# Review of LDKT data: UK vs local

Matthew Robb

# Kidney Transplant List by Renal Unit

# Transplant list by Renal Unit

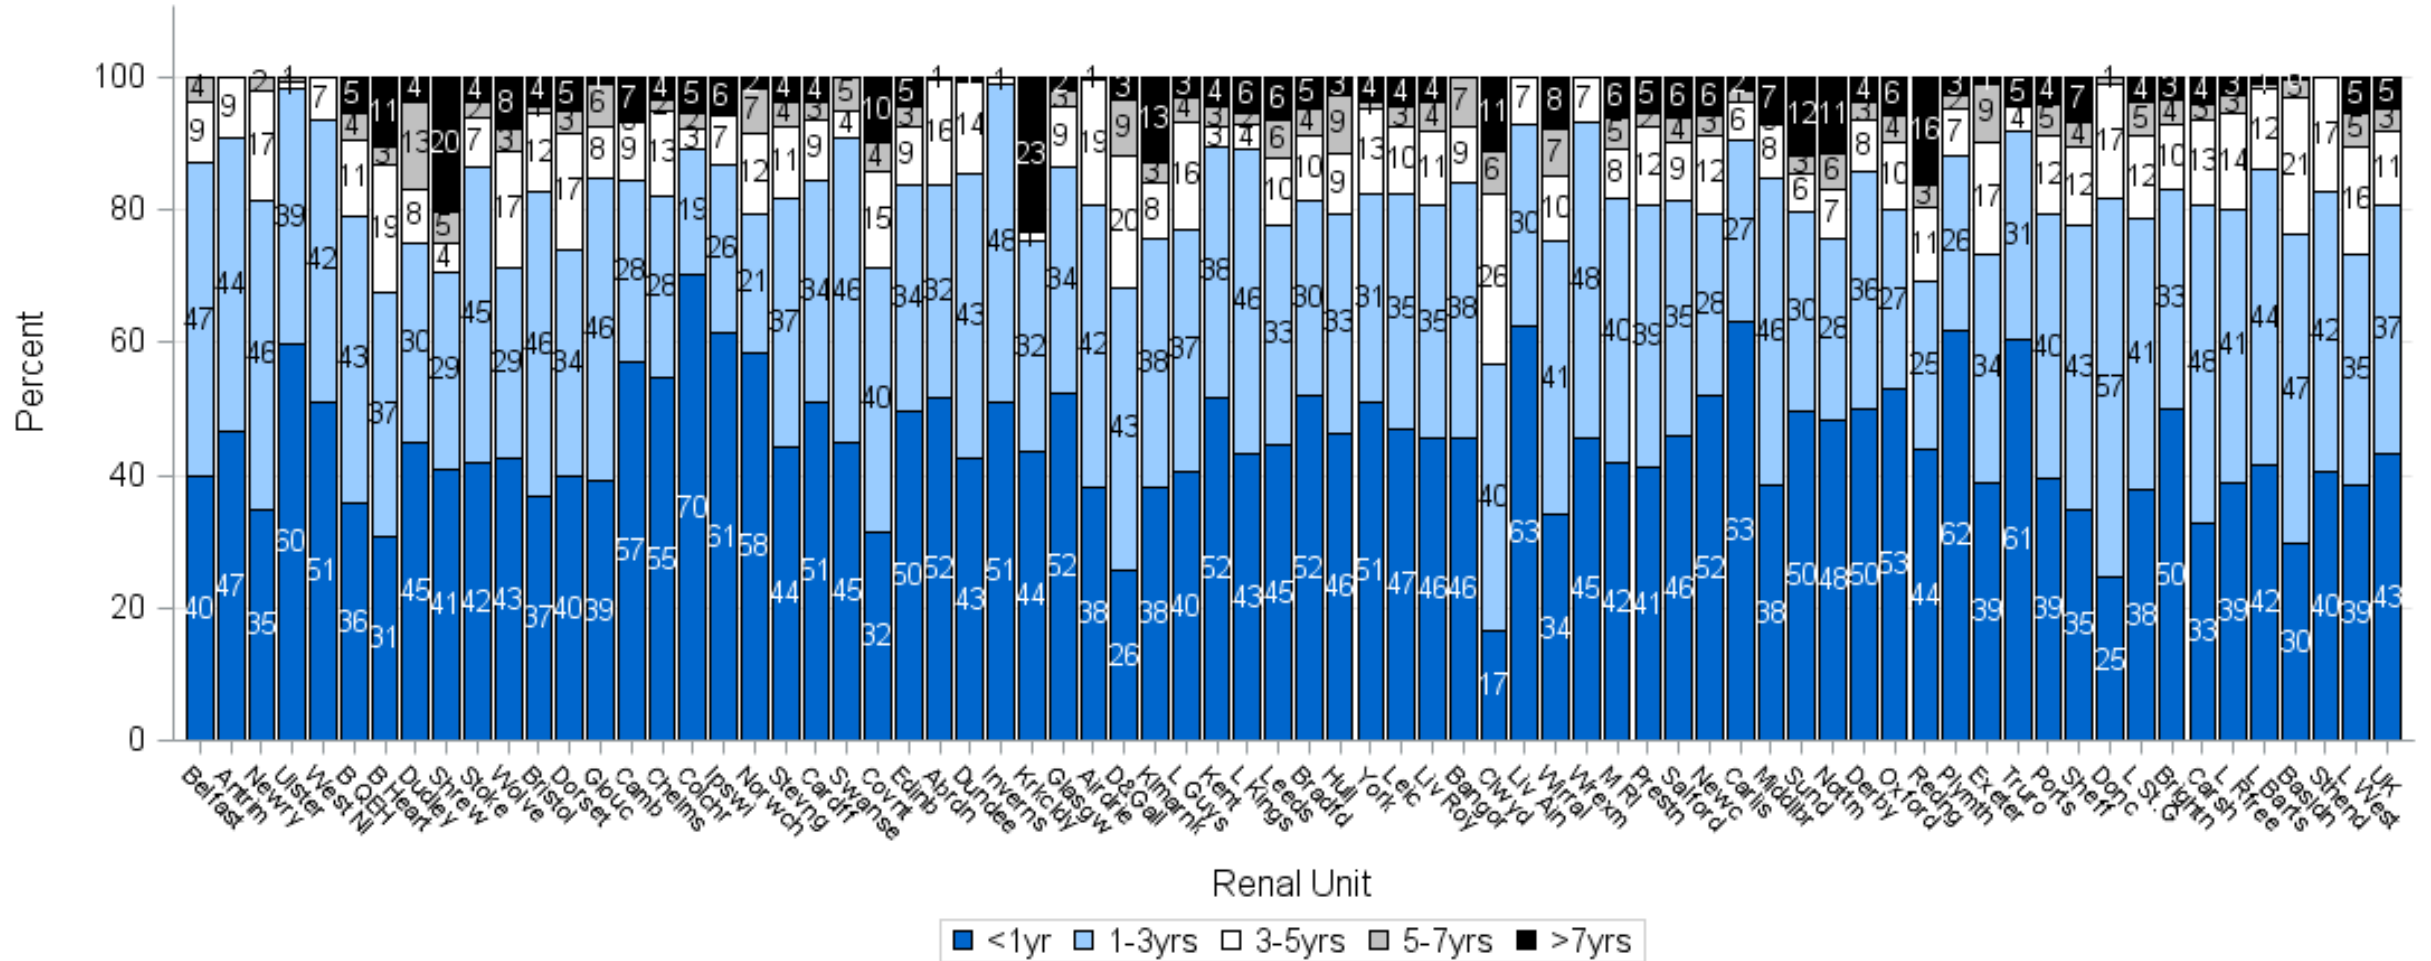

Ranging from 23 to 162 patients pmp

April 2016 – March 2017

# Transplant list by Renal Unit

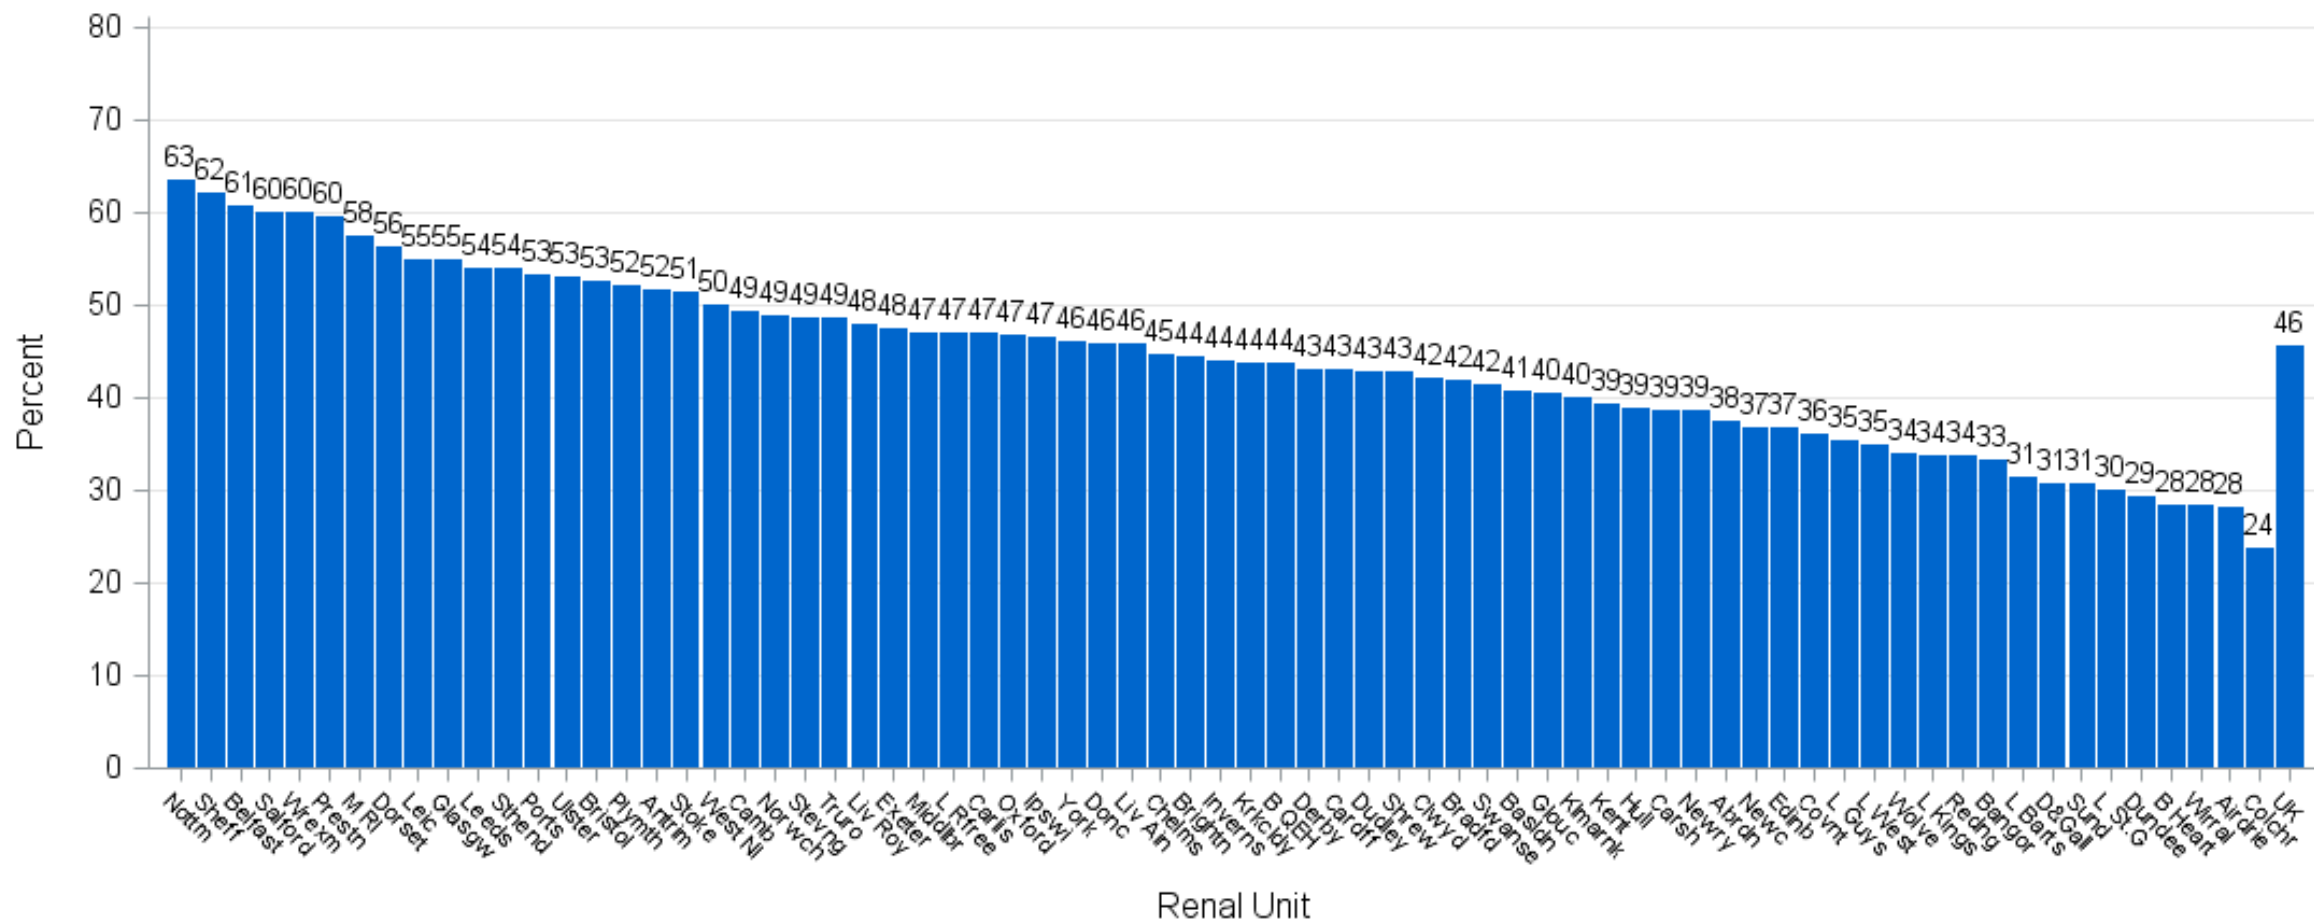

