

A thick, wavy purple line that curves across the top of the page.

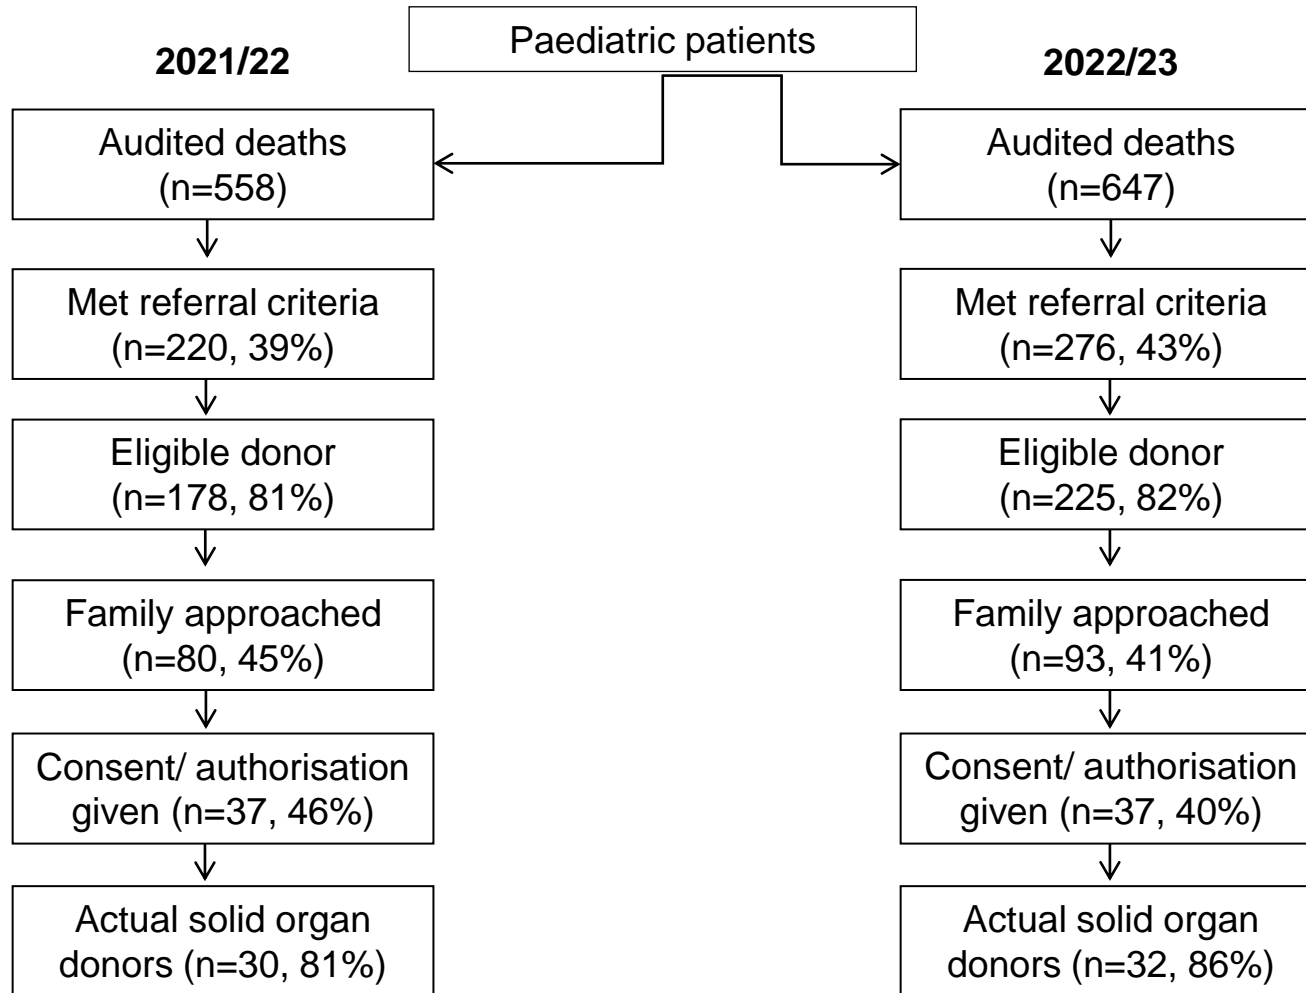

