

**SIGNET Patient Consent Form Sticker (Version 1.1 dated 11.06.2021)**

**Study: Statins for Improving orGaN outcomE in Transplantation (NHSBT Study Ref no: 109)**

REC No: 21/LO/0412

IRAS: 288722

Sponsor Reference: 9691

**Chief Investigators: Professor John Dark and Dr Dan Harvey**

Consent for the SIGNET study and the points covered on this sticker are for research purposes only. I have received a relative information leaflet regarding the SIGNET study (version 1.1 dated 11.06.2021) and had an opportunity to discuss it with a qualified member of staff. I give consent/authorisation to my relative's participation in SIGNET and I give permission for the researchers and individuals from the Sponsor and NHS organisation to access my relative's records.

***I understand that:***

- Participation is voluntary and that I am free to withdraw my relative at any time, without giving any reason, without my relative's medical care or legal rights being affected.
- All information will be anonymised by the allocation of codes and the information will remain confidential and only be used for research.
- Relevant sections of my relative's medical notes and data collected during the trial may be looked at by the trial researchers and individuals from the Sponsor or from the NHS organisation, where it is relevant to my relative taking part in this research.
- My relative's data will be stored on a password protected secure database accessible only by the research team and independent statistician for 5 years following the trial closure.
- Information about my relative's organ donation, which is already provided to NHS Blood and Transplant, will be used for this study.
- Information collected about my relative could also be used to support other research in the future.
