

Newsletter 4 - June 2022

Donors Randomised: **227** Trusts/Boards open to recruitment: **69**

Updates

A huge thank you to site teams for the hard work getting the study set up - we're now recruiting at **69 Trusts/Boards across the UK (>100 individual Hospitals)**.

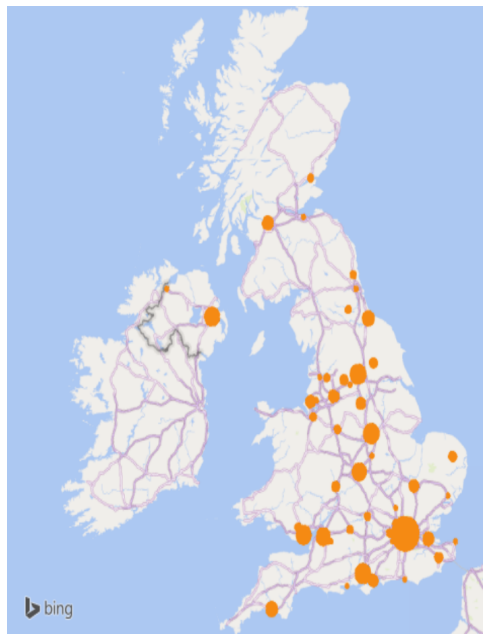

Since the last newsletter was published, we have been joined by:

- Bolton NHS Foundation Trust
- Cambridge University Hospitals NHS Foundation Trust
- King George Hospital (BHR)
- NHS Grampian
- Guy's and St Thomas' NHS Foundation Trust
- Western Health and Social Care Trust
- Royal United Hospital Bath NHS Foundation Trust
- East and North Hertfordshire NHS Trust
- The Royal Wolverhampton NHS Trust
- Royal Brompton & Harefield NHS Foundation Trust (now part of Guy's and St Thomas' NHS Foundation Trust)
- United Lincolnshire Hospitals NHS Trust

We have several Trusts/Boards who are close behind and the following Trusts/Boards will be joining soon:

- University Hospitals Birmingham NHS Foundation Trust
- University College London Hospitals NHS Foundation Trust
- Sandwell and West Birmingham Hospitals NHS Trust
- Northern Lincolnshire and Goole NHS Foundation Trust

SIGNET Recruitment

The Source data form should be left on site for the research team and uploaded to DonorPath, if you're not sure where to leave it, check DAT3936

The donor **must** have both sets of neurological testing completed before randomising

If you have any queries on MACRO, you will need to respond to the query so that the flag turns blue

The Donor ID is the OTDT Donor ID that the SNODs put on the Source Data Form and not the Randomisation number.

If you create empty 'subjects' on MACRO, you can use these next time you need to enter a new donor, instead of creating a new 'subject'

Associate Principle Investigator Scheme Webinar

Registration has now opened for the NIHR Associate Principal Investigator Scheme Webinar taking place on **Thursday 2th July** between **10:00-12:00** via Zoom. The Associate Principal Investigator Scheme aims to develop health and care professionals to become the PI's of the future. This webinar is a fantastic opportunity to help give people the opportunity to take part in clinical research in their day-to-day role.

To sign up or learn more about the event, visit [Eventbrite page linked here](#) or for queries, contact associatepisceme@nhr.ac.uk.

Team Awareness

The ICU team need to be aware of the study so they can reconfirm eligibility and/or prescribe the 80mg Simvastatin if the Specialist Nurse for Organ Donation (SNOD) asks them to. We appreciate how difficult this can be with staff turn over but the SNODs are able to point them in the direction of the **study manual** or **study website**. We will also be sending out some tools to help with this:

A poster - this will have the key information on and can go up in non-patient facing areas of the ICU.

Lanyards and Badges - for the Principal Investigator to use to raise awareness of SIGNET.

Annual Update Training - we're aware some of you may have done your training over Summer 2021, as it has been a while, we will be sending around a one-page infographic to help refresh your training.