# Paediatric patients who died in a PICU

2022/23

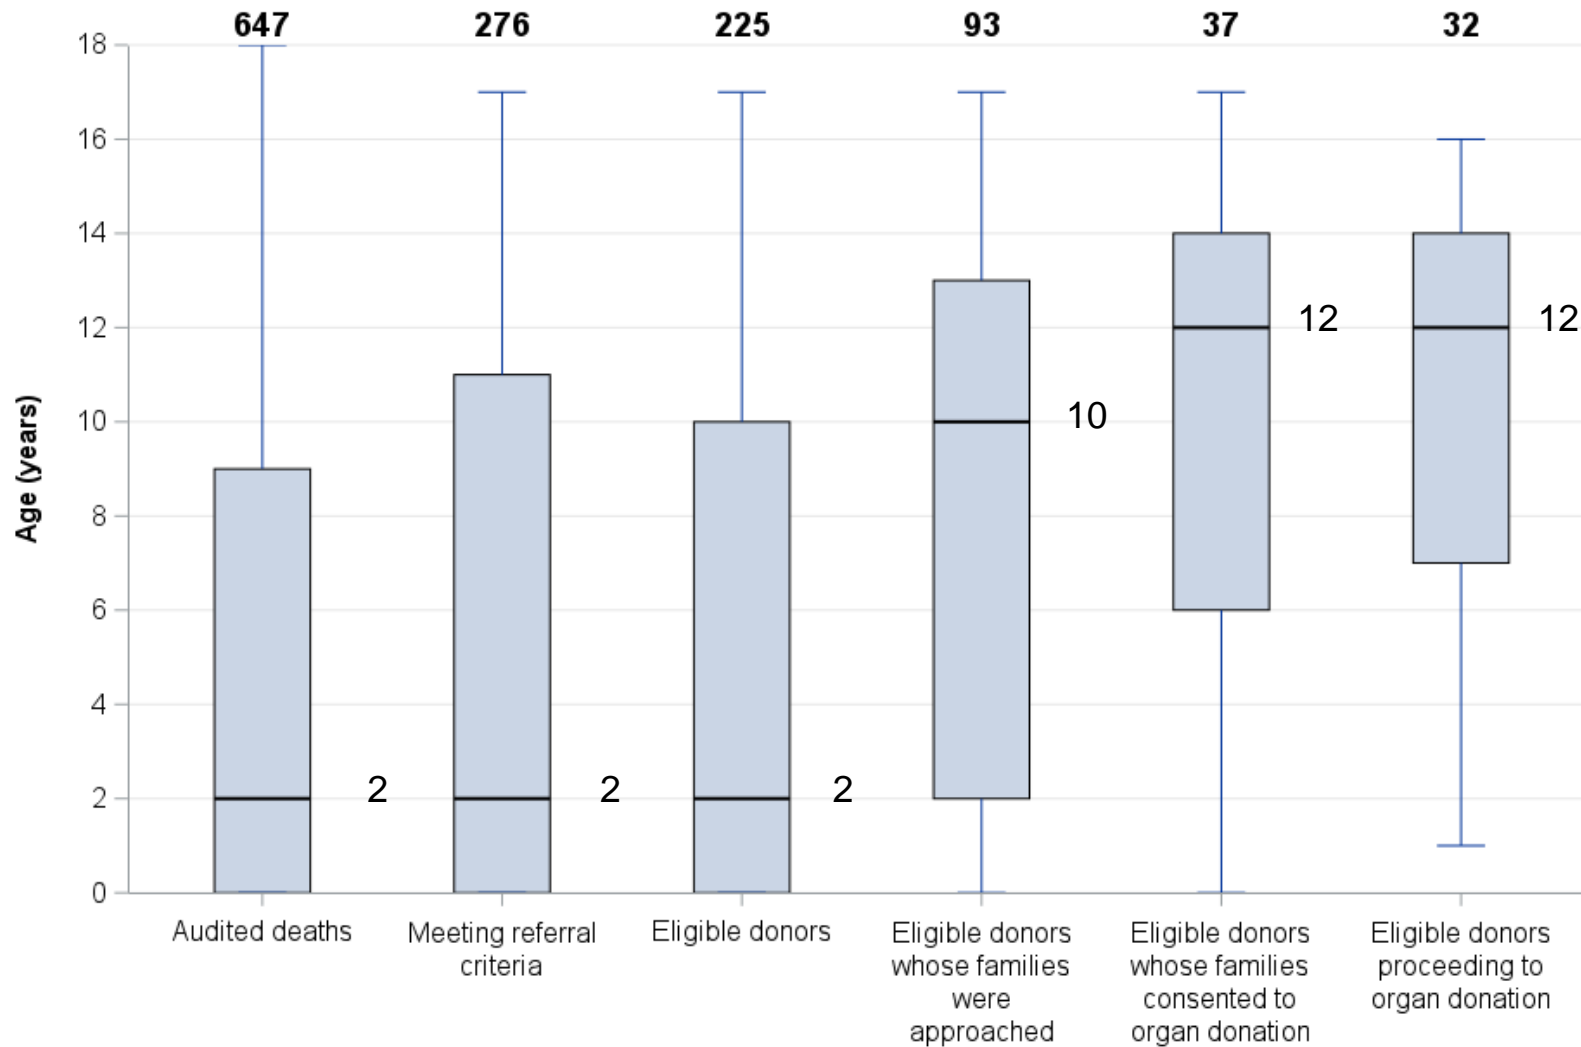

