

Golden Jubilee National Hospital

Taking Organ Transplantation to 2020

In 2018/19, from 5 authorised donors the Board facilitated 3 actual solid organ donors resulting in 7 patients receiving a life-saving or life-changing transplant. Data obtained from the UK Transplant Registry.

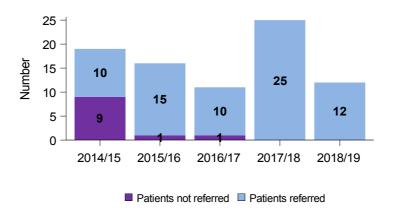

In addition to the 3 proceeding donors there were 2 authorised donors that did not proceed.

Best quality of care in organ donation

Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

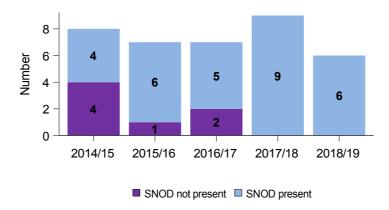

The Board referred 12 potential organ donors during 2018/19. There were no occasions where potential organ donors were not referred.

Presence of Specialist Nurse for Organ Donation

Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

Aim: There should be no purple on the chart

A SNOD was present for 6 organ donation discussions with families during 2018/19. There were no occasions where a SNOD was not present.

Why it matters

- If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.
- The authorisation rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	Scotland*	UK	
April 2018 - 31 March 2019			
eceased donors	98	1,600	
ransplants from deceased donors	332	3,943	
eaths on the transplant list	44	403

ctive transplant list	581	6,083	
lumber of NHS ODR opt-in registrations (% registered)**	2,837,904 (53%)	26,496,220 (41%)	
s at 31 March 2019 ctive transplant list	581	6,08	

Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Board are shown below, including a UK comparison. Data obtained from the Potential Donor Audit (PDA).

Key numbers comparison with UK data, 1 April 2018 - 31 March 2019

	DBD		DCD		Decease	Deceased donors	
	Board	UK	Board	UK	Board	UK	
Patients meeting organ donation referral criteria¹	1	2004	11	5974	12	7728	
Referred to Organ Donation Service	1	1982	11	5539	12	7287	
Referral rate %		99%		93%		94%	
Neurological death tested	1	1715					
Testing rate %		86%					
Eligible donors ²	1	1635	11	4180	12	5815	
Family approached	1	1493	5	1752	6	3245	
Family approached and SNOD present	1	1423	5	1527	6	2950	
% of approaches where SNOD present		95%		87%		91%	
Authorisation ascertained	1	1082	4	1099	5	2181	
Authorisation rate %		72%		63%		67%	
Actual donors (PDA data)	1	970	2	612	3	1582	
% of authorised donors that became actual donors		90%		56%		73%	

¹ DBD - A patient with suspected neurological death

Note that a patient that meets both the referral criteria for DBD and DCD organ donation is featured in both the DBD and DCD data but will only be counted once in the deceased donors total

For further information, including definitions, see the latest Potential Donor Audit report at www.odt.nhs.uk/statistics-and-reports/potential-donor-audit/

DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

² DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation

DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation
