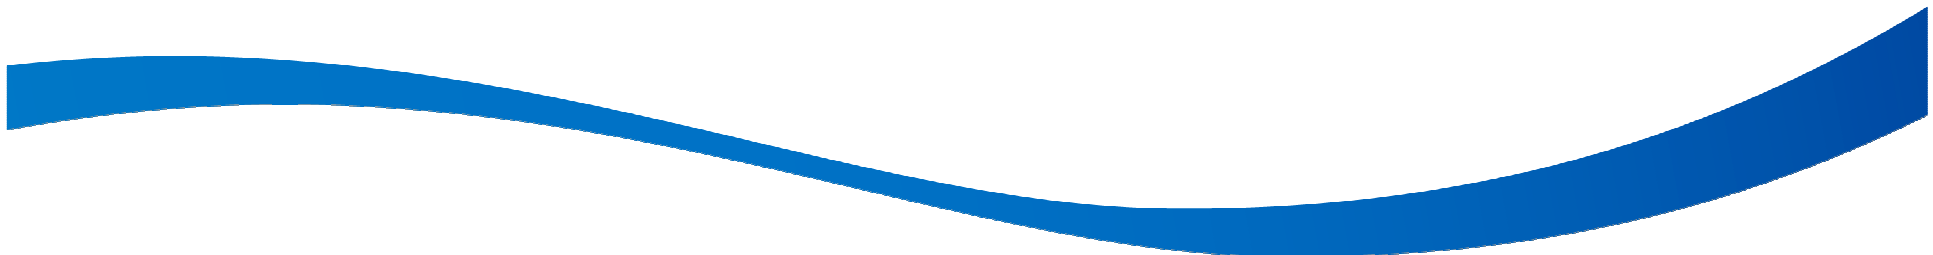

The end result

Blood and Transplant

Wider benefits

- Standardised training and education
- Evidence for our regulatory bodies
- High standards of clinical care

Blood and Transplant

Thank you
Any questions?