**Yes I donate**  
ORGAN DONATION

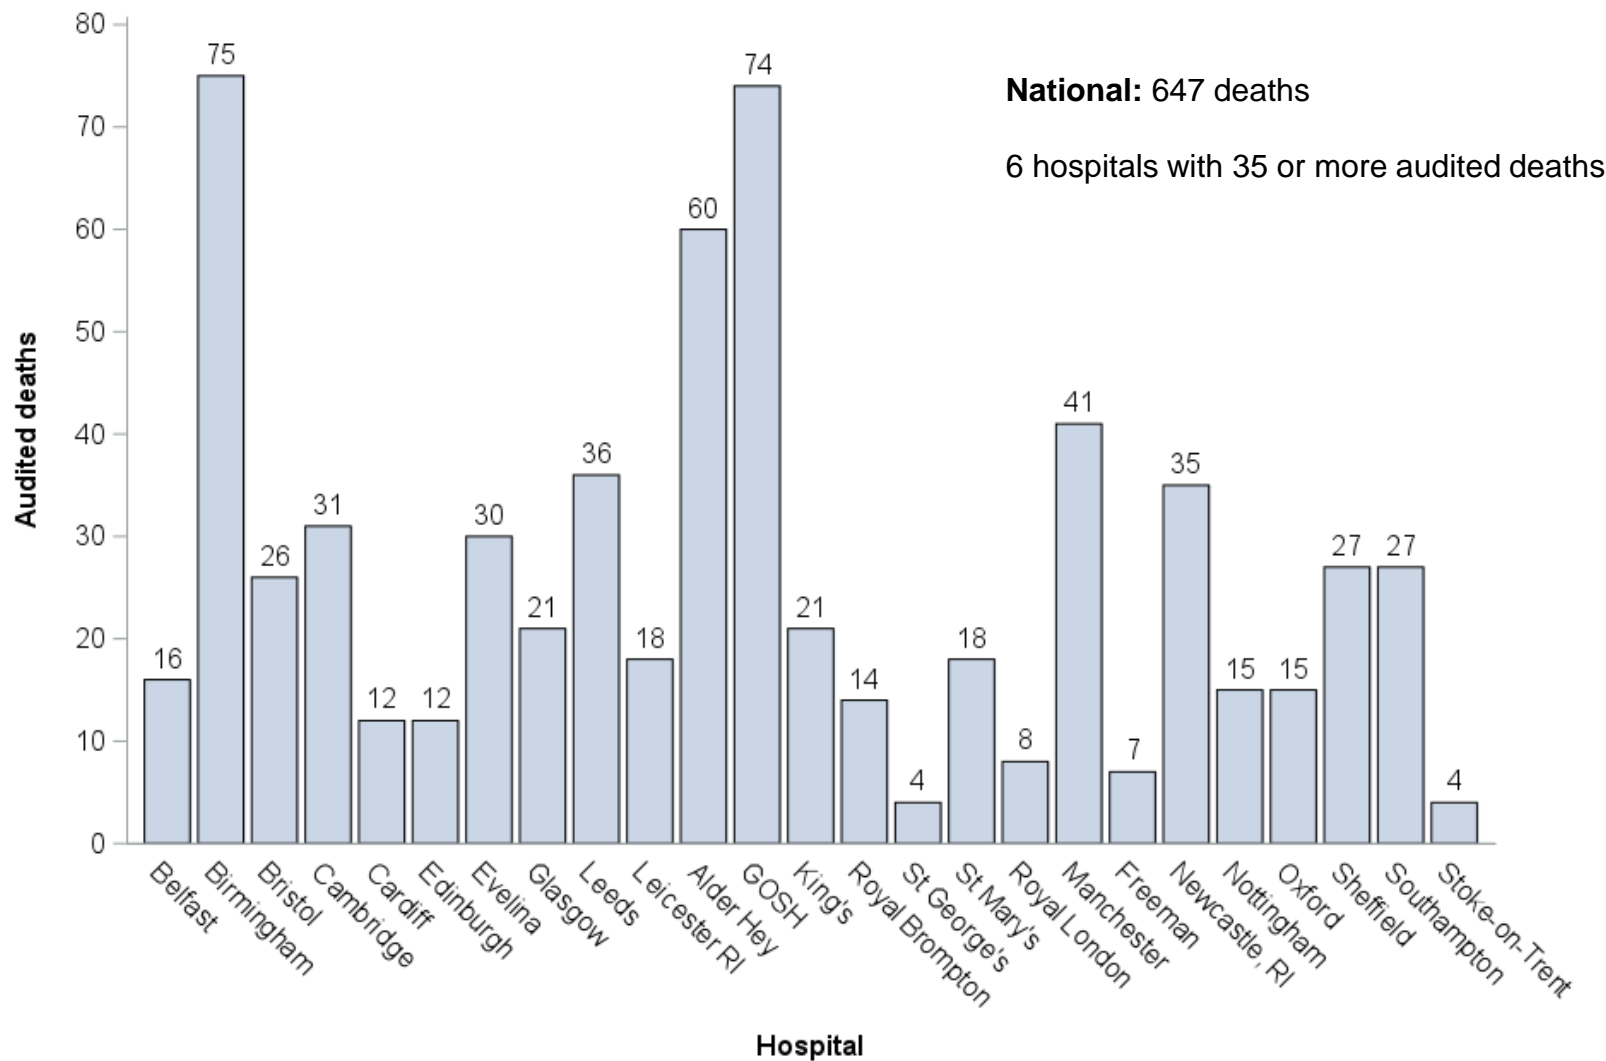

# Flow of paediatric patients through the