

ADULT HEART TRANSPLANTS

How long do people wait for a heart transplant?

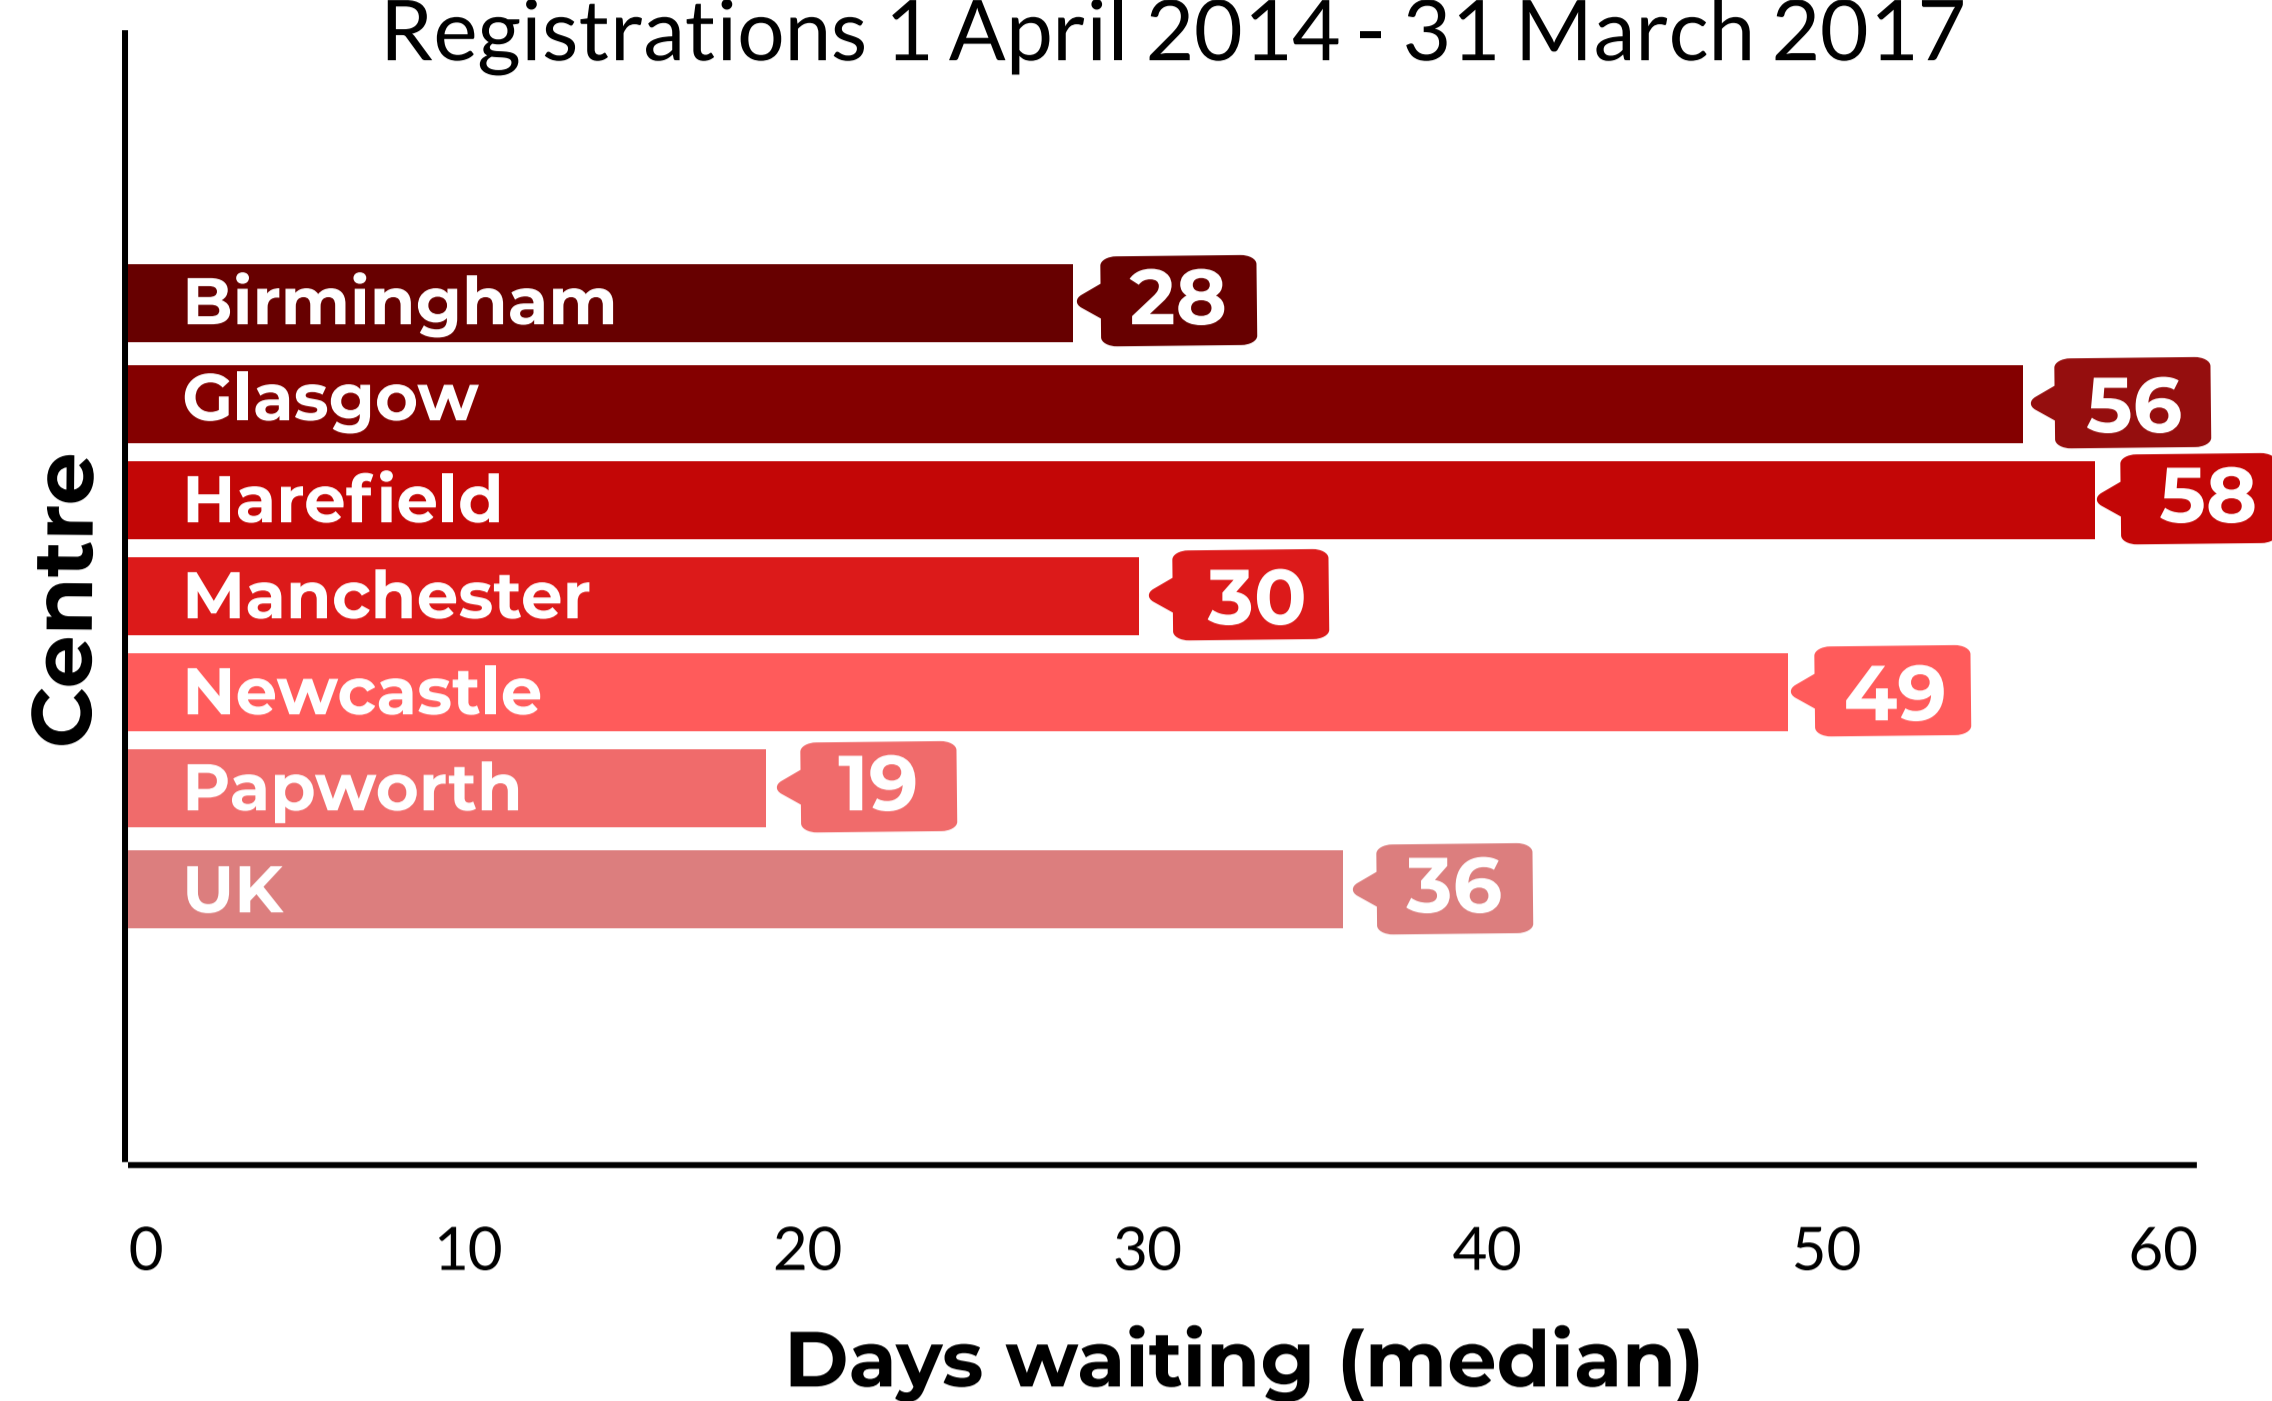

