**Radar charts of key rates, 1 April 2015 to 31 March 2016**

The blue shaded area represents your Trust's rates for 2015/16. The latest UK rates and your Trust's rates for the equivalent period in the previous year are superimposed for comparison. The fuller the blue shaded area the better. The colour of the rate label on each of the radar charts indicates the Trust performance as shown in the appropriate funnel plot (included in the detailed report) using the gold, silver, bronze, amber, and red (GoSBAR) scheme. Additionally, the funnel plots in the detailed report can be used to identify the maximum rates currently being achieved by Trusts with similar donor potential.

## Key numbers and rates

There are nine measures on the Potential Donor Audit (PDA) which are most likely to affect the conversion of potential donors into actual donors. A comparison against funnel plot boundaries has been applied by highlighting the key rates for your Trust as gold, silver, bronze, amber, or red. Funnel plots can be found in the detailed report. Between 1 April 2015 and 31 March 2016, your Trust met a statistically acceptable level in 8 of these measures. Of the 26 potential DBD donors with suspected neurological death, 11 proceeded to donation and 15 did not proceed. Of the 78 eligible DCD donors, 7 proceeded to donation and 71 did not proceed. Further details are provided below. Caution should be applied when interpreting percentages based on small numbers.

Note that from 1 April 2015 to 31 March 2016 there was 1 eligible DBD donor and 1 eligible DCD donor whose family consented to donation who are not included in this section because they were either over 80 years of age or did not die in a unit participating in the PDA.
