

ODT Performance Report

Monthly – December 2019

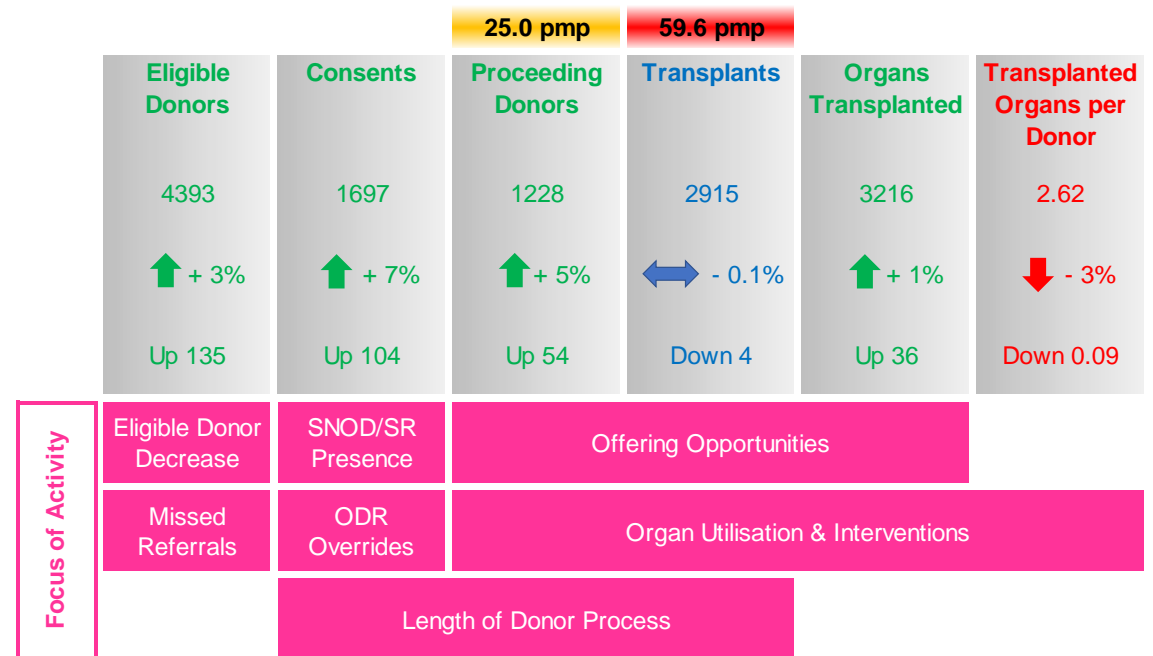

Data production date: January 09, 2020
Publication date: January 17, 2020

1. EXECUTIVE SUMMARY FOR JANUARY ODT SMT MEETING

- We have achieved a new record of 25.0 deceased organ donors per million population (in the 12 months to December 2019) and are still on track for another record year for deceased organ donors in 2019/20. However, January was a high-activity month last year (156), so there is a risk that donors per million population will decrease next month if there are fewer proceeding donors in January 2020.
- There were 147 deceased organ donors in December and 1228 YTD (vs 1174 in the same 9 months last year, +5%).
- The overall consent rate YTD remains at 68%, corresponding to 1697 families saying yes to donation (104 more consents than the same period last year, +7%).
- There were 333 deceased donor transplants in December and 2915 YTD (-0.1%, 4 transplants less, than Apr-Dec 2018).
- See infographic (right) for the latest pathway performance and our continued areas of focus. An update on progress against these areas of focus will be provided at the Q3 QPR on 29 January.
- Annual turnover in ODT is now 9%.

- The 'Pass it on' public awareness programme is progressing as planned and will build in scale as we approach implementation. New TV adverts launched in England before Christmas. Awareness of the new legislation across England has reached 55%. 39% of the population of England has registered to opt in on the Organ Donor Register.
- We continue to see spikes in opt out activity, driven mainly by 'fake news' on social media, which the team are working to address with new measures being implemented. YTD (Apr-Dec) there have been c400k ODR opt out registrations.

YTD: Apr-Dec 2019 vs Apr-Dec 2018