## – waiting time

Patients registered April 2011 – March 2014

# Pre-emptive listing rates by Renal Unit

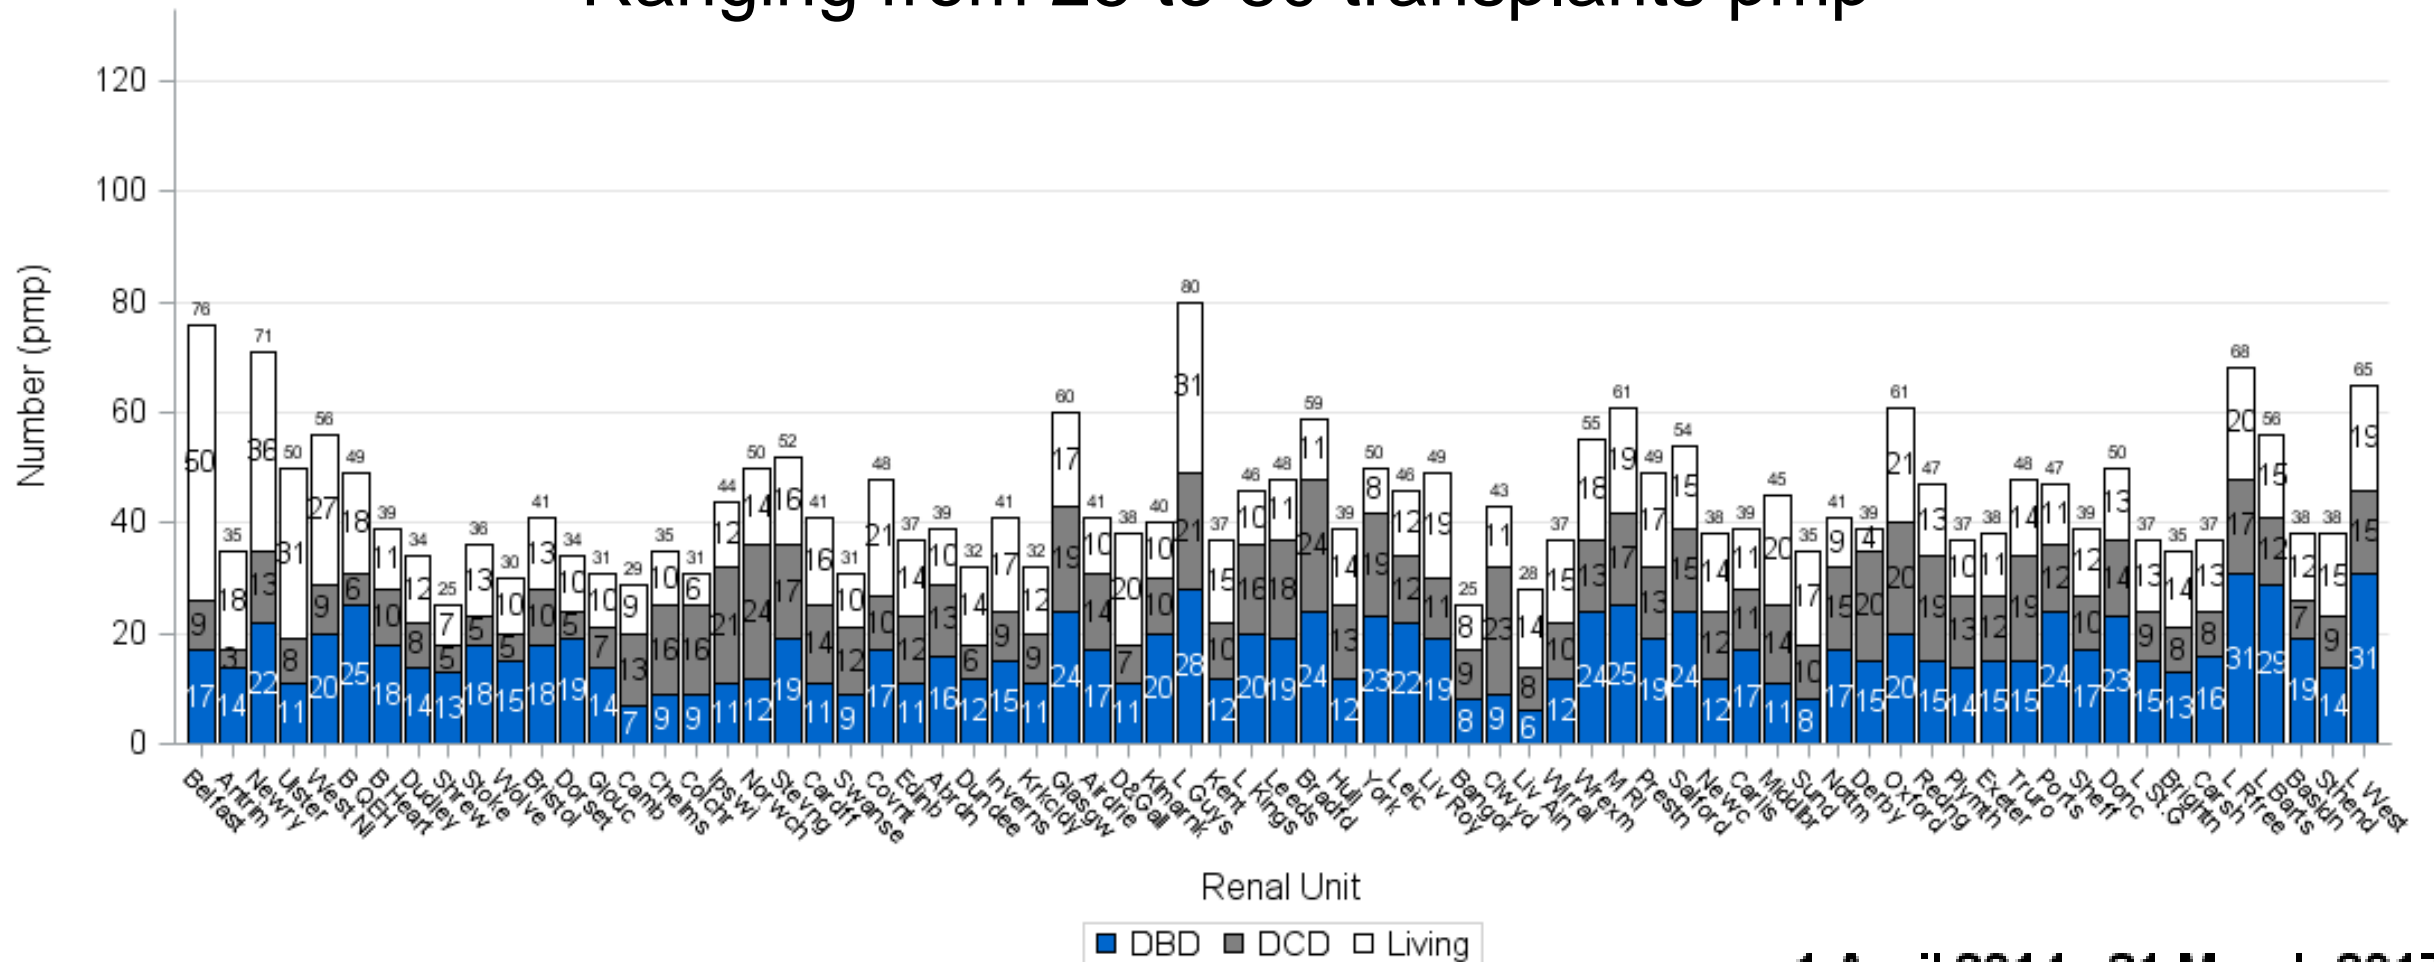

Ranging from 24% to 63% of listed patients

Patients registered April 2013 – March 2016

