

# Appendices

**Appendix I** provides details of the 1,429 deceased solid organ donors reported in 2022-2023. Details are given for each donating hospital and the hospitals have been grouped by NHS Region and country.

The number of donors by donor country/ NHS Region of residence is given for donors after brain death in **Appendix IIA** and donors after circulatory death in **Appendix IIB**.

The populations used for country / NHS Region per million population are given in **Appendix III** these populations are mid-2021 estimates based on ONS 2021 Census figures.

**Appendix IV** shows the import and export of organs to and from the UK in the last three financial years. **Appendix IVA** shows the number and type of transplants in the UK into non-UK residents. **Appendix IVB** and **Appendix IVC** show the number and type of transplants resulting from the import to and export from the UK, respectively. When organs are donated from deceased donors and cannot be used in that country, the organs are offered for use in other countries. This is usually because there is no suitable recipient because of blood group or size. The current EU Directive ensures that all organs that are imported into the UK are evaluated to the same high standards as in the UK. The UK has special arrangements with the Republic of Ireland so that some patients from Ireland will come to the UK for the transplant procedure where units in the UK have particular expertise. For those with fulminant hepatic failure, the UK and Ireland will also share livers. International sharing of organs represents a very small proportion of the UK transplant activity and is set up to ensure that all donated organs are used whenever appropriate.

**Appendix I Deceased solid organ donors and donated organs in the UK, 1 April 2022 - 31 March 2023 (2021-2022), by donating hospital**