donation pathway (PDA data)

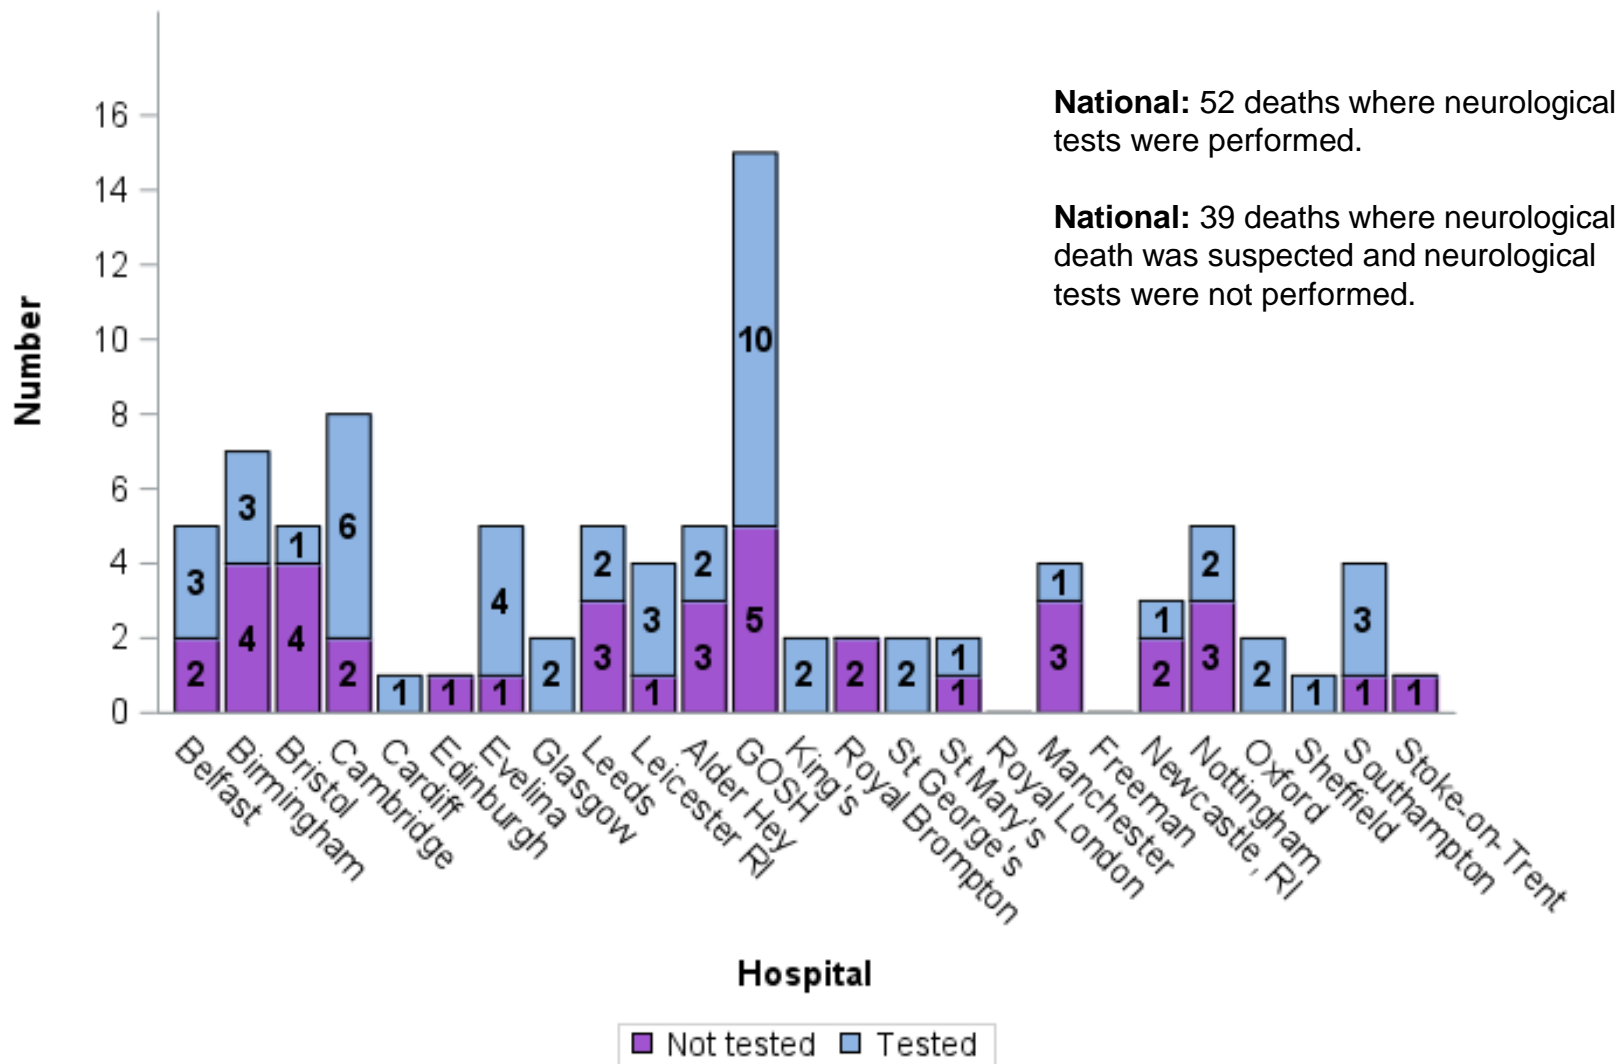

# Age distribution, April 2022 – March 