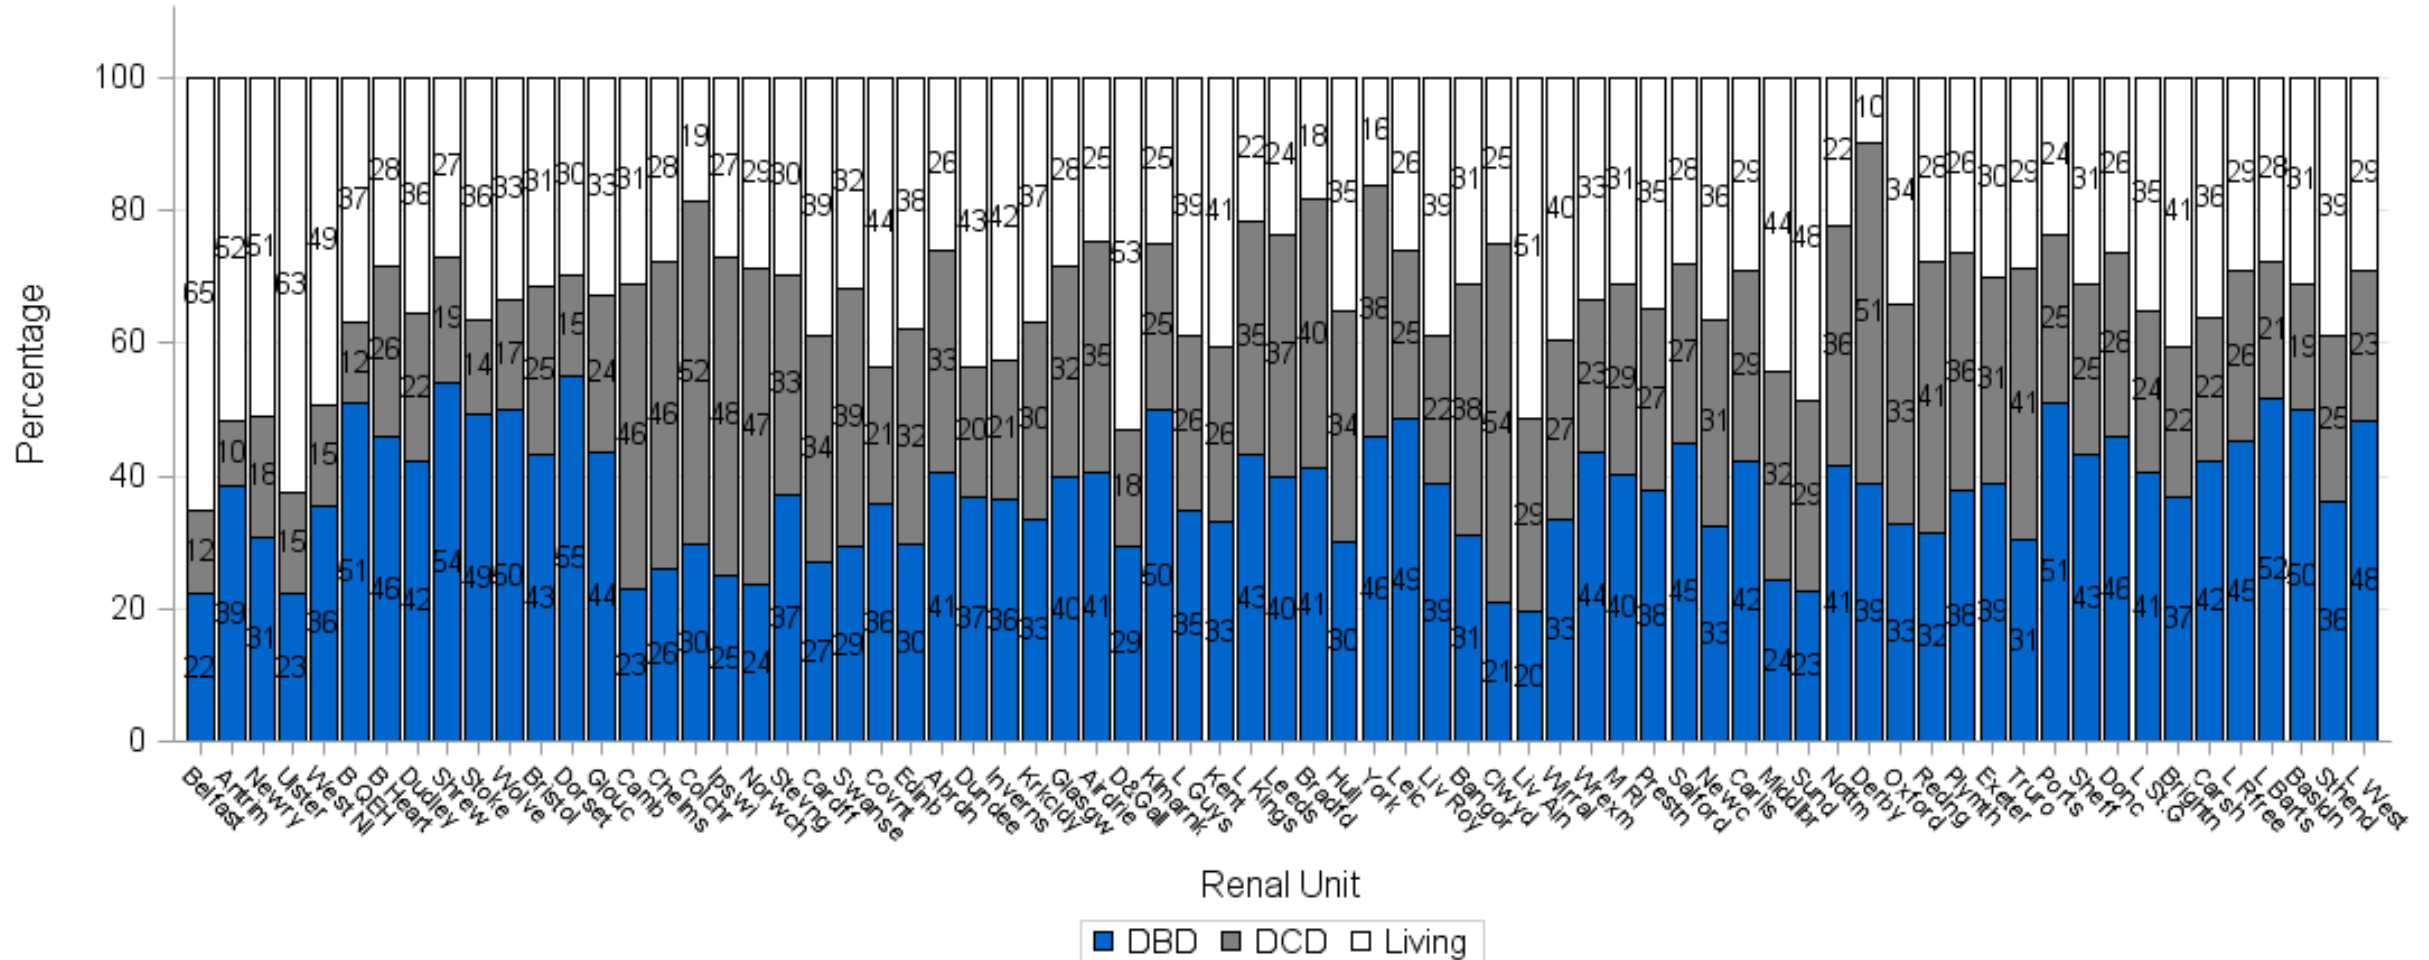

# Kidney only transplants (pmp)

Ranging from 25 to 80 transplants pmp

1 April 2014 - 31 March 2017

# Kidney only transplants (pmp)

1 April 2014 - 31 March 2017

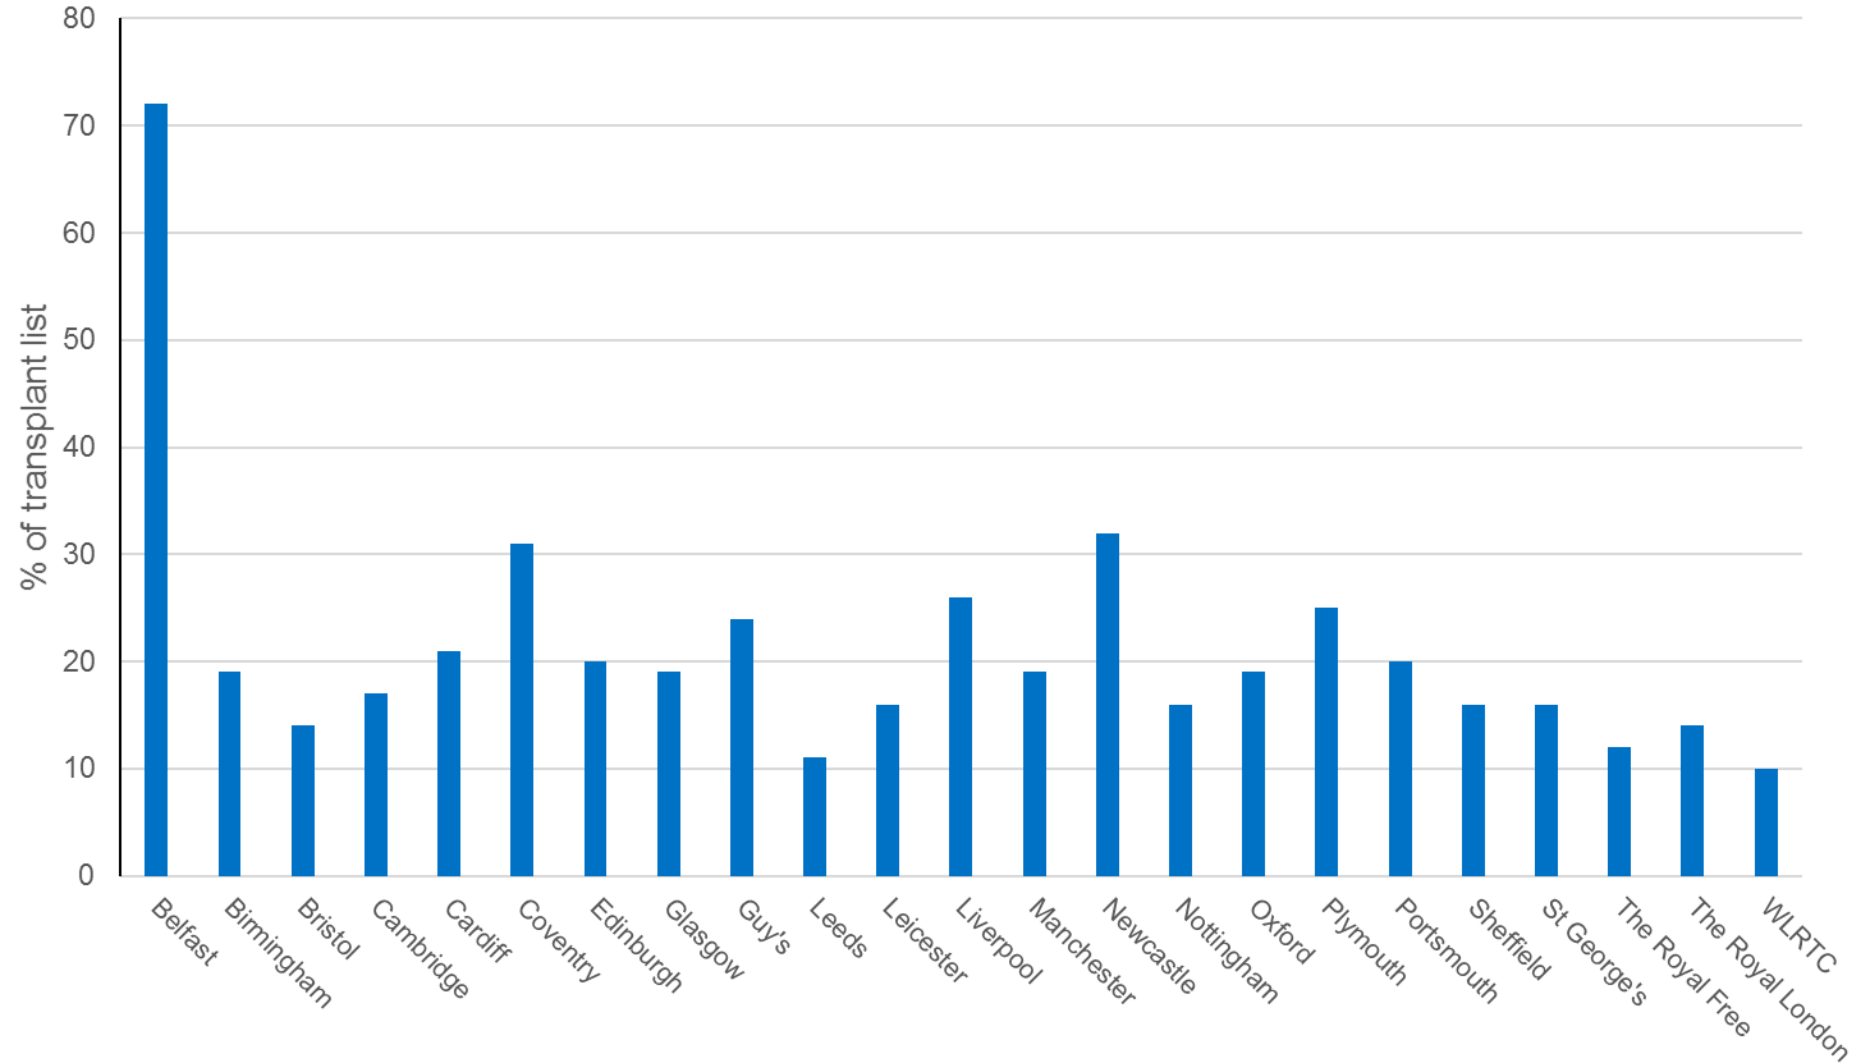

# Renal Unit Summary

- Variation exists in both the size of the waiting list in renal units across the UK, and the patient outcomes
- This variation also exists within centres in the same areas
- How does this translate to the utilisation of living donor programmes across centres?

