

# The Princess Alexandra Hospital NHS Trust

# Organ Donation and Transplantation 2030: Meeting the Need

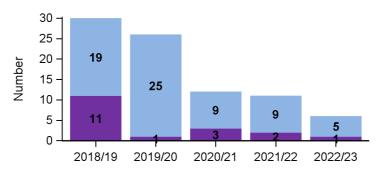

In 2022/23, from 2 consented donors the Trust facilitated 2 actual solid organ donors resulting in 7 patients receiving a life-saving or life-changing transplant. Data obtained from the UK Transplant Registry.

# Best quality of care in organ donation

# Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

Aim: There should be no purple on the chart

Patients not referred Patients referred

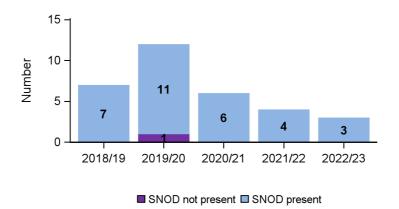

The Trust referred 5 potential organ donors during 2022/23. There was 1 occasion where a potential organ donor was not referred.

# Presence of Specialist Nurse for Organ Donation

# Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

#### Aim: There should be no purple on the chart

A SNOD was present for 3 organ donation discussions with families during 2022/23. There were no occasions where a SNOD was not present.

# Why it matters

• If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.

- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

	East Of England*	UK	
1 April 2022 - 31 March 2023			
Deceased donors	138	1,429	
Transplants from deceased donors	338	3,589	
Deaths on the transplant list	25	441	
As at 31 March 2023			
Active transplant list	437	6,959	
Number of NHS ODR opt-in registrations (% registered)**	2,717,435 (45%)	28,567,574 (44%)	

# Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison. Data obtained from the Potential Donor Audit (PDA).

	DBD		DCD		Deceased donors	
	Trust	UK	Trust	UK	Trust	UK
Patients meeting organ donation referral criteria <sup>1</sup>	3	1980	3	5307	6	6910
Referred to Organ Donation Service	3	1965	2	4886	5	6482
Referral rate %		99%		92%		94%
Neurological death tested	3	1556				
Testing rate %		79%				
Eligible donors <sup>2</sup>	3	1439	3	3467	6	4906
Family approached	2	1244	1	1691	3	2935
Family approached and SNOD present	2	1190	1	1526	3	2716
% of approaches where SNOD present		96%		90%		93%

- Other*	0	86	0	74	0	160
- Other* %		60%		38%		47%
Actual donors (PDA data)	2	783	0	636	2	1419
% of consented donors that became actual donors		93%		66%		79%

<sup>1</sup> DBD - A patient with suspected neurological death

DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

<sup>2</sup> DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation

\* Includes patients where nation specific deemed criteria are not met and the patient has not expressed a donation decision in accordance with relevant legislation

Note that a patient that meets both the referral criteria for DBD and DCD organ donation is featured in both the DBD and DCD data but will only be counted once in the deceased donors total