Non-urgent patients at initial registration

Registrations 1 April 2014 - 31 March 2017

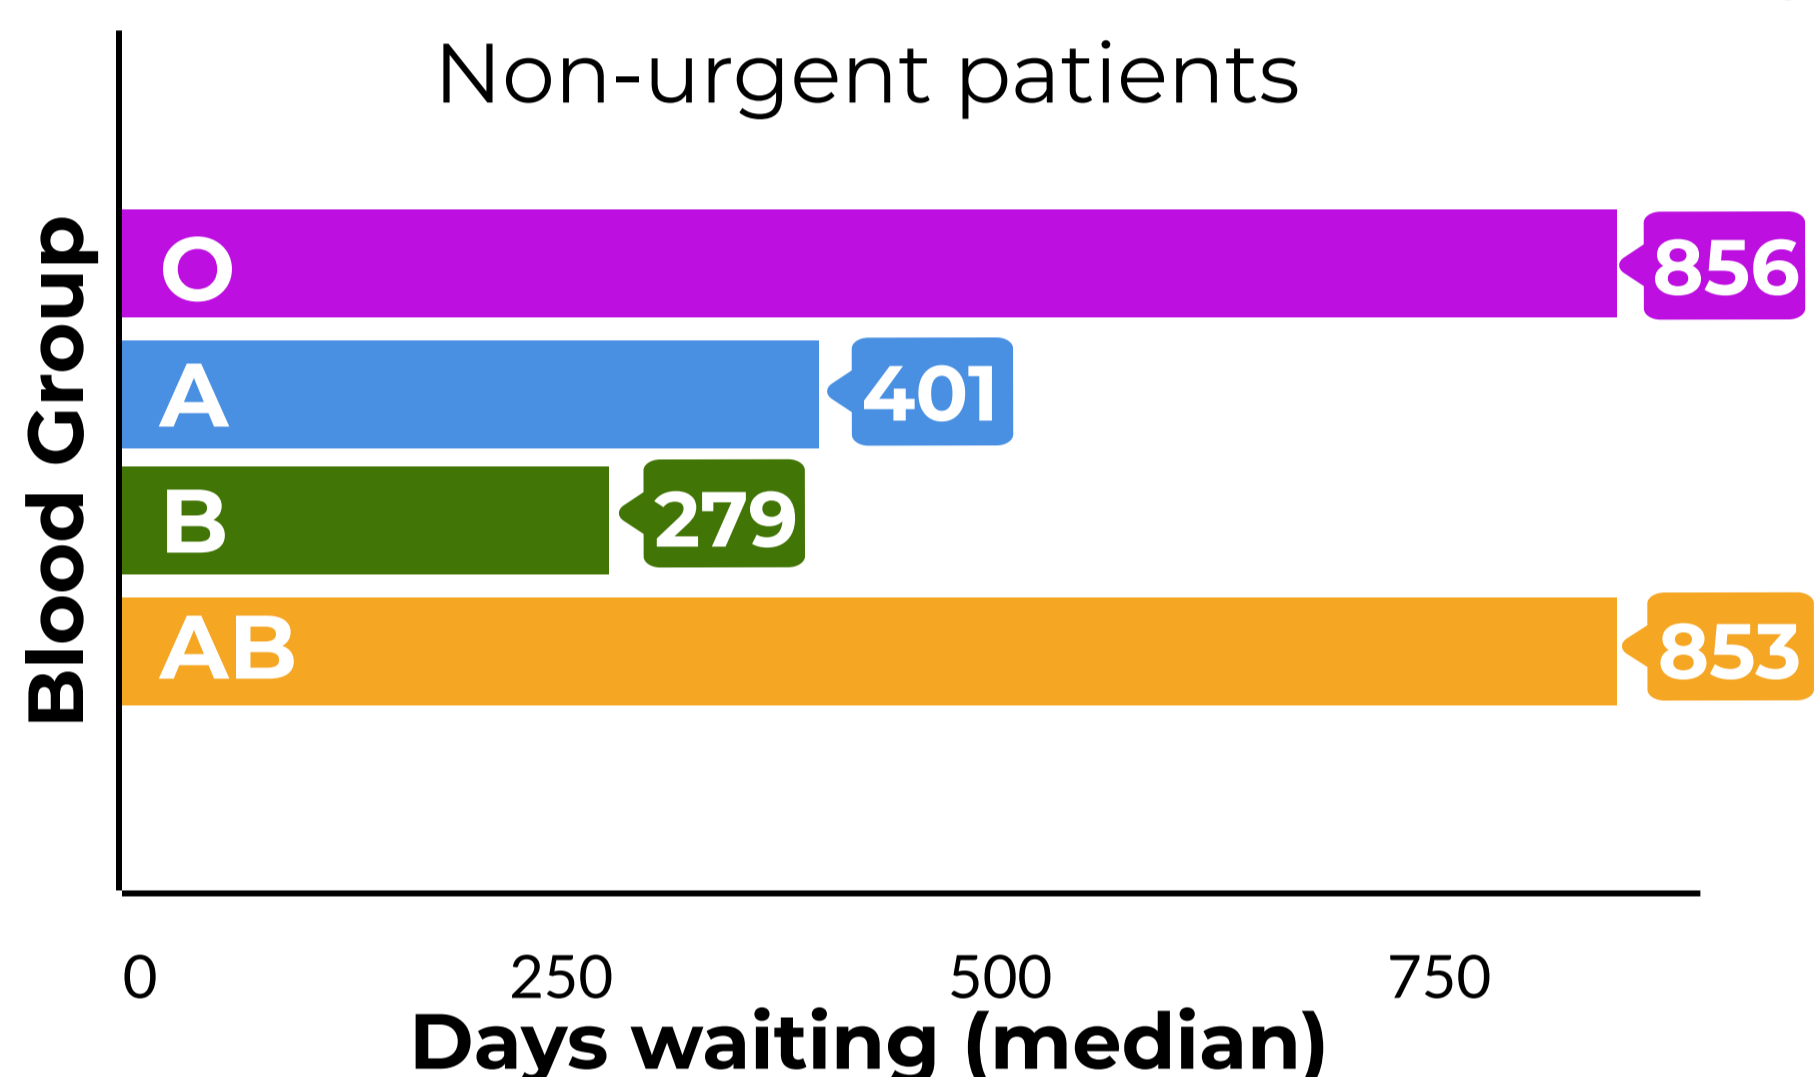