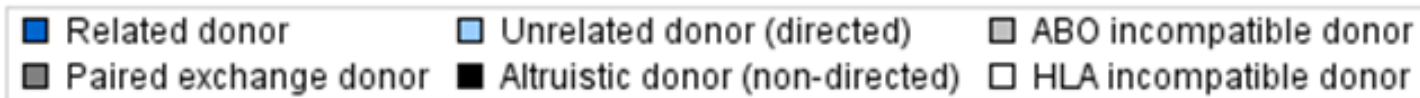

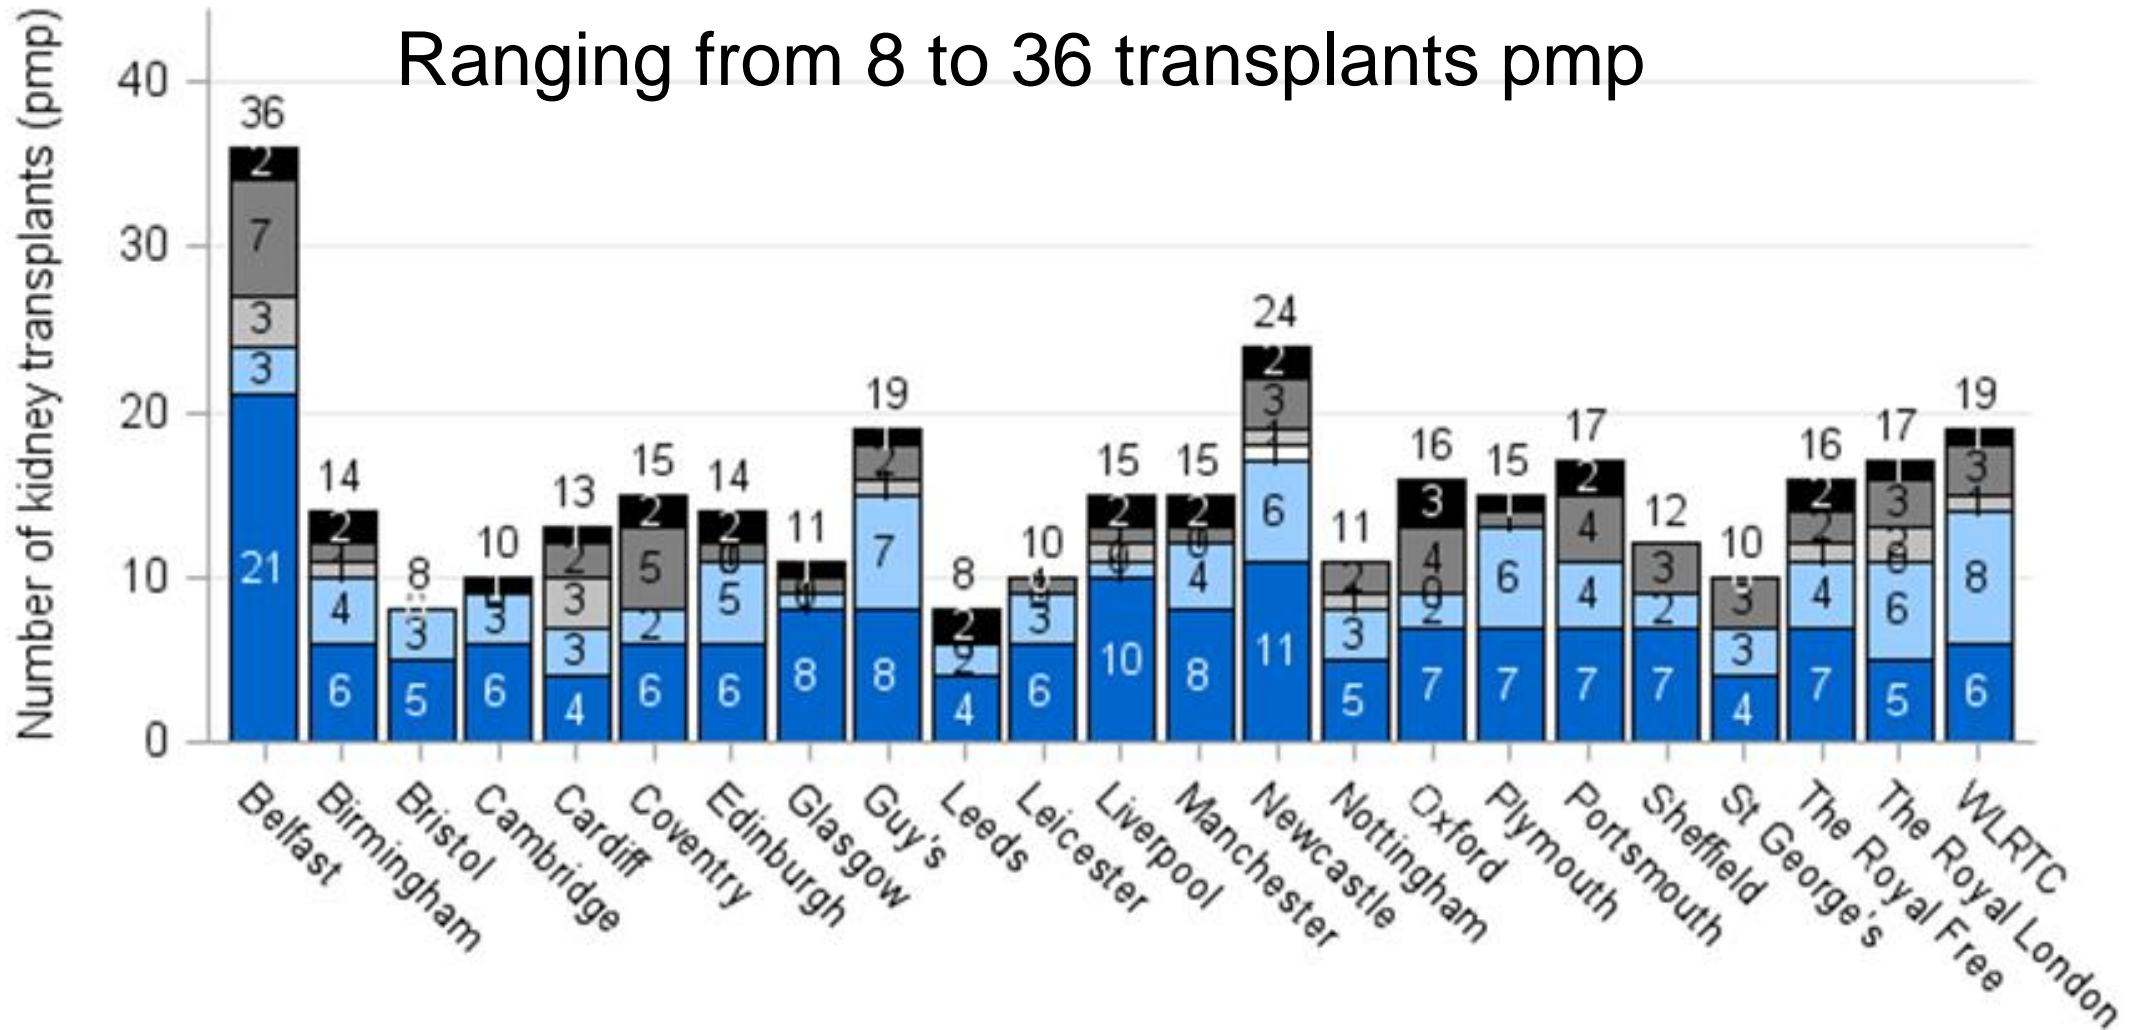

# LDKT by Transplant Centre

# LDKT as a percentage of active transplant list

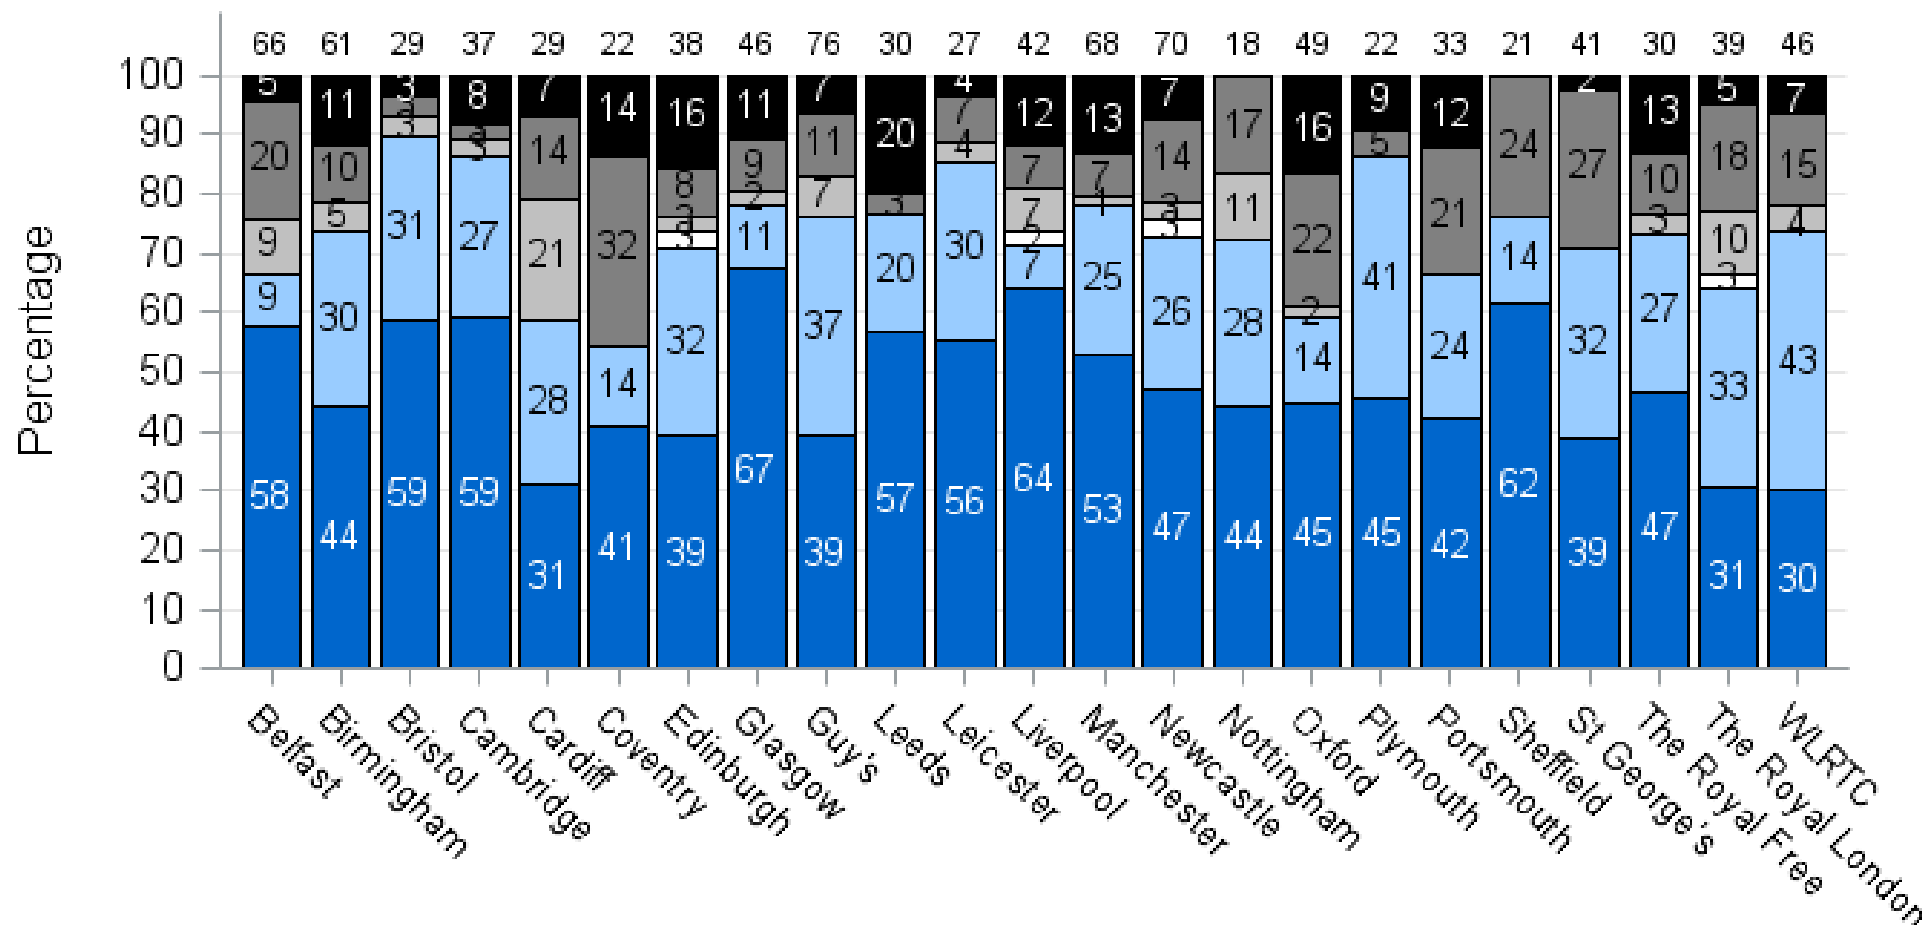

# Living donor kidney transplants by type

Ranging from 8 to 36 transplants pmp

