

Betsi Cadwaladr University Health Board

Donor outcomes

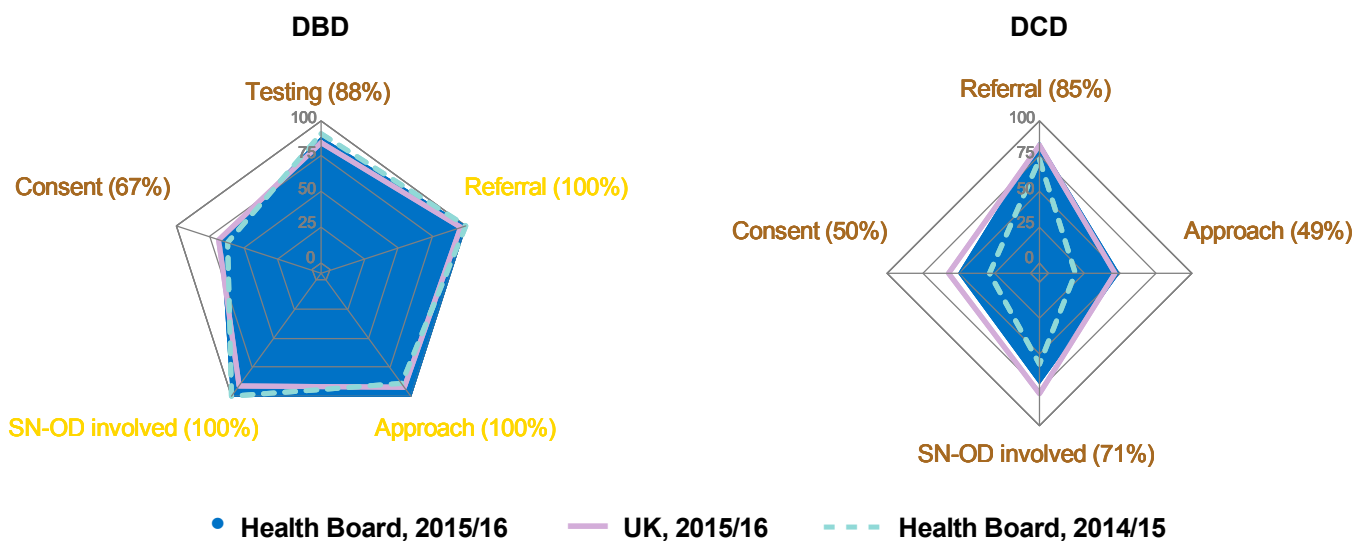

Between 1 April 2015 and 31 March 2016, your Health Board had 14 deceased solid organ donors, resulting in 25 patients receiving a transplant. Further details are provided in the table and chart below. If you would like further information, please contact your local Specialist Nurse - Organ Donation (SN-OD).

Radar charts of key rates, 1 April 2015 to 31 March 2016

The blue shaded area represents your Health Board's rates for 2015/16. The latest UK rates and your Health Board's rates for the equivalent period in the previous year are superimposed for comparison. The fuller the blue shaded area the better. The colour of the rate label on each of the radar charts indicates the Health Board performance as shown in the appropriate funnel plot (included in the detailed report) using the gold, silver, bronze, amber, and red (GoSBAR) scheme. Additionally, the funnel plots in the detailed report can be used to identify the maximum rates currently being achieved by Health Boards with similar donor potential.

Key numbers and rates

There are nine measures on the Potential Donor Audit (PDA) which are most likely to affect the conversion of potential donors into actual donors. A comparison against funnel plot boundaries has been applied by highlighting the key rates for your Health Board as gold, silver, bronze, amber, or red. Funnel plots can be found in the detailed report. Between 1 April 2015 and 31 March 2016, your Health Board met a statistically acceptable level in all of these measures. Of the 8 potential DBD donors with suspected neurological death, 4 proceeded to donation and 4 did not proceed. Of the 49 eligible DCD donors, 9 proceeded to donation and 40 did not proceed. Further details are provided below. Caution should be applied when interpreting percentages based on small numbers.

¹ DBD - A patient with suspected neurological death DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours ² DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation										

Note that from 1 April 2015 to 31 March 2016 there was one eligible DBD donor whose family consented to donation who is not included in this section because they were either over 80 years of age or did not die in a unit participating in the PDA.