Urgent patients at initial registration

Registrations 1 April 2014 - 31 March 2017

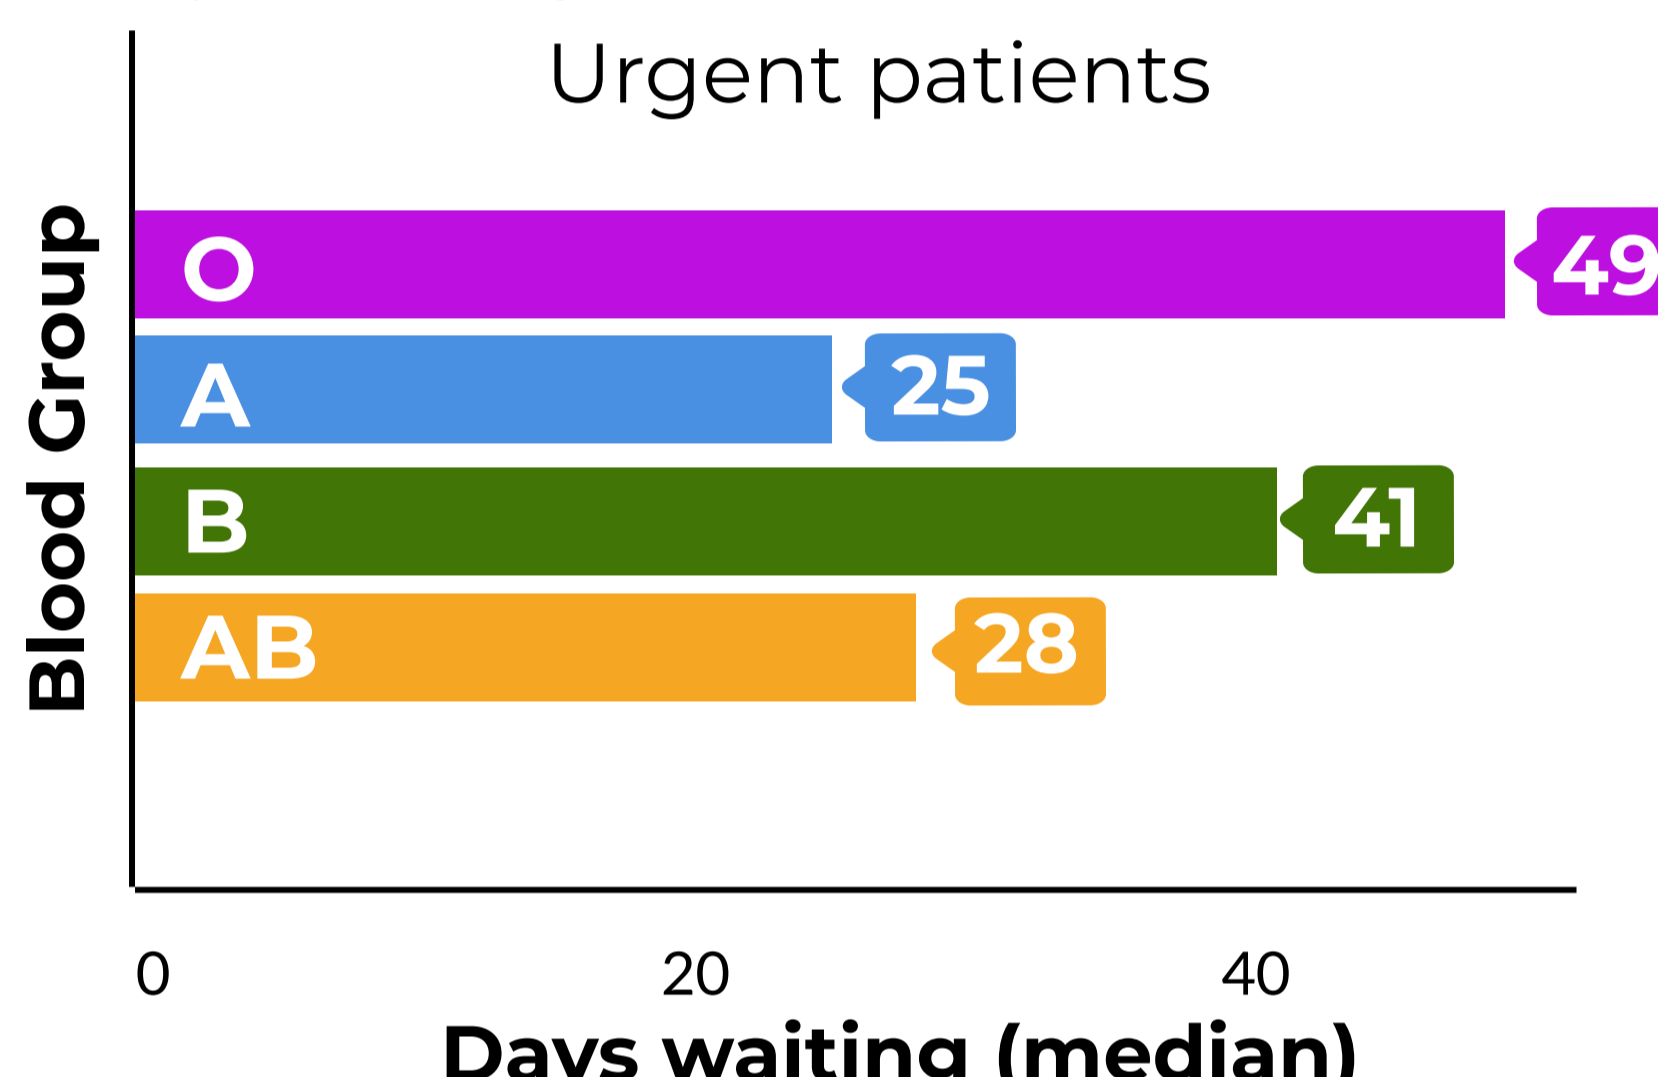