2023

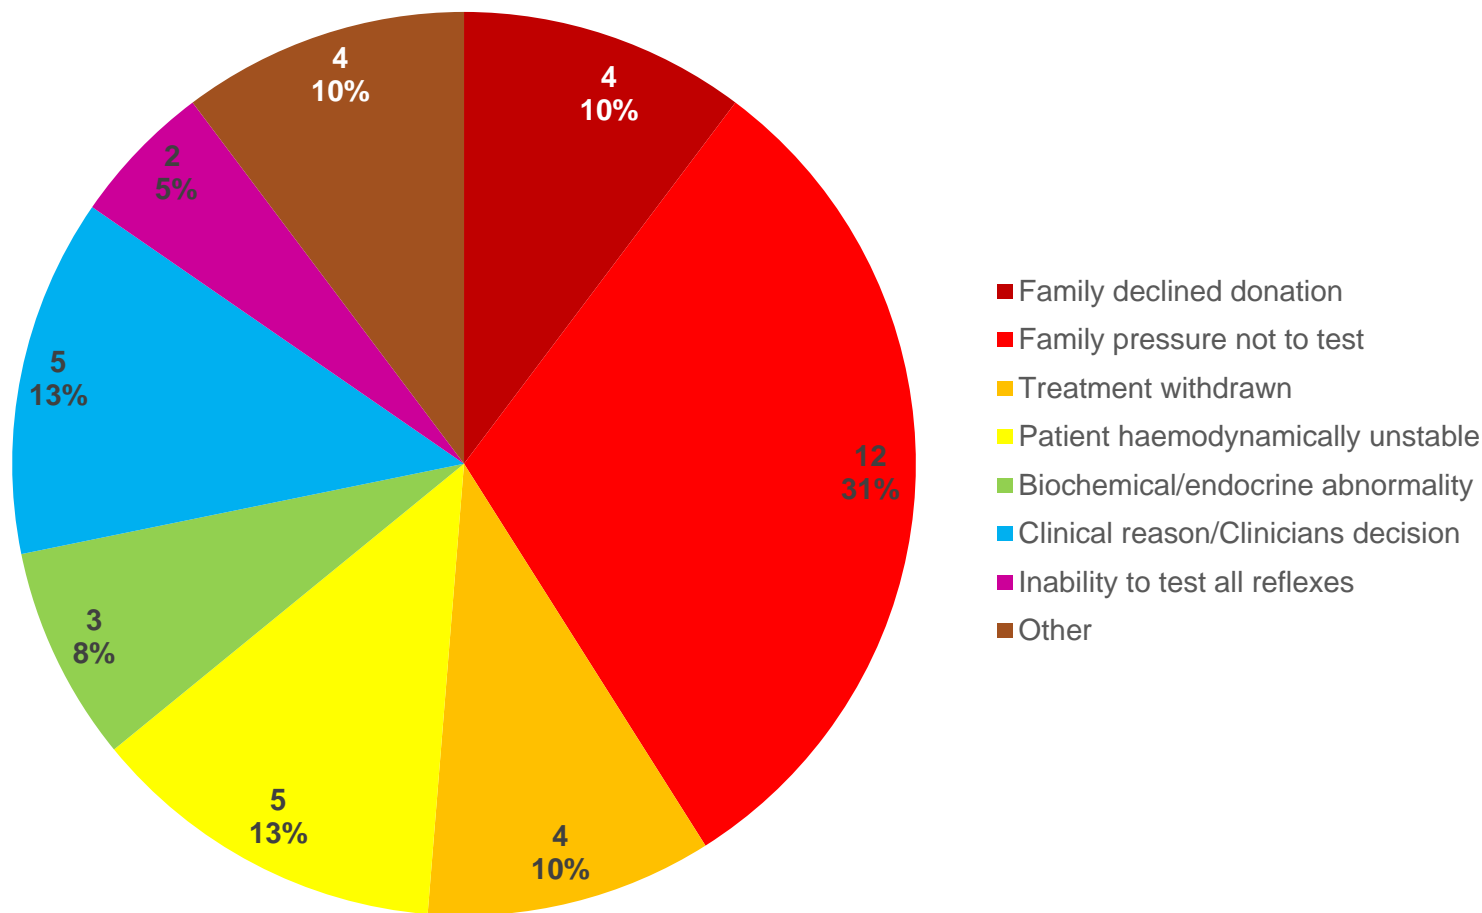

# Audited deaths by hospital, April 2022 – March 2023

