

# ADULT LUNG TRANSPLANTS

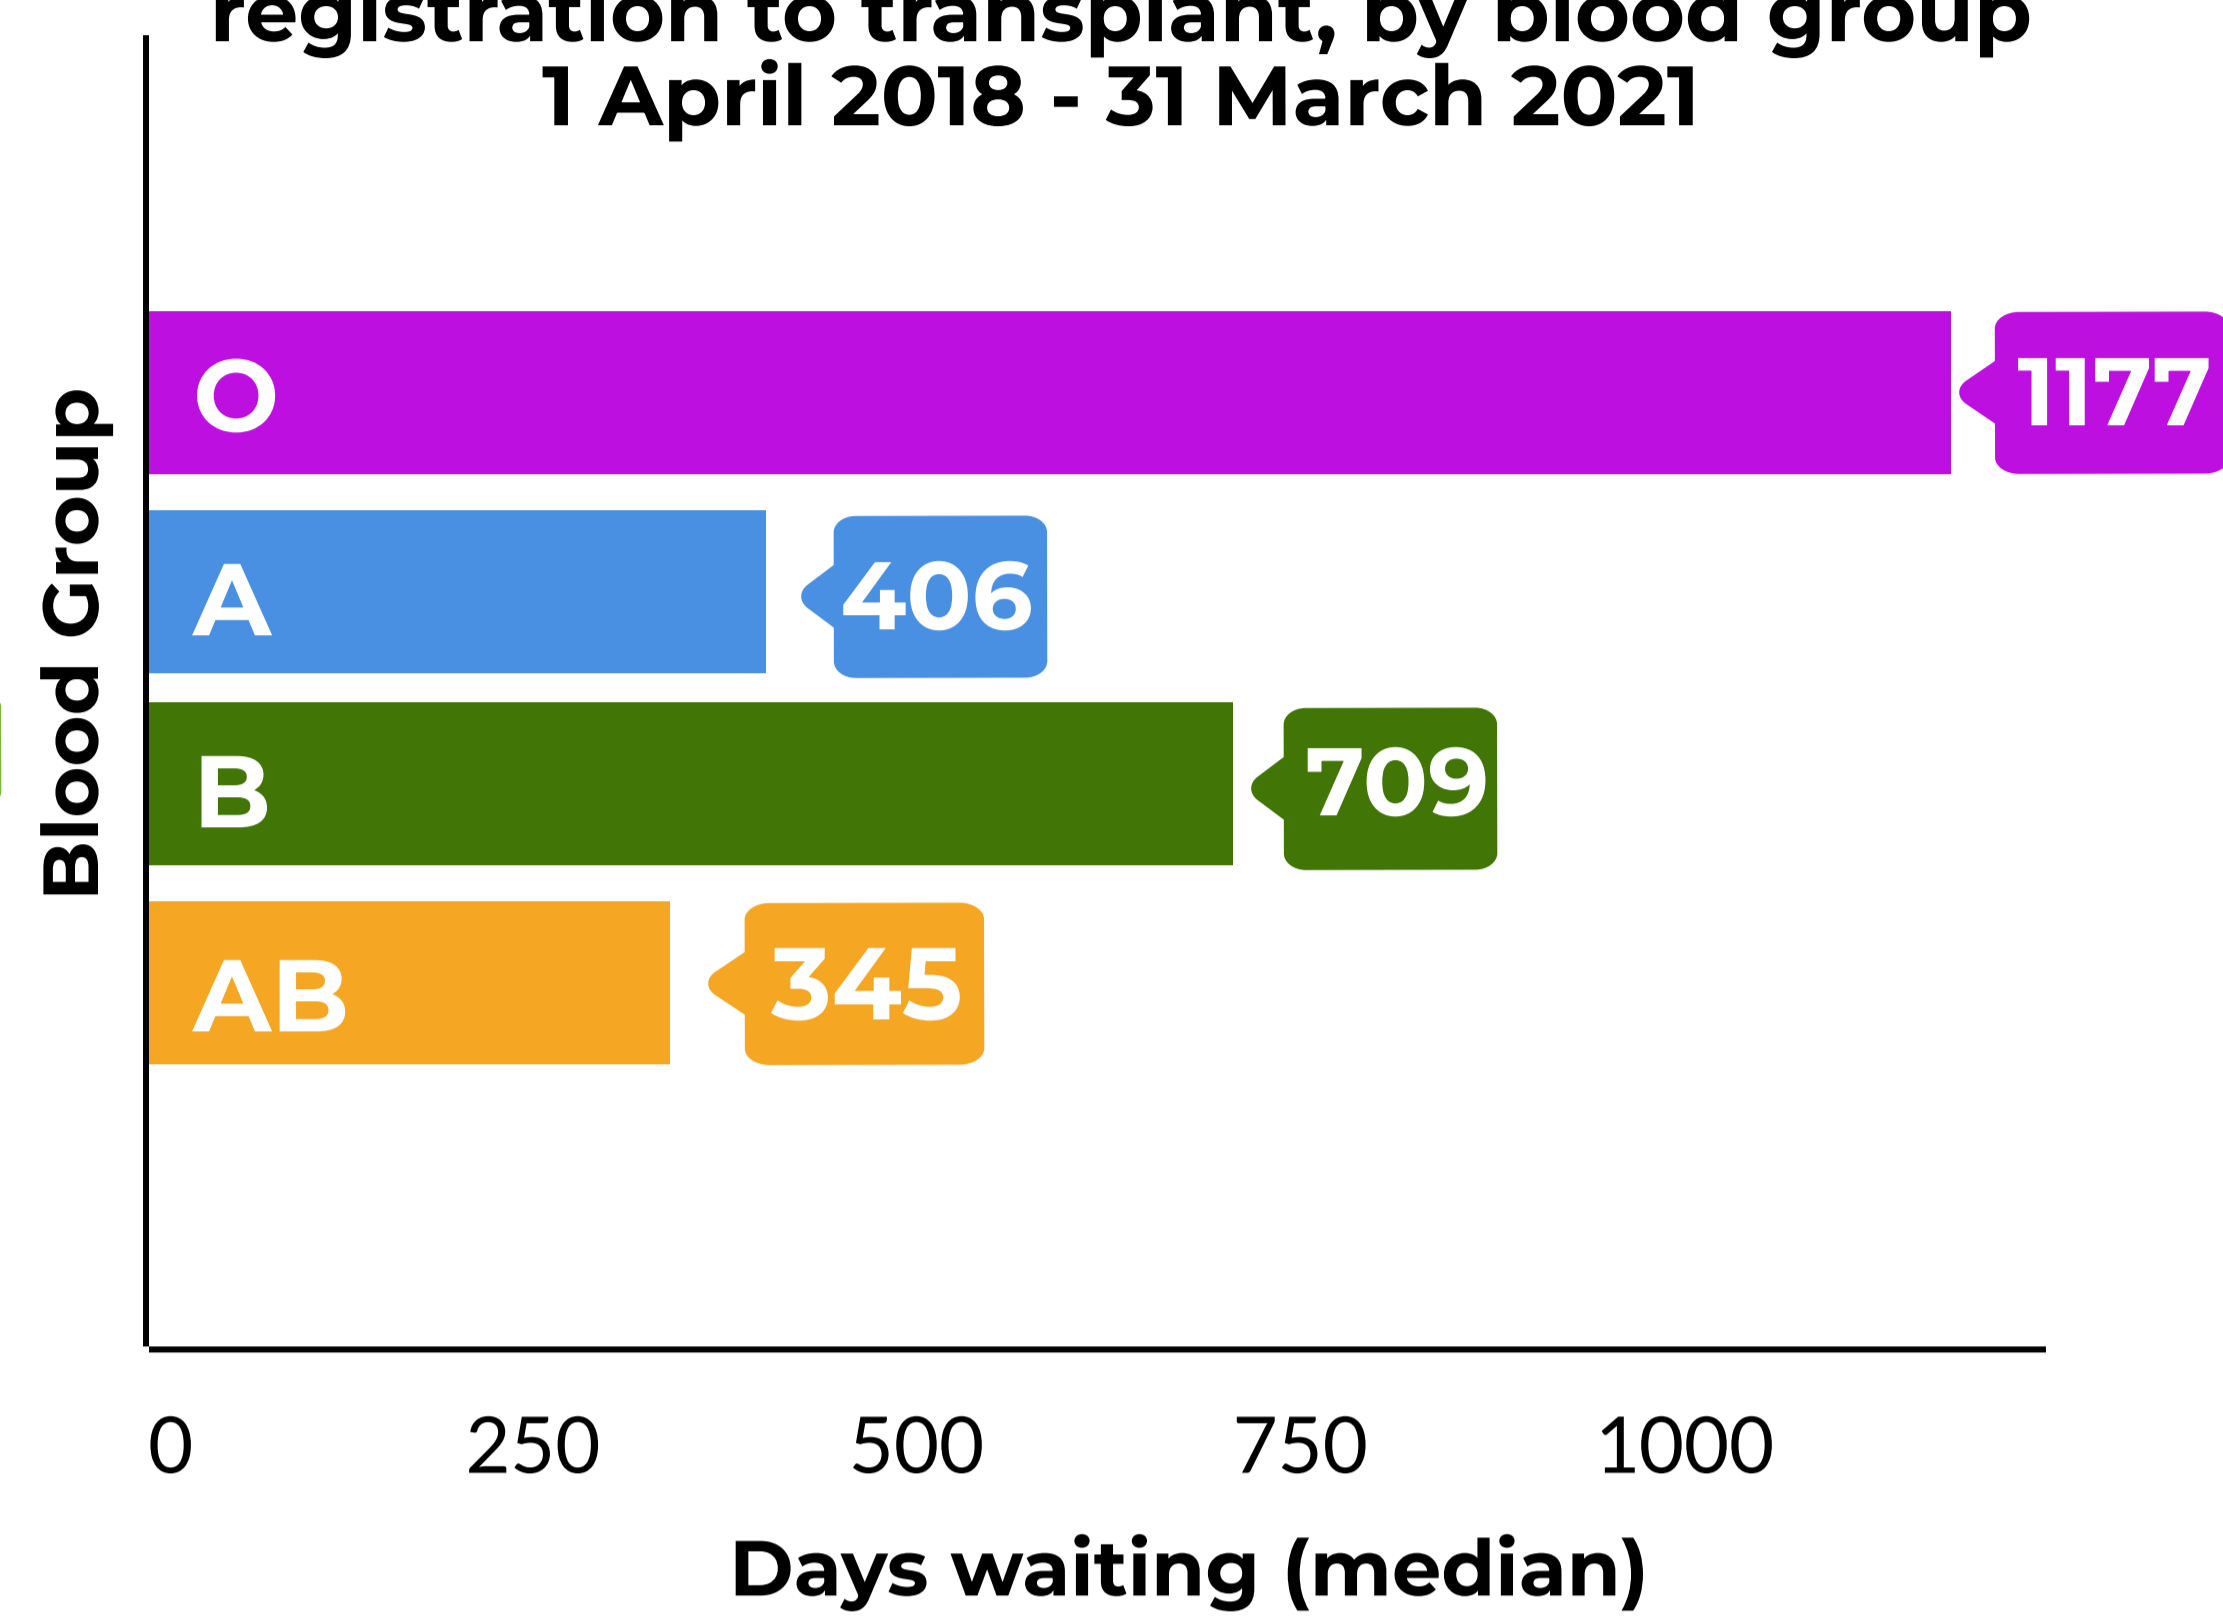