National waiting time by blood group

Non-urgent patients

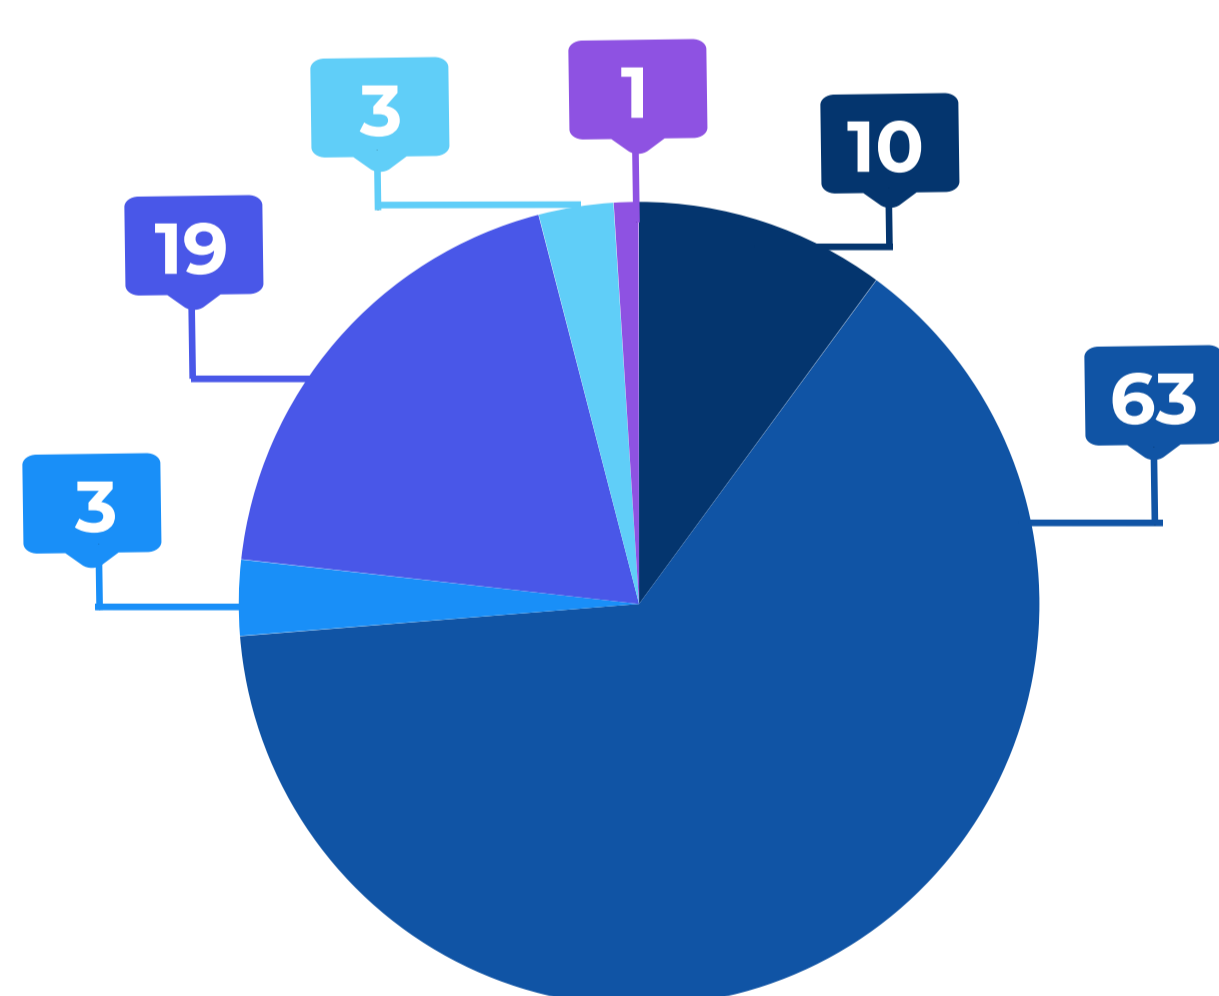

Urgent patients

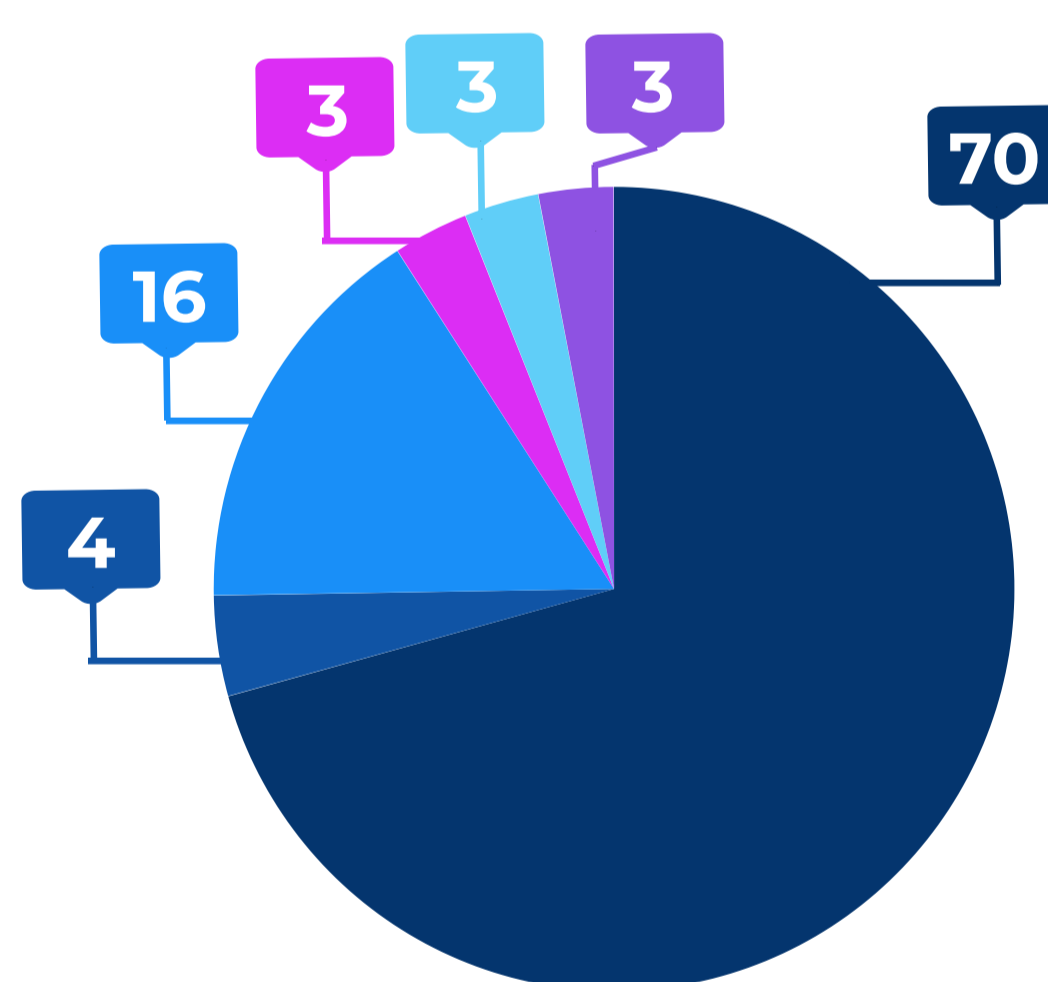

The median is a type of average and is the time when half of patients have received a transplant

Lots of things affect how long you might wait, including your blood group, presence of antibodies and the availability of the right size organs

