ESA therapy? Y/N		
If Y, what was dose and brand?		
Date of admission		Xx/yy/zzzz
Date of surgery		Xx/yy/zzzz
Was there return to theatre? Y/N		
If Y, what was reason?		
If Y, what was the date?		
Critical care admission Y/N		
Date of critical care admission		Xx/yy/zzzz
Date of critical care discharge		Xx/yy/zzzz
Did patient die during surgical admission Y/N		

If Yes: Date of Death		Xx/yy/zzzz
If No: Date of Discharge		Xx/yy/zzzz
Readmission within 30 days? Y/N		
Date of readmission		Xx/yy/zzzz
Were antifibrinolytics used? Y/N		
If Y, TXA or aprotinin?		
Was cell salvage commenced? Y/N		
If Y, how much was returned?		
Hb result closest to listing		g/l
Hb result on day of or day before surgery		g/l
Nadir Hb (lowest post-op Hb)		g/l
Hb result at discharge		g/l
Did the patient receive a red cell transfusion pre-operatively (within 14 days of surgery)? Y/N		
If Y, date of transfusion		Xx/yy/zzzz
If Y, number of units transfused		
Did the patient receive a red cell transfusion during surgery (including in recovery)?		
If Y, number of units transfused		
Did the patient receive red cell transfusion post-operatively (up to 7 days post-op)?		
If Y, number of units transfused		
Deep wound infection? Y/N		
CVA (30 days) Y/N		
GI bleed (30 day) Y/N		
MI (30 day) Y/N		
DVT (60 day) Y/N		
PE (60 day) Y/N		
Pneumonia (30 day) Y/N		
New renal impairment (30 day) Y/N
