Bristol NHS Foundation Trust
University Hospitals Dorset NHS Foundation Trust
York Teaching Hospital NHS Foundation Trust
Calderdale and Huddersfield NHS Foundation Trust
Sheffield Teaching Hospitals NHS Foundation Trust
Hull and East Yorkshire Hospitals NHS Trust

We know that lots of sites are close behind, thank you for all your hard work!

Top Tips

The time eligibility is confirmed should be the initial eligibility check <u>before</u> randomisation, not the time the ICU doctor reconfirmed eligibility

Remember to upload a copy of the source data form to the restricted section of DonorPath

Consent should be taken after neurological death testing, you can discuss the study/provide the information before if the family are interested in research

We have not specified a time for giving the Simvastatin but it should be given as soon as possible after randomisation. You may need to think about local policies for NG tubes and x-ray out of hours

Remember to initial 3b on the consent form and on DonorPath

The Source data form should be left on site for the research team, if you're not sure where to leave it, check DAT3936
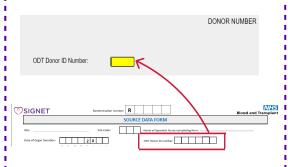

Associate PI Scheme

Dr Nick Plummer is an associate PI at Nottingham University Hospitals NHS Trust and says "SIGNET is an exciting study to be involved with. It's a huge randomised controlled trial in an under-studied patient population, and uniquely amongst studies that trainees get to be involved with, has impacts for patients beyond the individuals consenting to be involved. Taking part in the associate PI scheme is giving me a much greater insight into how these huge, multi-centre trials are run, from working alongside the Trust's research team and supporting the PI's workload through to supporting the SNODs' decision making regarding screening and approaching families, being involved in the consent and randomisation processes, and educating staff on the shopfloor regarding the intervention. The scheme is incredibly valuable in allowing trainees to be more involved in the high-level work that goes into such trials"

You can register to be an associate PI using the NIHR Associate PI Scheme Website.

MACRO Data Entry

A common data query is about the ODT donor ID number.

This is a 6 digit donor ID which the SNODs write on the source data form <u>NOT</u> the trial ID/randomisation number

DONOR NUMBER

ODT Donor ID Number:

SIGNET   Randomisation number: R   NHS Blood and Transplant
SOURCE DATA FORM
Site: Site Code: Name of Specialist Nurse completing form:
Date of Organ Donation: 2 0   ODT Donor ID number:
