

Paediatric patients who died in a PICU

2019/20

Yes I donate
ORGAN DONATION

Flow of paediatric patients through the donation pathway (PDA data)

Age distribution, April 2019 – March 2020

Audited deaths by hospital, April 2019 – March 2020

National: 572 deaths

5 hospital with 35 or more audited deaths

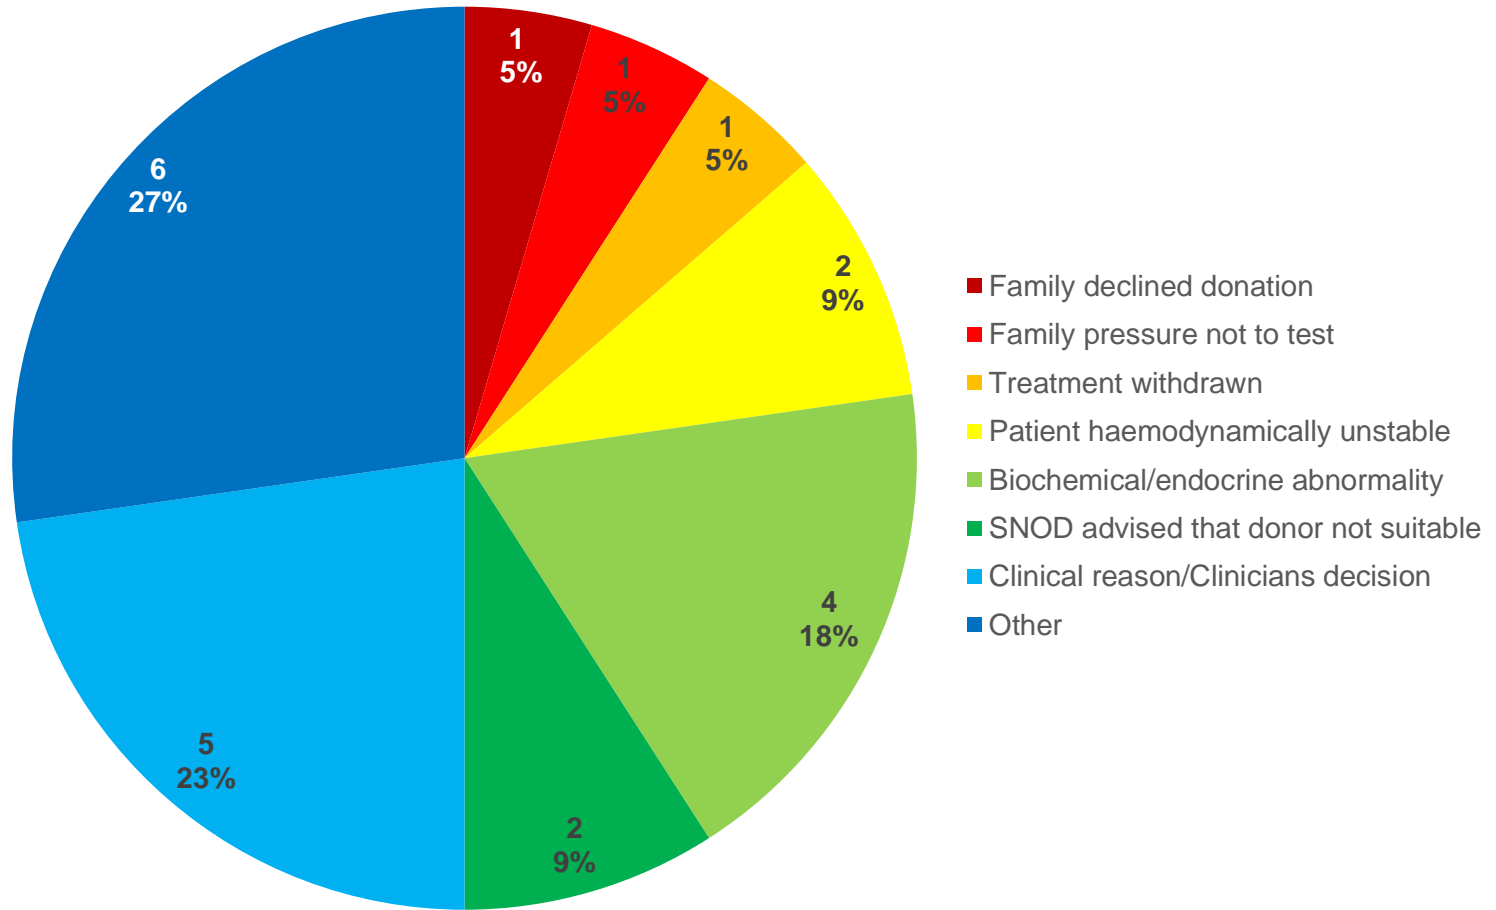

Number of neurological death tested/not tested patients by hospital, April 2019 – March 2020

National: 45 deaths where neurological tests were performed.