## How long do people wait for a lung transplant?

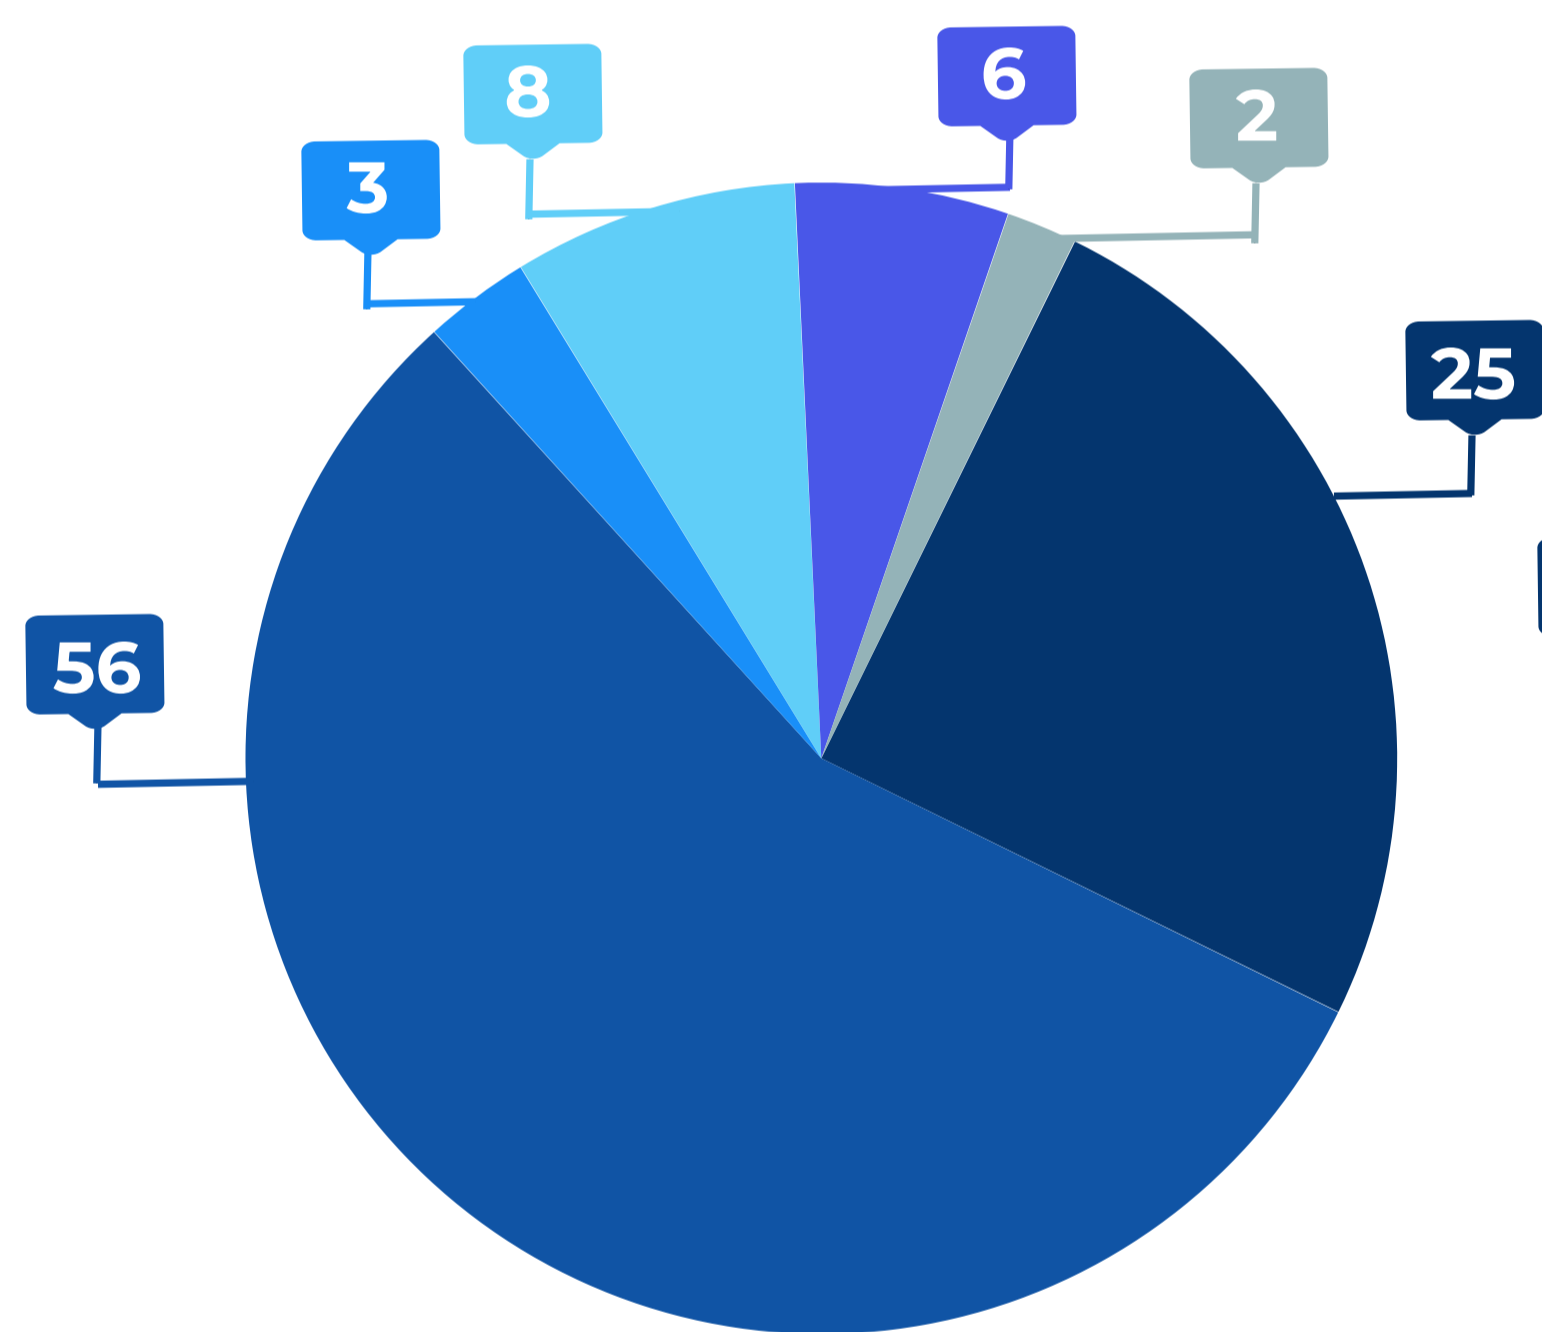

Estimated time from non-urgent registration to transplant, by centre  
1 April 2018 - 31 March 2021