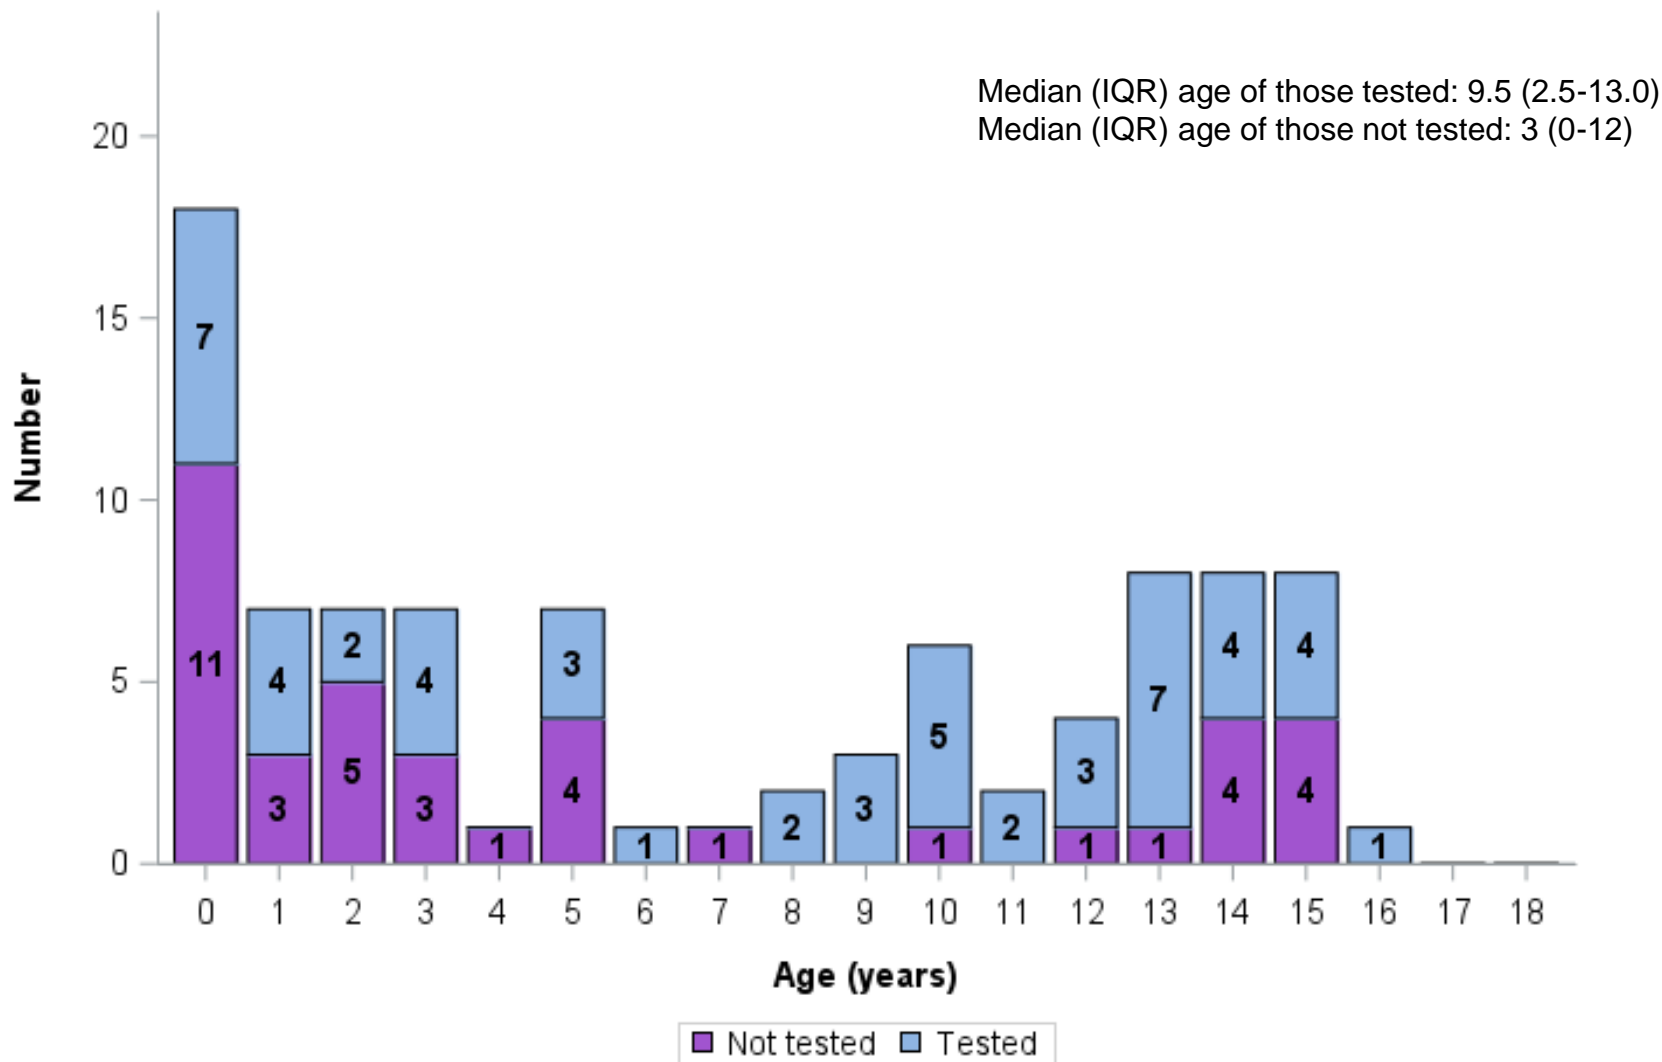

# Number of neurological death tested/not tested patients by hospital, April 