National: 22 deaths where neurological death was suspected and neurological tests were not performed.

Reason why neurological death tests were not performed, April 2019 – March 2020

Neurological death tests performed by age, April 2019 – March 2020

Median (IQR) age of those tested: 7 (2-12)
Median (IQR) age of those not tested: 5 (1-10)

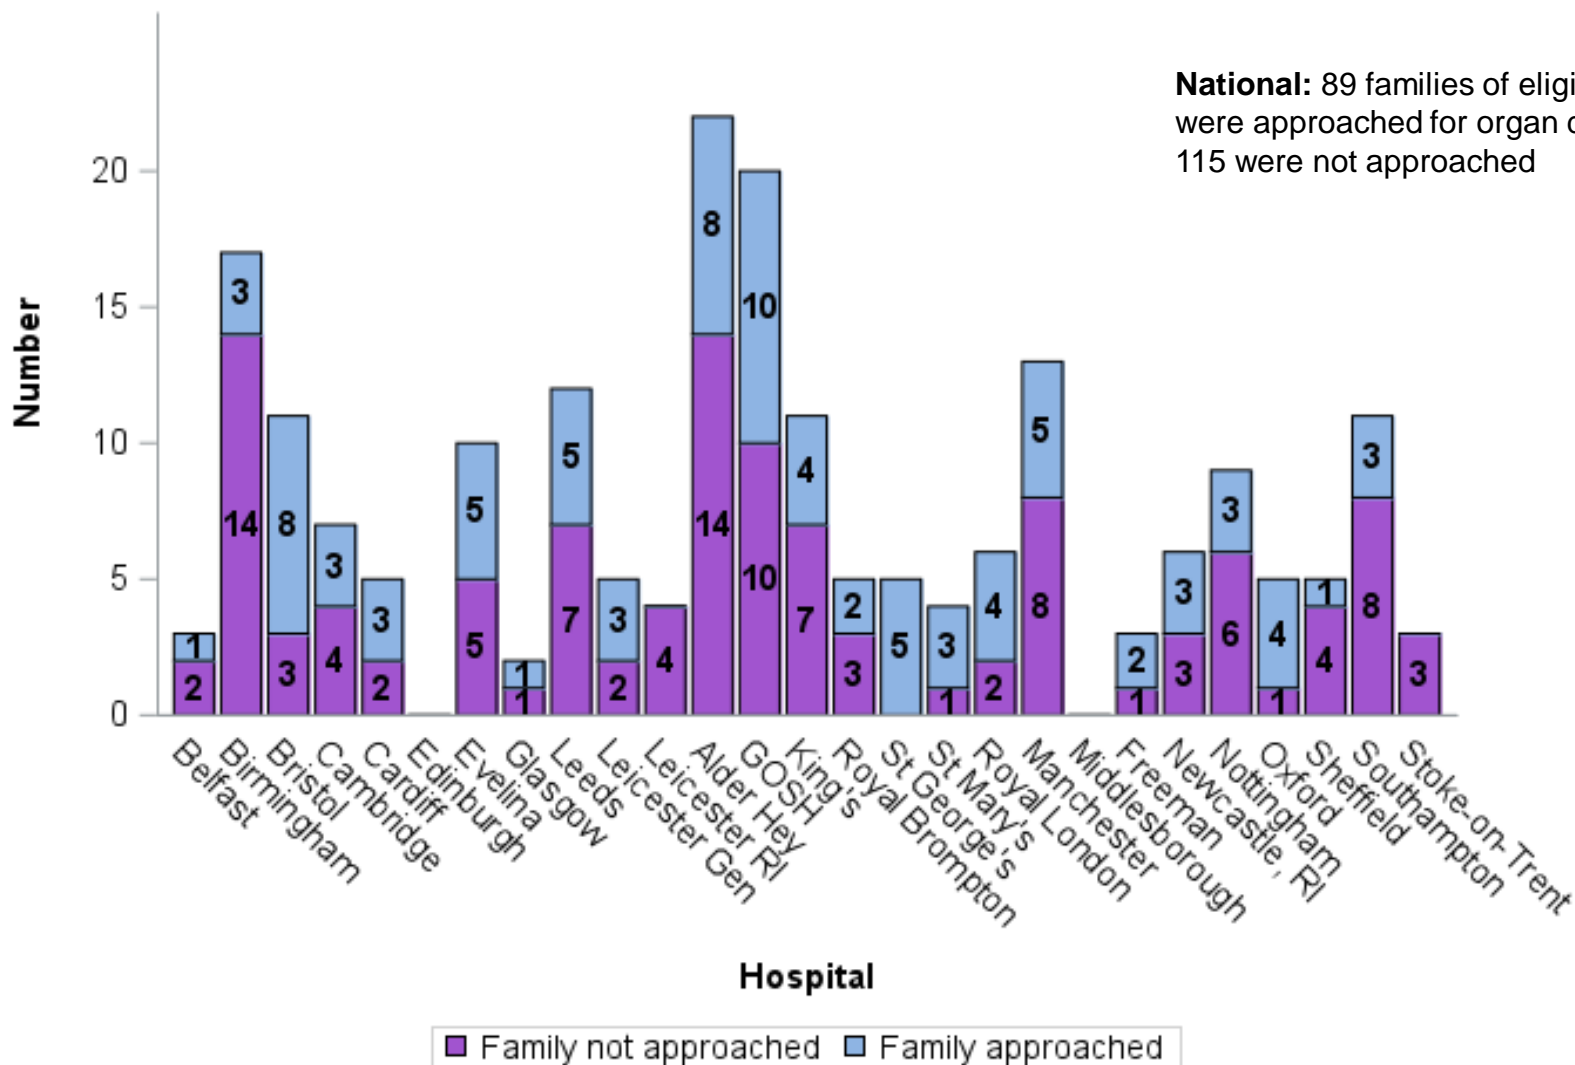

Eligible donors by hospital, April 2019 – March 2020

National: 42 eligible DBD and 162 eligible DCD donors

Eligible donors by hospital and whether the family were approached, April 2019 – March 2020

Reason families of eligible donors were not approached, April 2019 – March 2020

- Family stated that they would not support donation before they were formally approached
- Family considered too upset to approach
- Coroner/Procurator Fiscal refused permission
- Patient's general medical condition
- Other medical reason
- Patient outside age criteria
- Other
- Not identified as a potential donor/organ donation not considered

Number of approaches where a SNOD was present/not present by hospital, April 2019 – March 2020

National: A SNOD was present in 69 approaches and not present in 20

Number of families consented/authorised organ donation by hospital, April 2019 – March 2020

National: 43 families supported organ donation and 46 did not

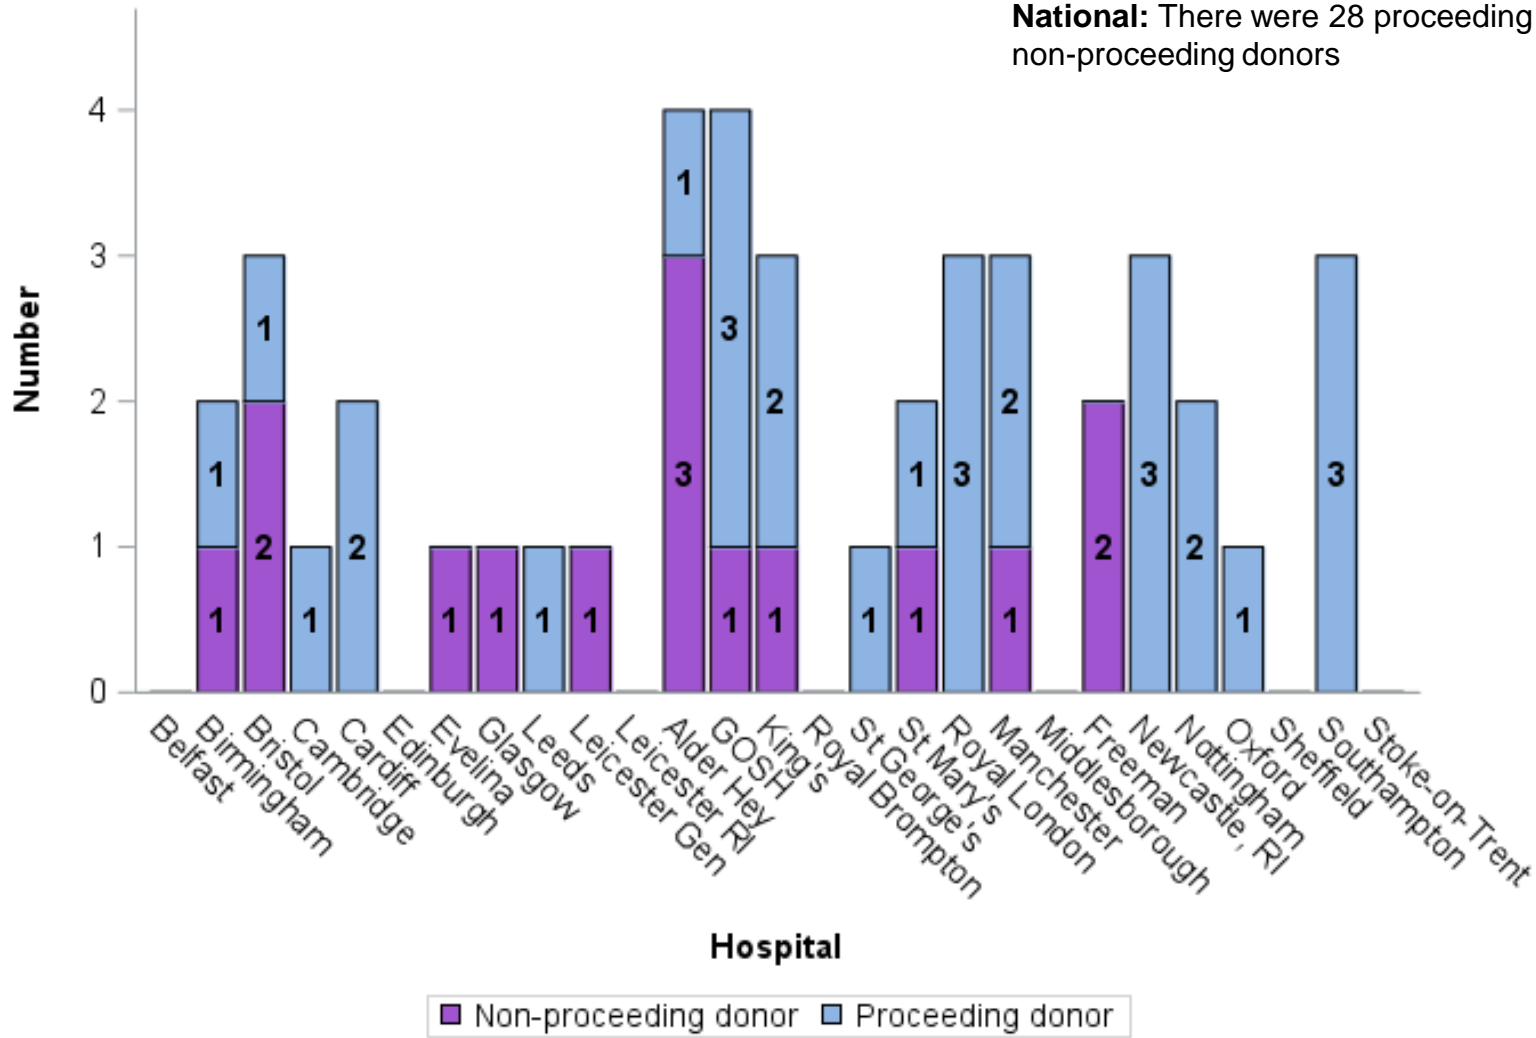

Reason families of eligible donors did not support organ donation, April 2019 – March 2020