1 April 2017 - 31 March 2018

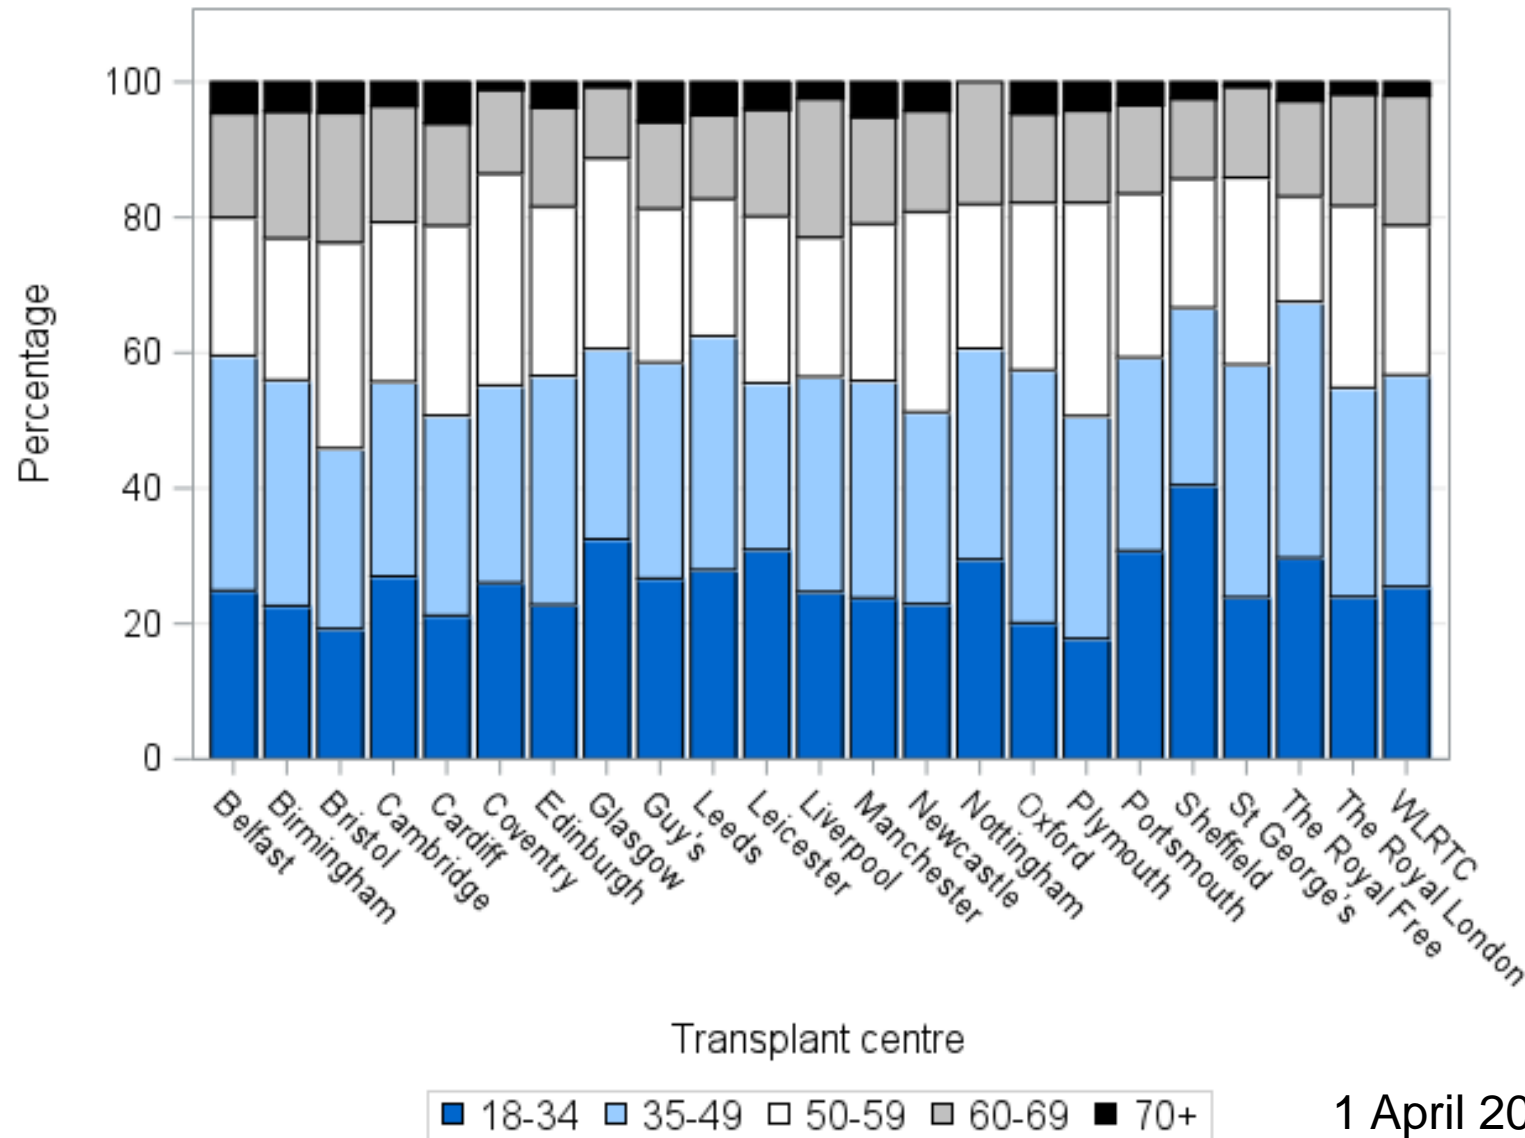

# Living donor kidney transplants by type

■ Related donor     
 ■ Unrelated donor (directed)     
 ■ ABO incompatible donor  
■ Paired exchange donor     
 ■ Altruistic donor (non-directed)     
 ■ HLA incompatible donor