Nationally, 6 months after going on the non-urgent list

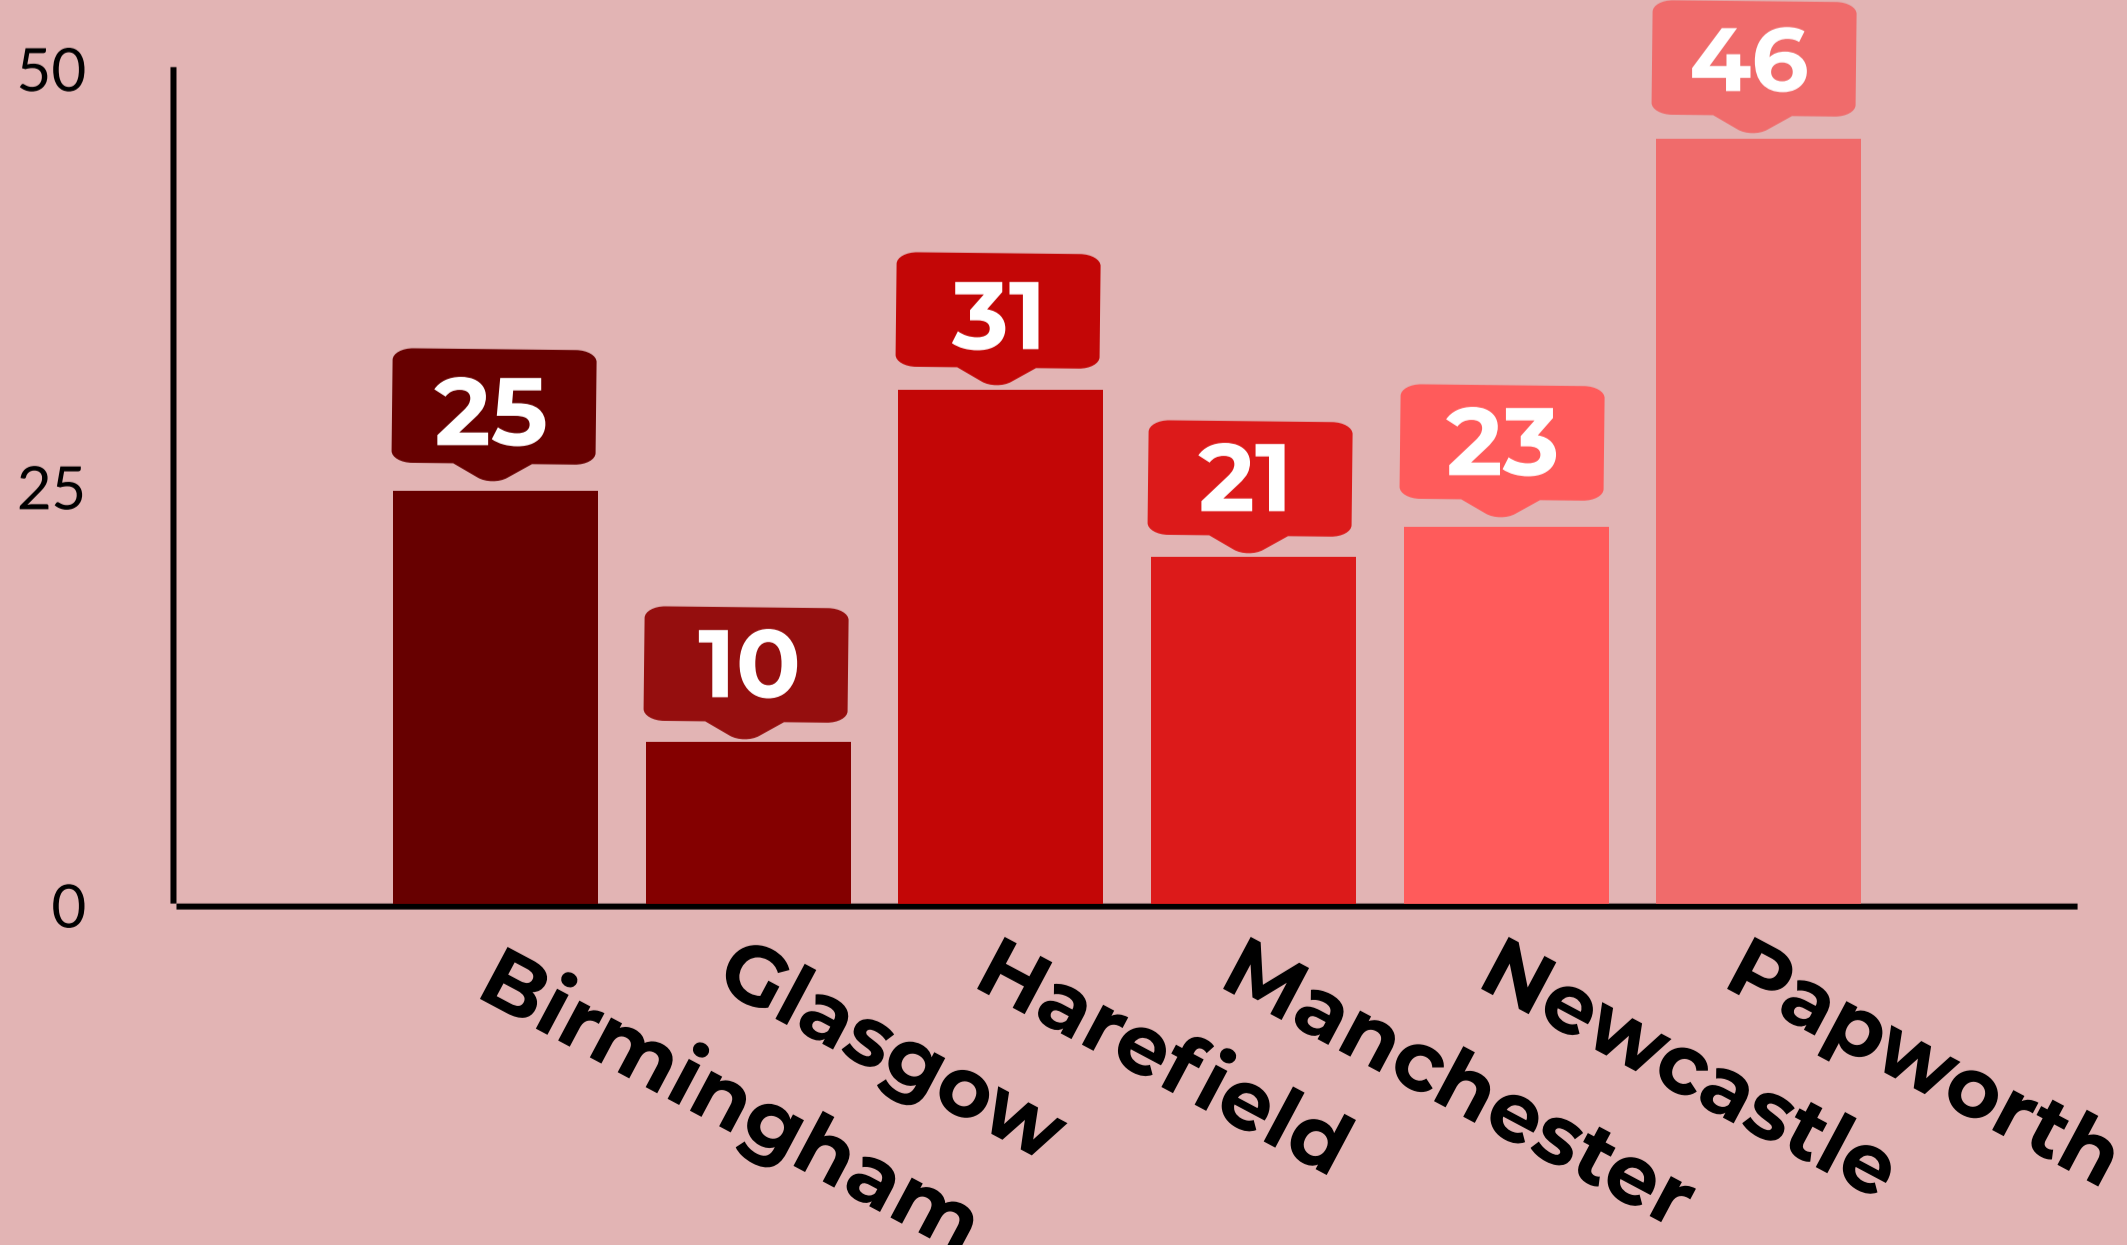

Nationally, 6 months after going on the urgent list

- % transplanted
- % still waiting
- % removed from the list
- % who became urgent
- % who became non-urgent
- % died waiting
- % who became super-urgent

Average number of transplants per year between 1 April 2017 - 31 March 2020

What are the chances of a person surviving for one year after transplant?
