**RECENT AND FUTURE WORK**

- 6 Work has continued, in collaboration with the Winton Centre for Risk Communication, to develop a tool to support conversations between patients and clinicians at the time of listing with regards to the risks and benefits of transplantation. The lung and kidney models have been developed first and then the other organs are due to be developed shortly.
- 7 Work has progressed on the re-design of the UK VAD Database following recruitment of an IT developer in January 2021.
- 8 There have been two recent Applications for Data:
- Validation of scores to predict mortality after heart transplantation in a contemporary UK population, Malek Hassan and Stephen Pettit, Papworth
- Effect of PGD on medium term outcome after heart transplant, John Dark, Newcastle
- 9 Fixed term projects and regular reports are listed in **Tables 1** and **2** below