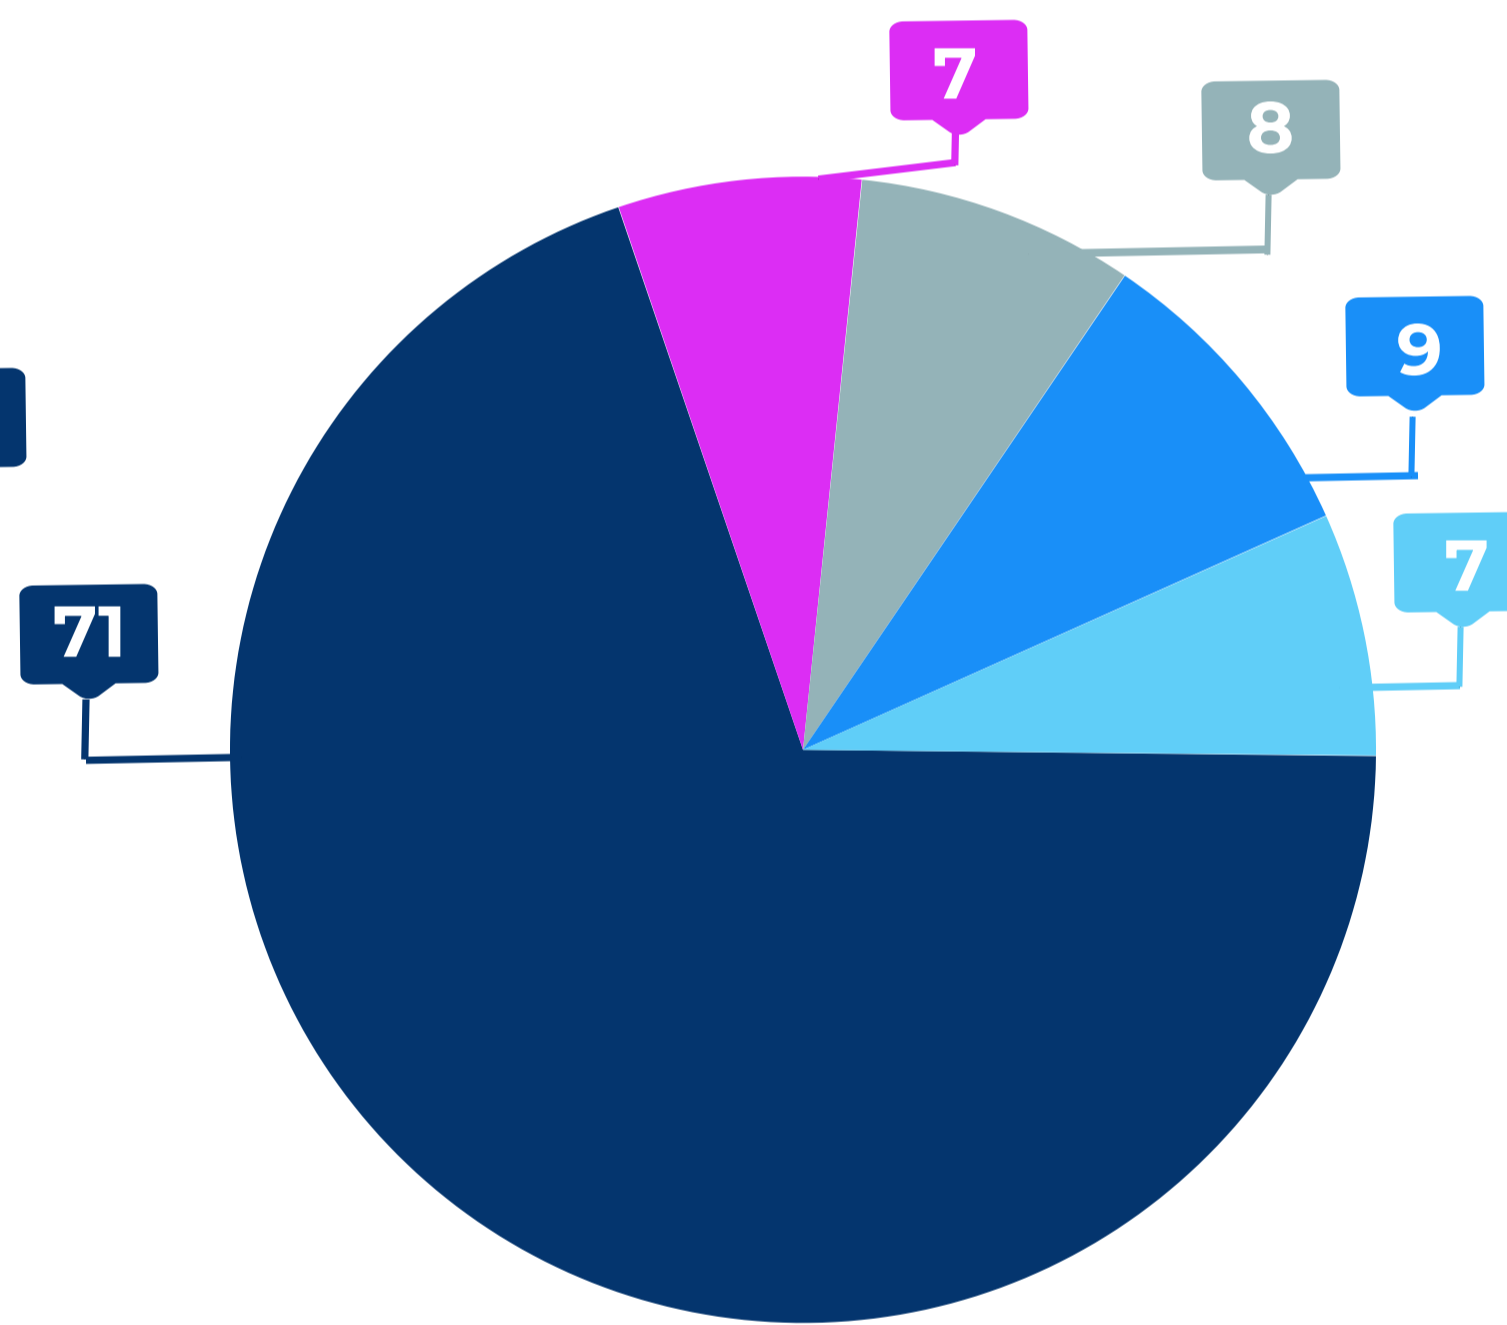

Estimated time from non-urgent registration to transplant, by blood group  
1 April 2018 - 31 March 2021

