Specialist Nurse CVs and GCPs Not Required

CVs are not required to be stored in the site file for the Specialist Nurses for Organ Donation (SNODs). There are over 250 SNODs who may cross cover different regions and it is logistically challenging to collect all CVs. The SNODs are employed by NHSBT and hold a memorandum of understanding with each site. Any questions regarding employment or contacting the SNODs can be raised with NHSBT through the SIGNET team.

GCP training is not required for the SNODs. The trial team, Sponsor, HRA and MRHA have discussed this and agreed that a proportionate approach is appropriate. The SNODs are highly trained and the SIGNET training covered by NHSBT is commensurate with their role in the trial.