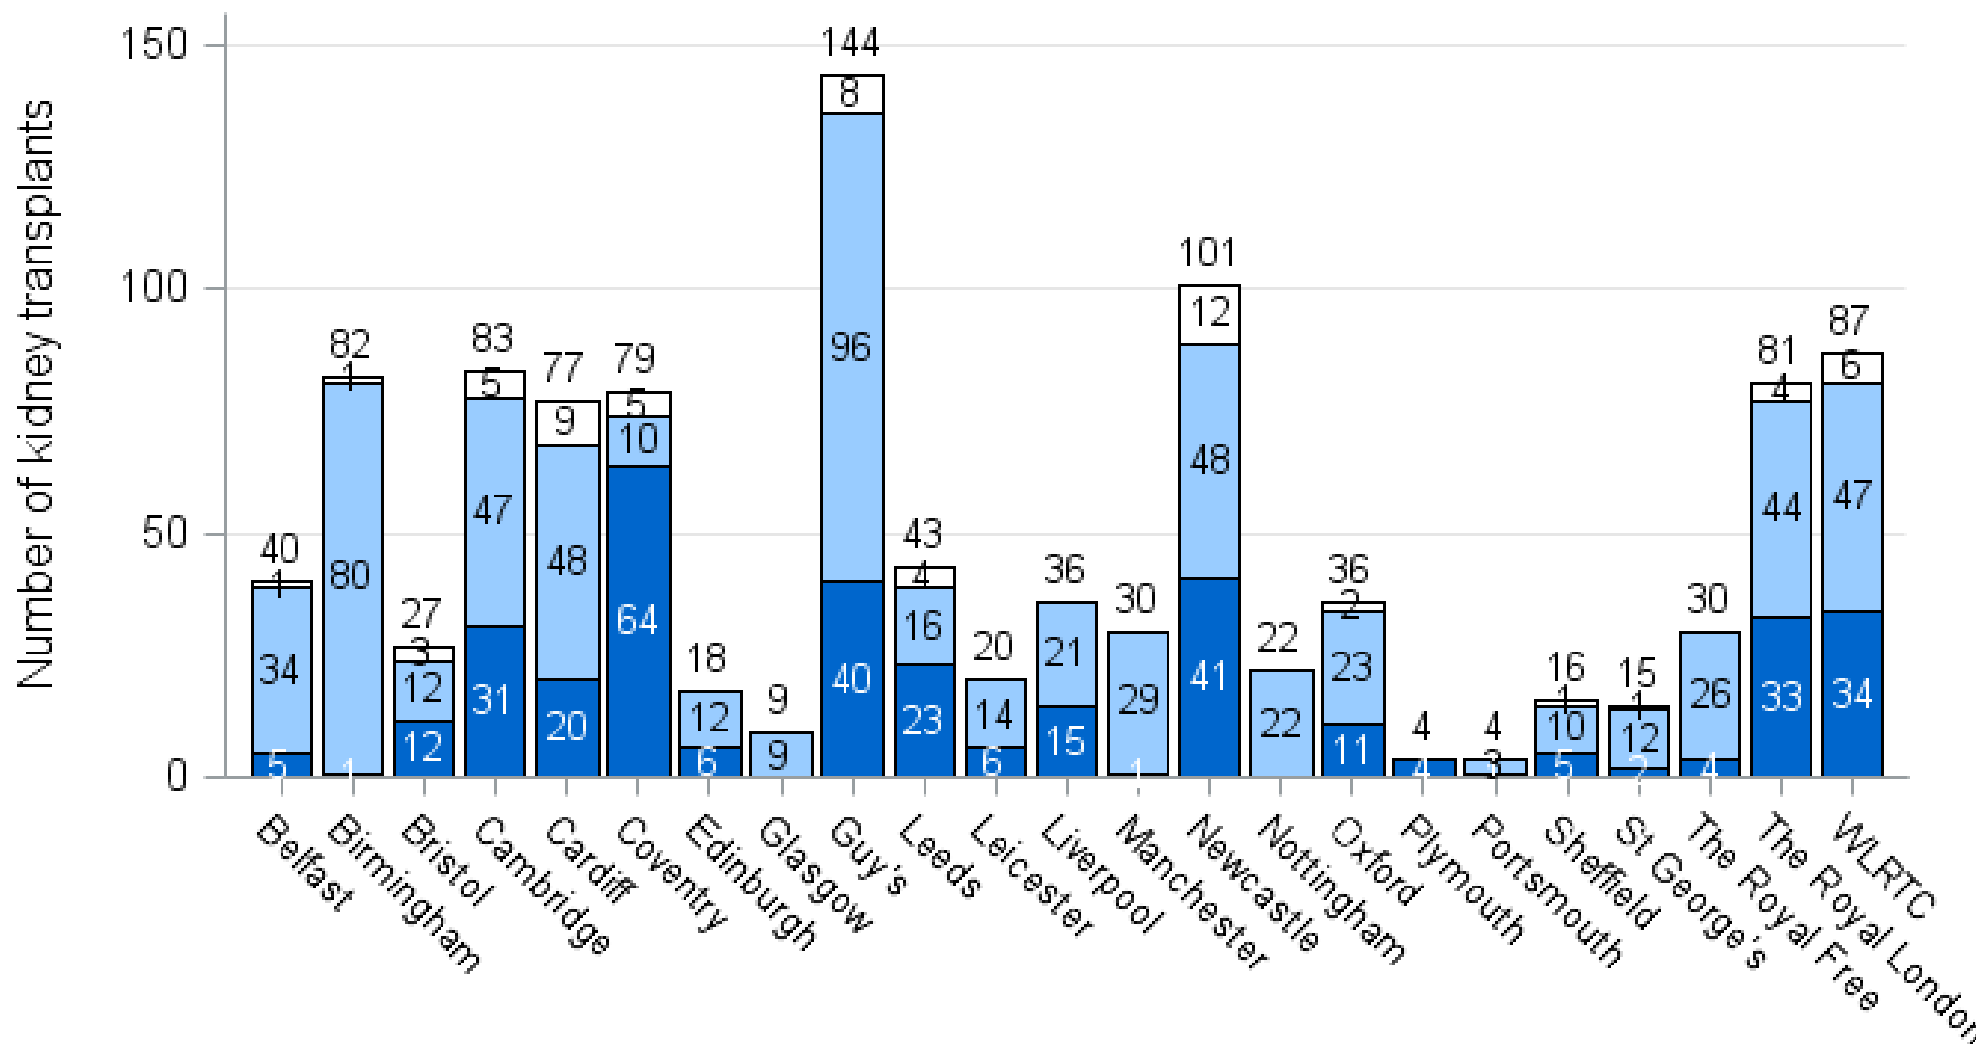

1 April 2017 - 31 March 2018

# Direct living donor transplants by age

1 April 2013 – 31 March 2018

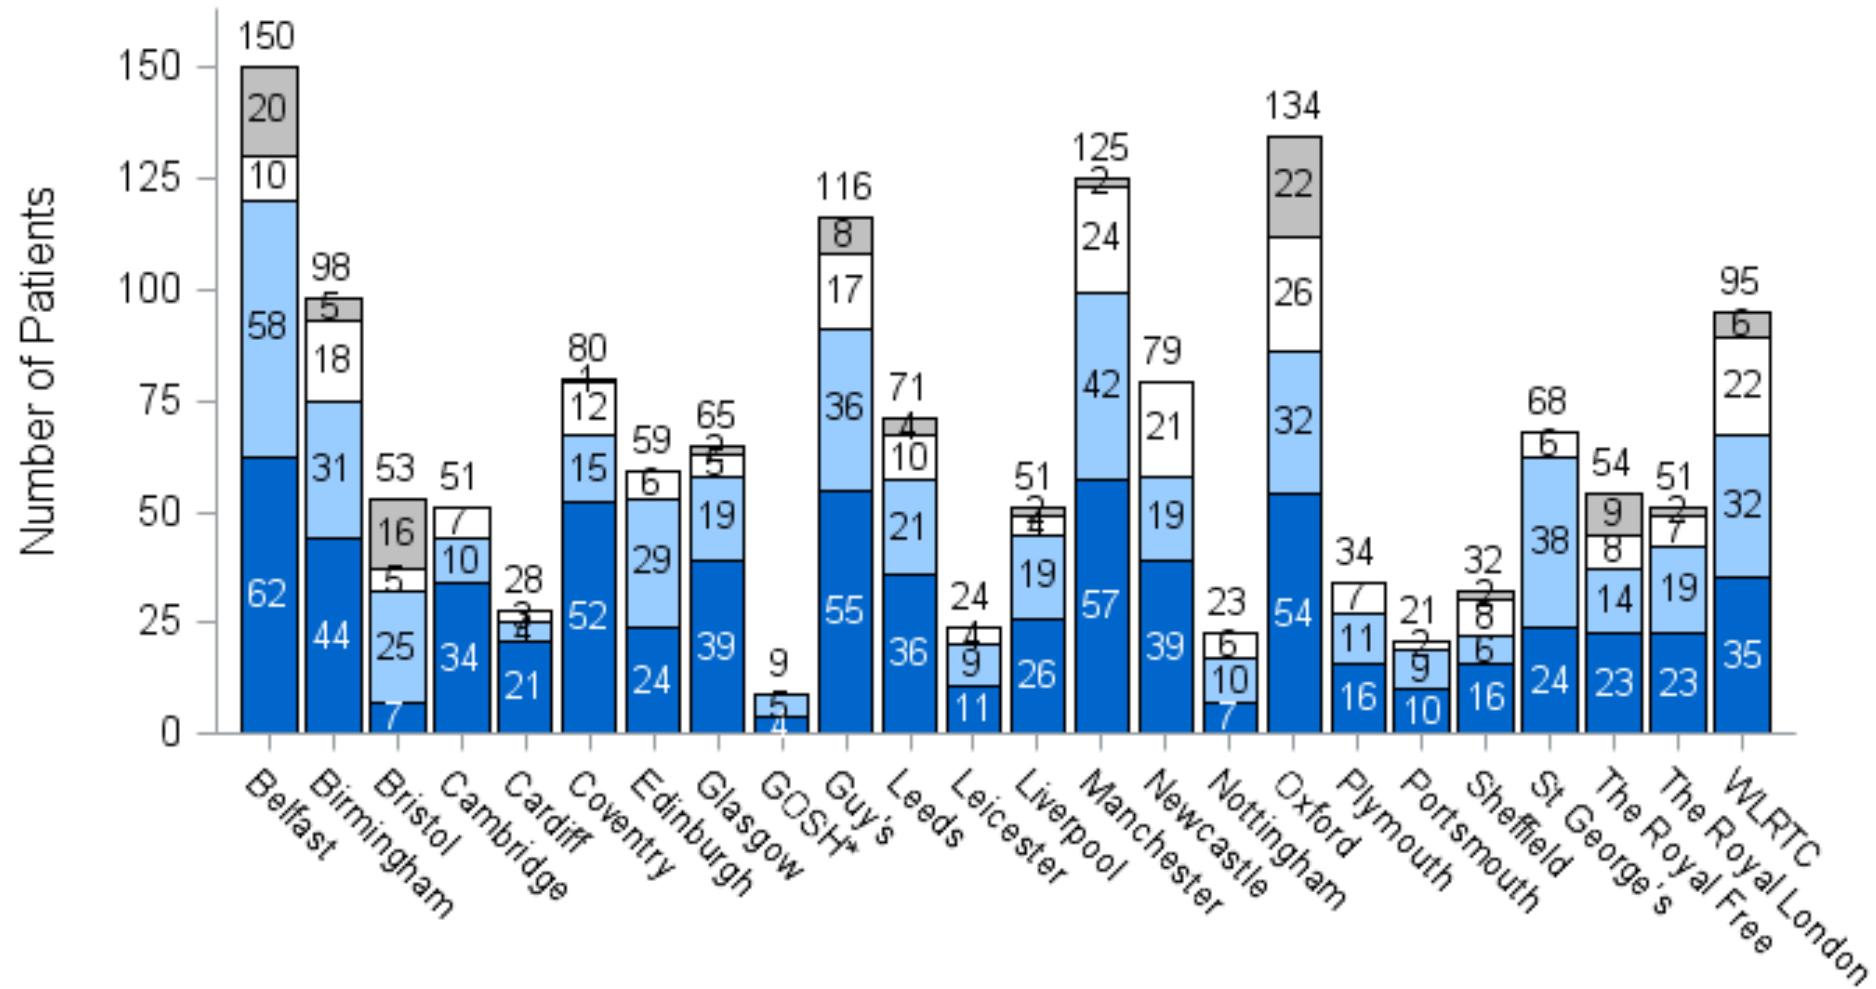

# Antibody incompatible transplants by centre

■ HLAi ■ ABOi □ HLAi and ABOi

1 April 2008 - 31 March 2018

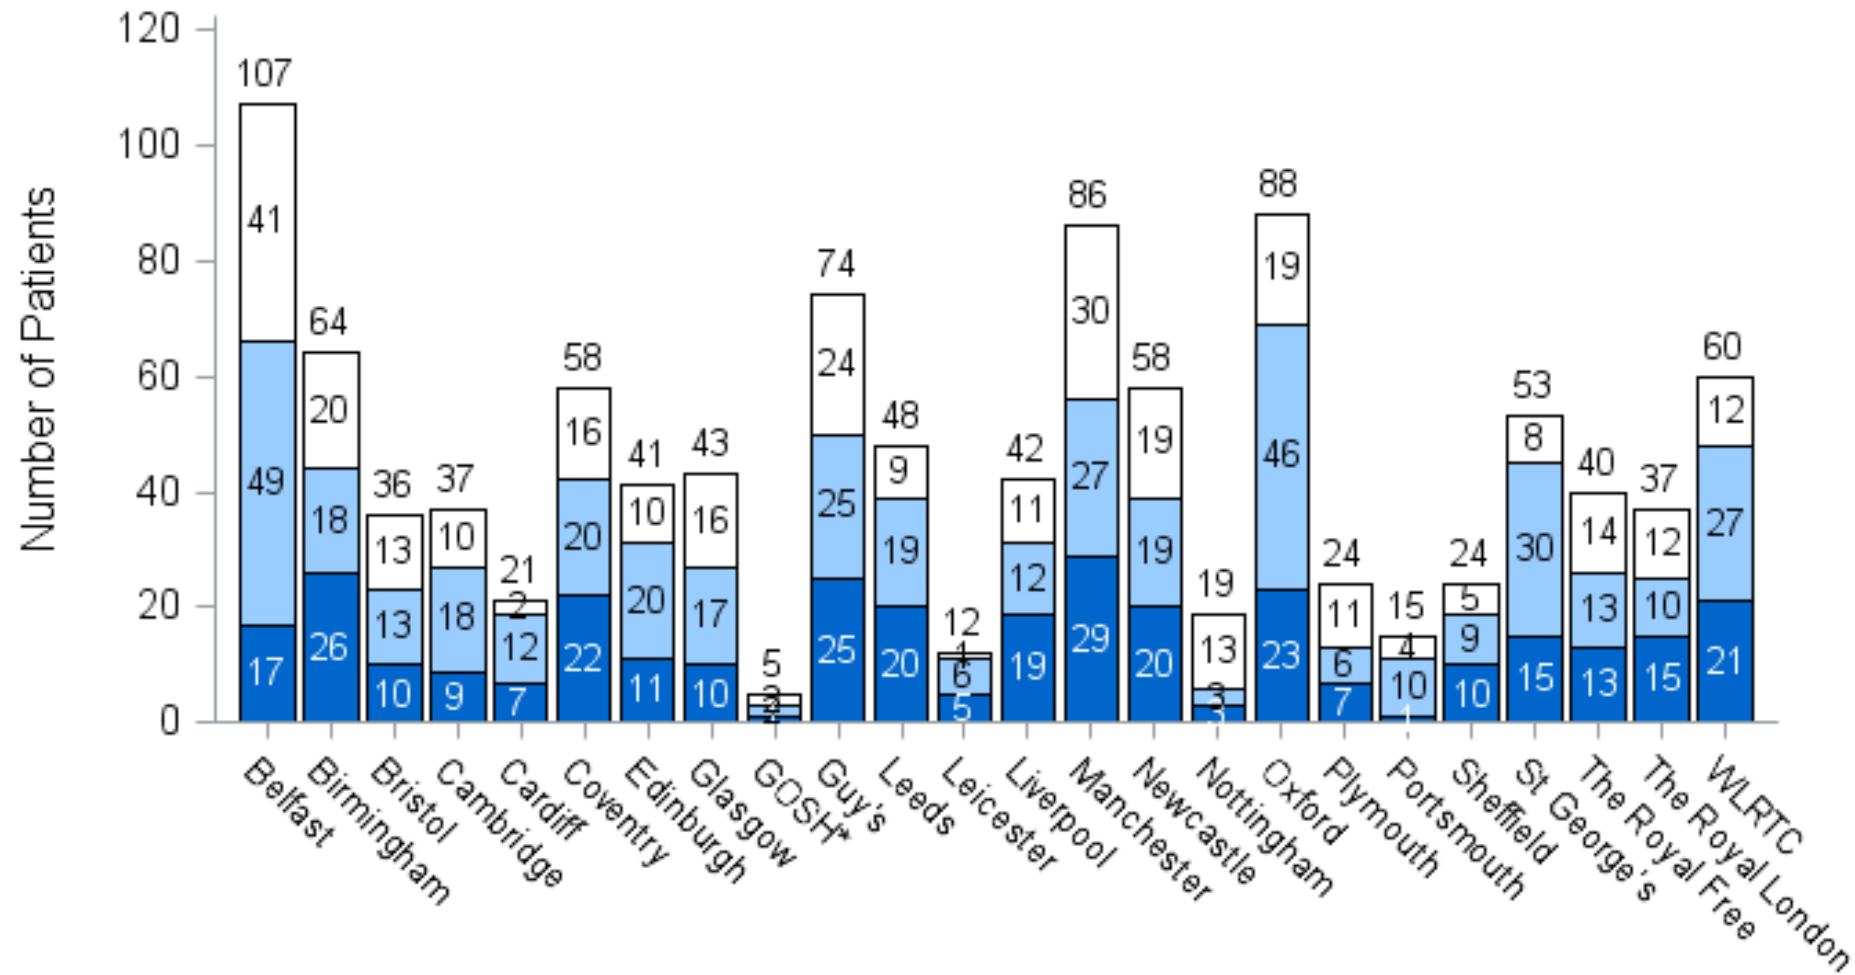

# UKLKSS Pairs registered by centre

■ HLAi ■ ABOi □ HLAi and ABOi ■ Compatible

1 April 2012 - 31 March 2018

# UKLKSS Outcomes by centre

■ Active/Delisted 
 ■ Transplant through Scheme 
  Transplant outside Scheme

1 April 2014 - 31 March 2018

# LDKT Transplant Centre Summary

- The number of LDKT ranges from 10% to 72% of the active transplant list
- There may be more opportunities for living donor transplants, for example in older patients
- There is variation in the utilisation of the UKLKSS and utilisation of compatible pairs