Nationally, 6 months after going on the non-urgent list

Nationally, 6 months after going on the urgent list

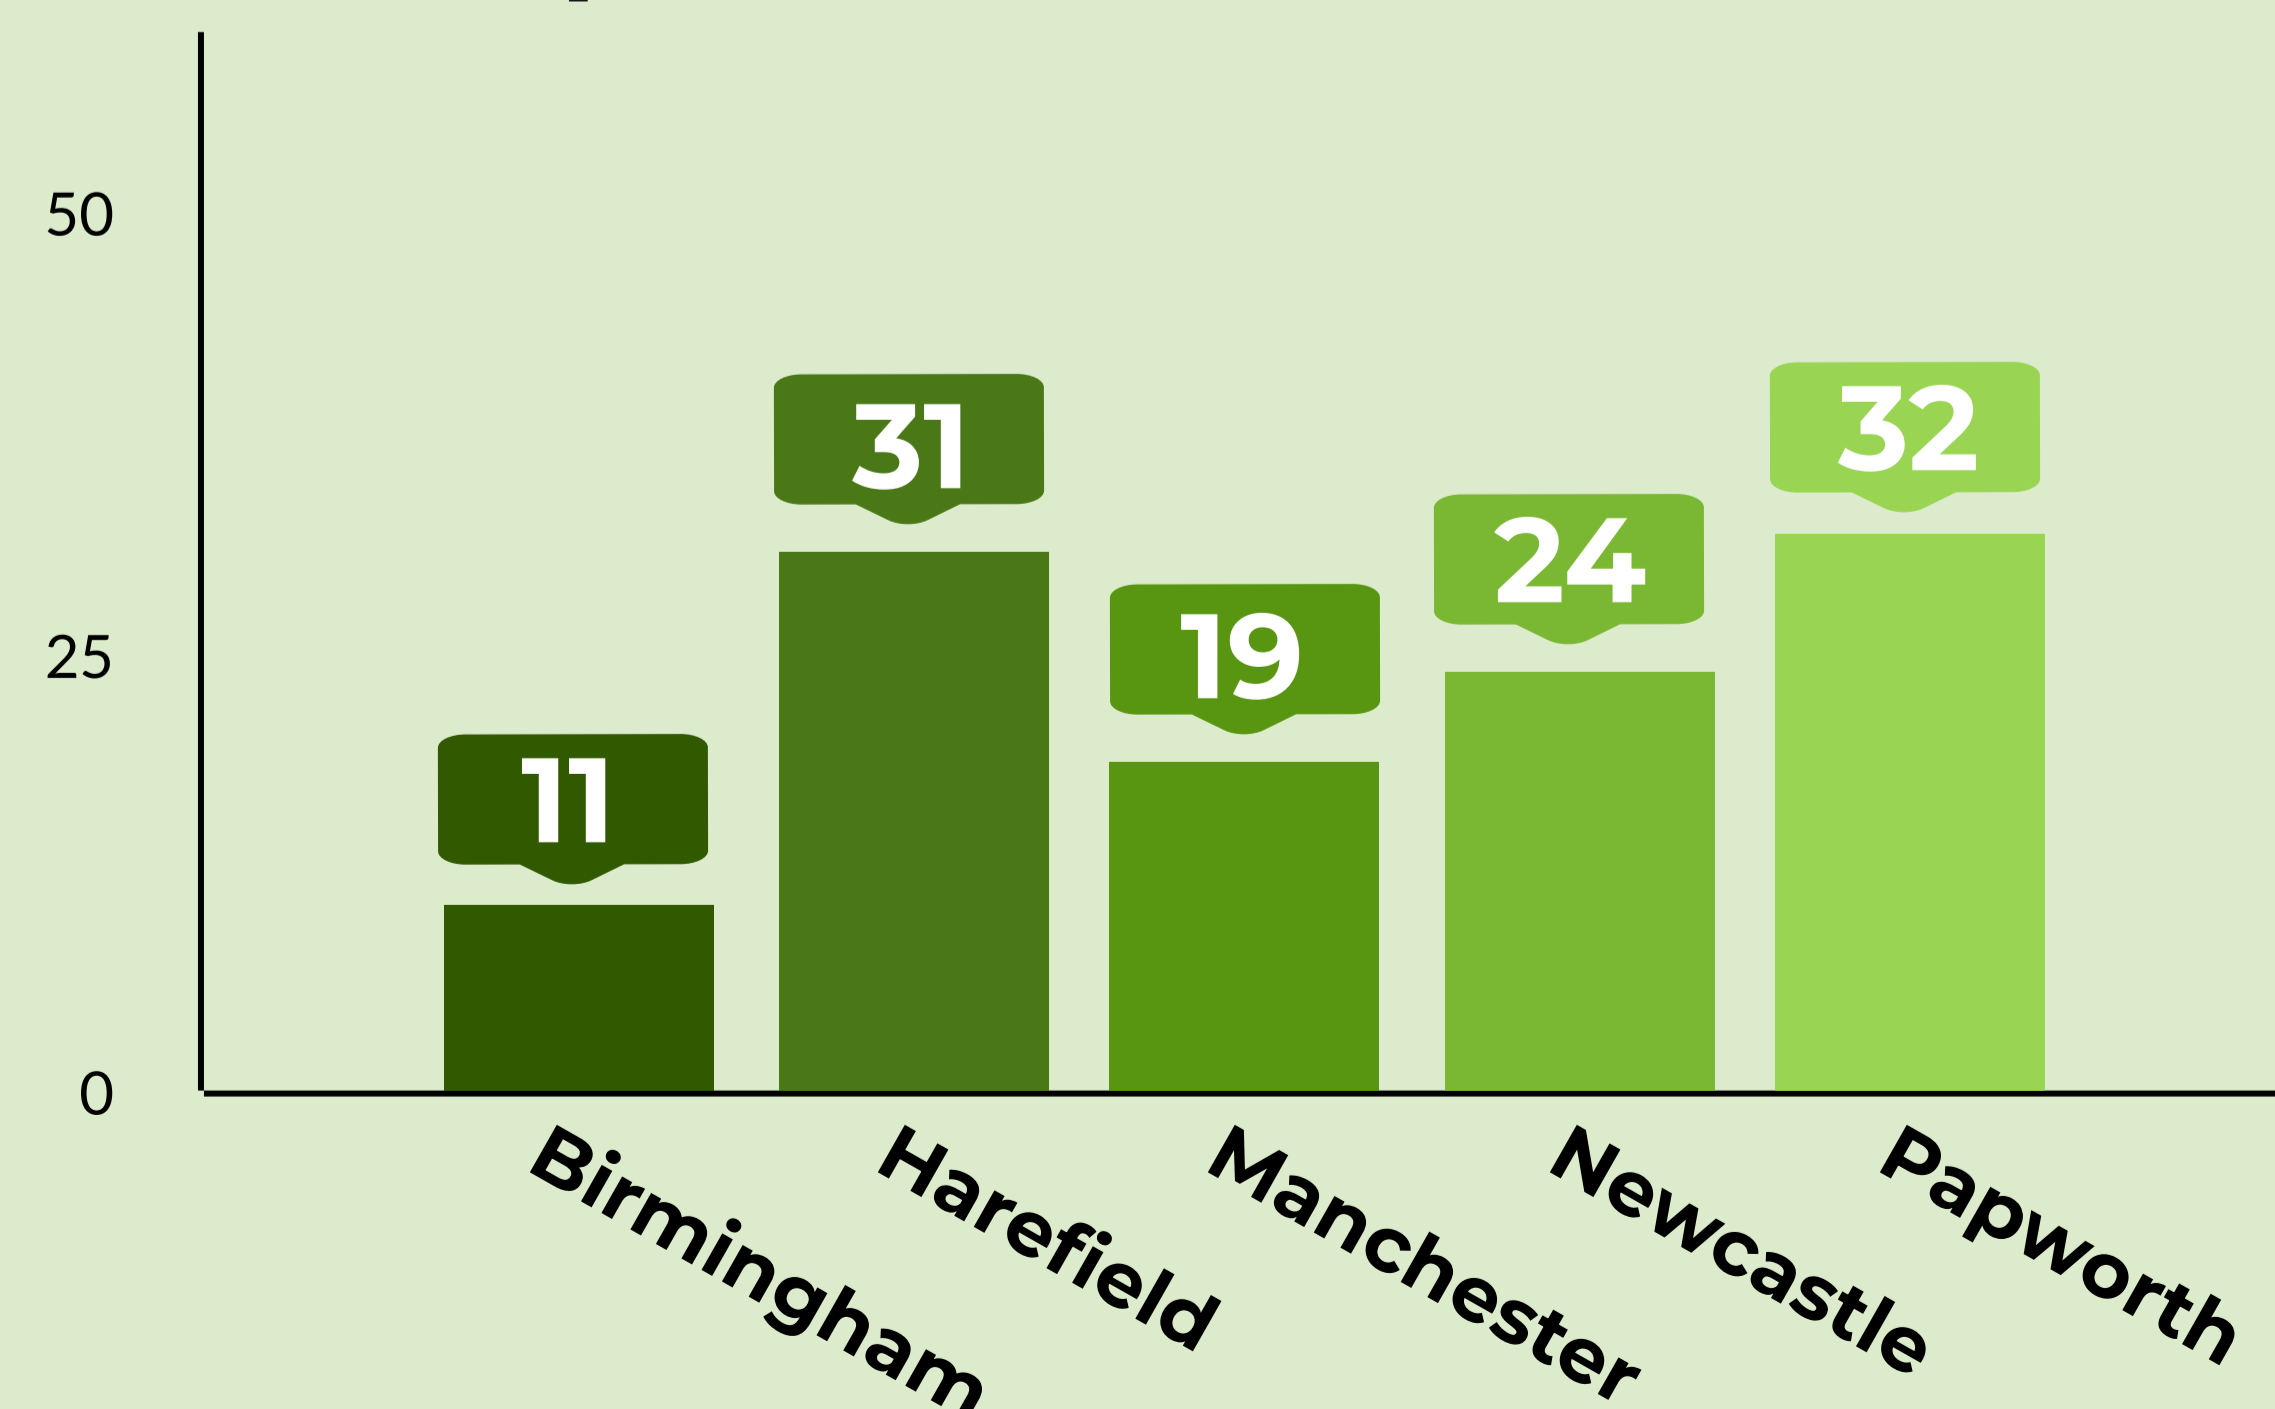

The median is a type of average and is the time when half of patients have received a transplant

Lots of things affect how long you might wait, including your blood group, presence of antibodies and the availability of the right size organs

- % transplanted
- % still waiting
- % removed from the list
- % who became urgent
- % who became non-urgent
- % died waiting
- % who became super-urgent

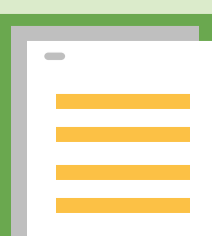

Average number of transplants per year between  
1 April 2019 - 31 March 2022

## What are the chances of a person surviving for one year after transplant?

On average, **83 out of 100** adult patients are alive after one year following a lung transplant

### One year survival rate
