Advanced Transfusion Masterclass

HATS – Haemoglobinopathies and Transfusion Support

Kahoot information

Please familiarise yourself with the kahoot website (<https://kahoot.it/>).

We will be starting the programme with a short kahoot quiz and this is best played on a handheld device (e.g. mobile phone) separate from the screen the presentation (question) is being viewed from. You do not need to download the app as we will give you a Game pin number to enter on the day.

The sessions will comprise of a selection of interactive case studies delivered by both RCI and Scientific and Clinical Training staff.

This is an interactive half day to share learning of complex transfusion science practice and is a great CPD opportunity.

Price of attendance for NHS staff is £100
