

Introduction to smarter inventory management

Free 1 day online course for State registered Health Care Professionals provided by the Blood Stocks Management Scheme and Patient Blood Management team. Access to your VANESA data is essential.

Course content includes:

- Understanding the role of Blood Stocks Management Scheme – Aims and objectives
- VANESA – Features and navigation of the web-based data management system, employed by BSMS
- Entering data into VANESA
- Calculating your nominal stock, issuable stock index data and WAPI
- Considerations for setting appropriate stock levels, both red cell and platelets
- Ordering patterns and management of stocks
- Challenges within the blood supply chain
- Discussion around the reasons and types of wastage
- Steps to minimize wastage
- Participation in scenario-based case studies and tasks
- Questionnaire and self-assessment

Dates:

Monday 4th April 2022
Thursday 16th June 2022
Wednesday 14th September 2022
Thursday 24th November 2022
