

# Can London Transplant Centres & the QE Perform One Black Living Donor Transplant Each Month?

# THE UGLY

## Threefold impact of Covid 19 on black people:

- ▶ At higher risk of developing renal failure
  - ▶ Hesitancy to have Covid 19 vaccine
  - ▶ Higher mortality rate due to underlying health conditions
- 

# THE BAD

**Number of living donor transplants by ethnicity performed in the UK in the last financial year:**

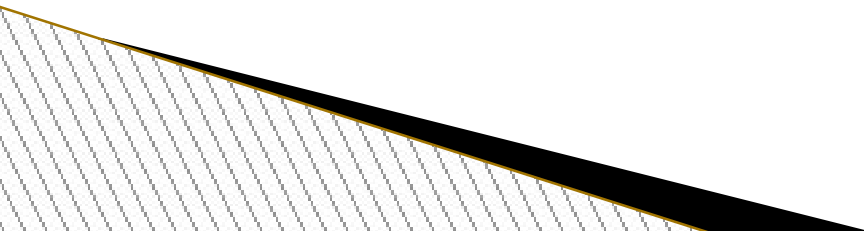

(NHSBT BAME Transplant Activity Report )

- ▶ **Black: 25**
- ▶ **White: 890**
- ▶ **Asian: 83**

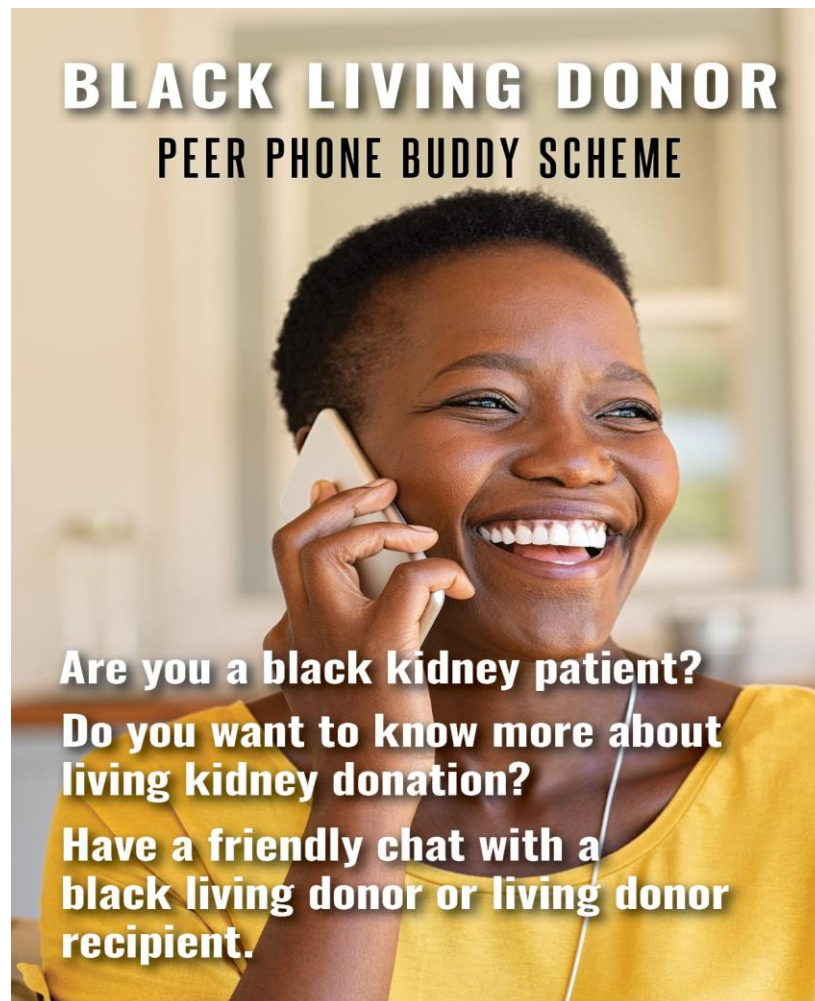

# THE GOOD

- ▶ To date, we have over 544 black living kidney donors in the UK
- ▶ More community engagement work
- ▶ More culturally tailored resources available

**But what can we do to increase the numbers?**

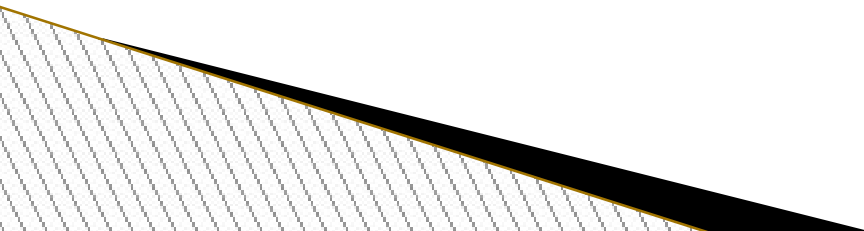

# Peer Phone Buddy Scheme: Simple way to increase black living donors

# BLACK PEER PHONE BUDDIES

# HEALTHCARE PROFESSIONALS

- ▶ Will help to improve health inequalities
  - ▶ Offers an integrated model of support care
  - ▶ Can easily be embedded in the pathway
  - ▶ Help HCP's to better engage with black patients
  - ▶ Help to building trusting relationships
  - ▶ Clinical and Community leadership working together
- 

# THE BEAUTIFUL

**Can London Transplant  
Centres & the QE perform  
one black living donor  
transplant each month?**

# Take-Home Message

Together we to:

- ▶ Reduce the **UGLY**
  - ▶ Change the **BAD**
  - ▶ Do the **GOOD**
  - ▶ Create the **BEAUTIFUL**
- 

# Thank you