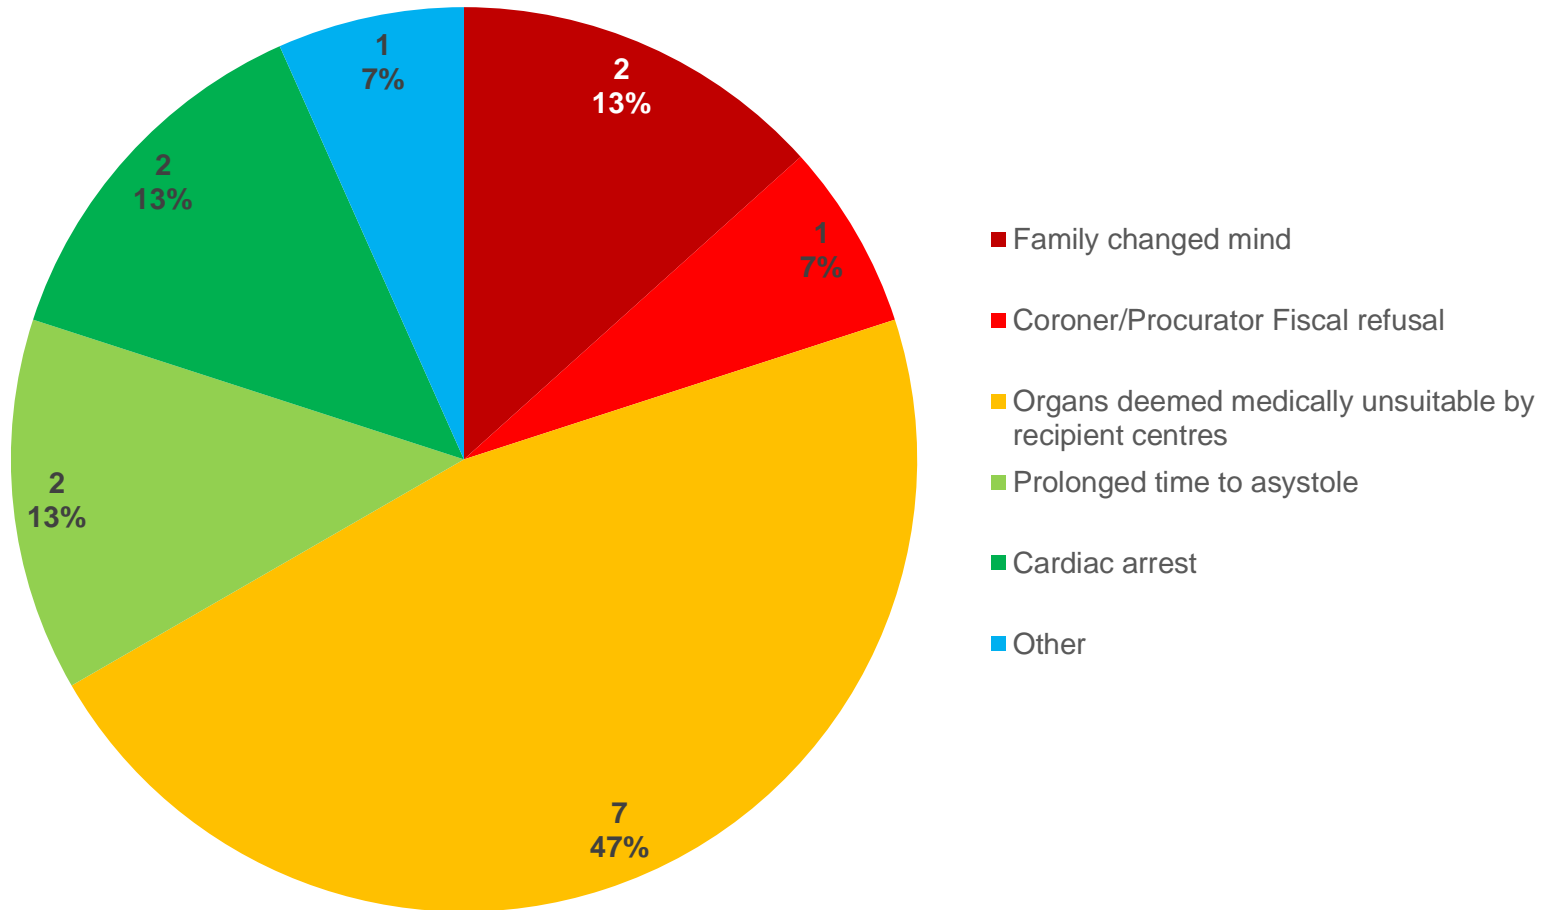

- Family did not believe in donation
- Family felt it was against their religious/cultural beliefs
- Family were divided over the decision
- Family felt the patient had suffered enough
- Family did not want surgery to the body
- Family wanted to stay with the patient after death
- Family felt the length of time for donation process was too long
- Family had difficulty understanding/accepting neurological testing
- Family felt the body needs to be buried whole (unrelated to religious or cultural reasons)
- Family concerned that organs may not be transplanted
- Strong refusal - probing not appropriate
- Other
- Family concerned donation may delay the funeral

Number of proceeding/non-proceeding donors by hospital, April 2019 – March 2020

National: There were 28 proceeding donors and 15 non-proceeding donors

Reason eligible donors whose families consented/authorised organ donation did not proceed to organ donation, April 2019 – March 2020

Transplants from proceeding donors by hospital, April 2019 – March 2020

Deceased paediatric donors (aged under 18 years)

2010/11 – 2019/20

Deceased paediatric donors (<18 years) by donor type, April 2010 – March 2020

Deceased paediatric donors (2 years and under) by donor type, April 2010 – March 2020
