

NHS BLOOD AND TRANSPLANT
OCULAR TISSUE ADVISORY GROUP

SURGEON ACTIVITY BY REGION AND GRAFT TYPE

INTRODUCTION

- 1 This paper summarises surgeon corneal transplant activity by region for 2015/16. These figures are presented by graft type and ordered according to the surgeon activity within each region. 'Not reported' indicates that the type of graft was not recorded on the transplant record form and that surgeons have not notified NHSBT of the correct graft type. 'Not returned' means that NHSBT have not received the transplant record form and therefore have no data on these transplants.

RESULTS

- 2 The total number of transplants was 3743 of which 1203 were penetrating keratoplasty (PK), 363 were deep anterior lamellar keratoplasty (DALK) and 1775 were endothelial keratoplasty (EK). In 65 cases the type was recorded as 'other', in 33 the type of graft was not reported and for 304 the transplant record form had not been returned. Those where the graft type was not reported (0.9%) or where the transplant record form has not been returned (8.5%) represent 9.4% of the transplants that took place in 2015/16.