2022 – March 2023

# Reason why neurological death tests were not performed, April 2022 – March 2023

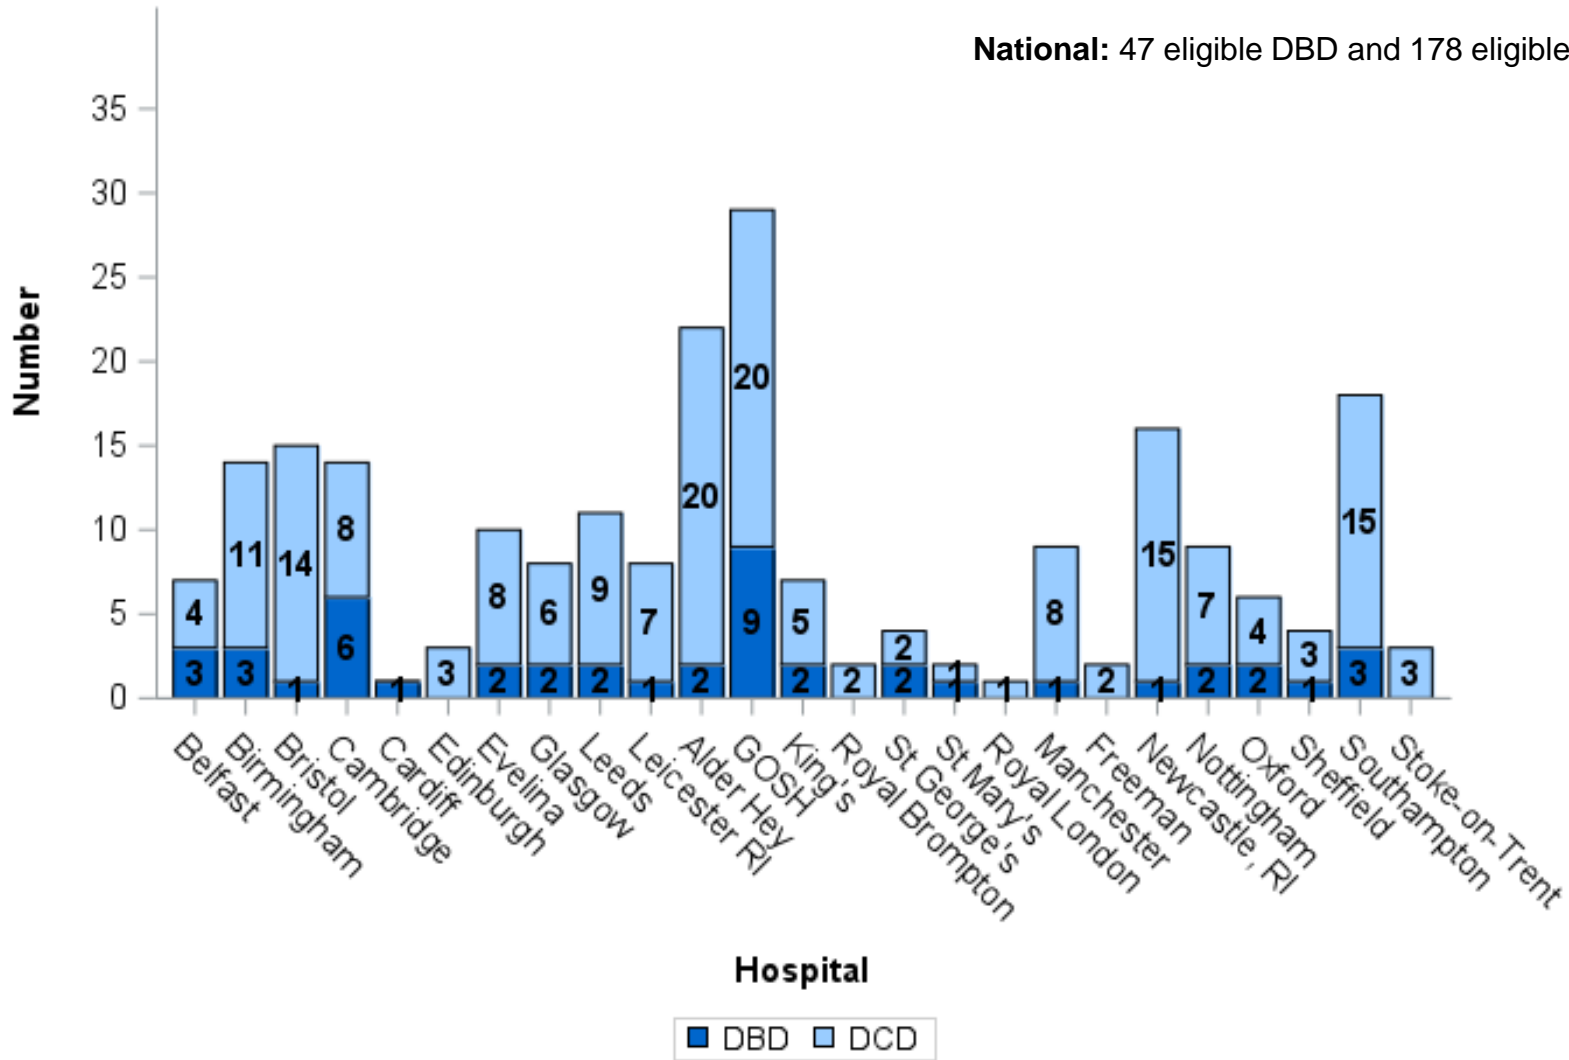

# Neurological death tests performed by age, April 2022 – March 2023

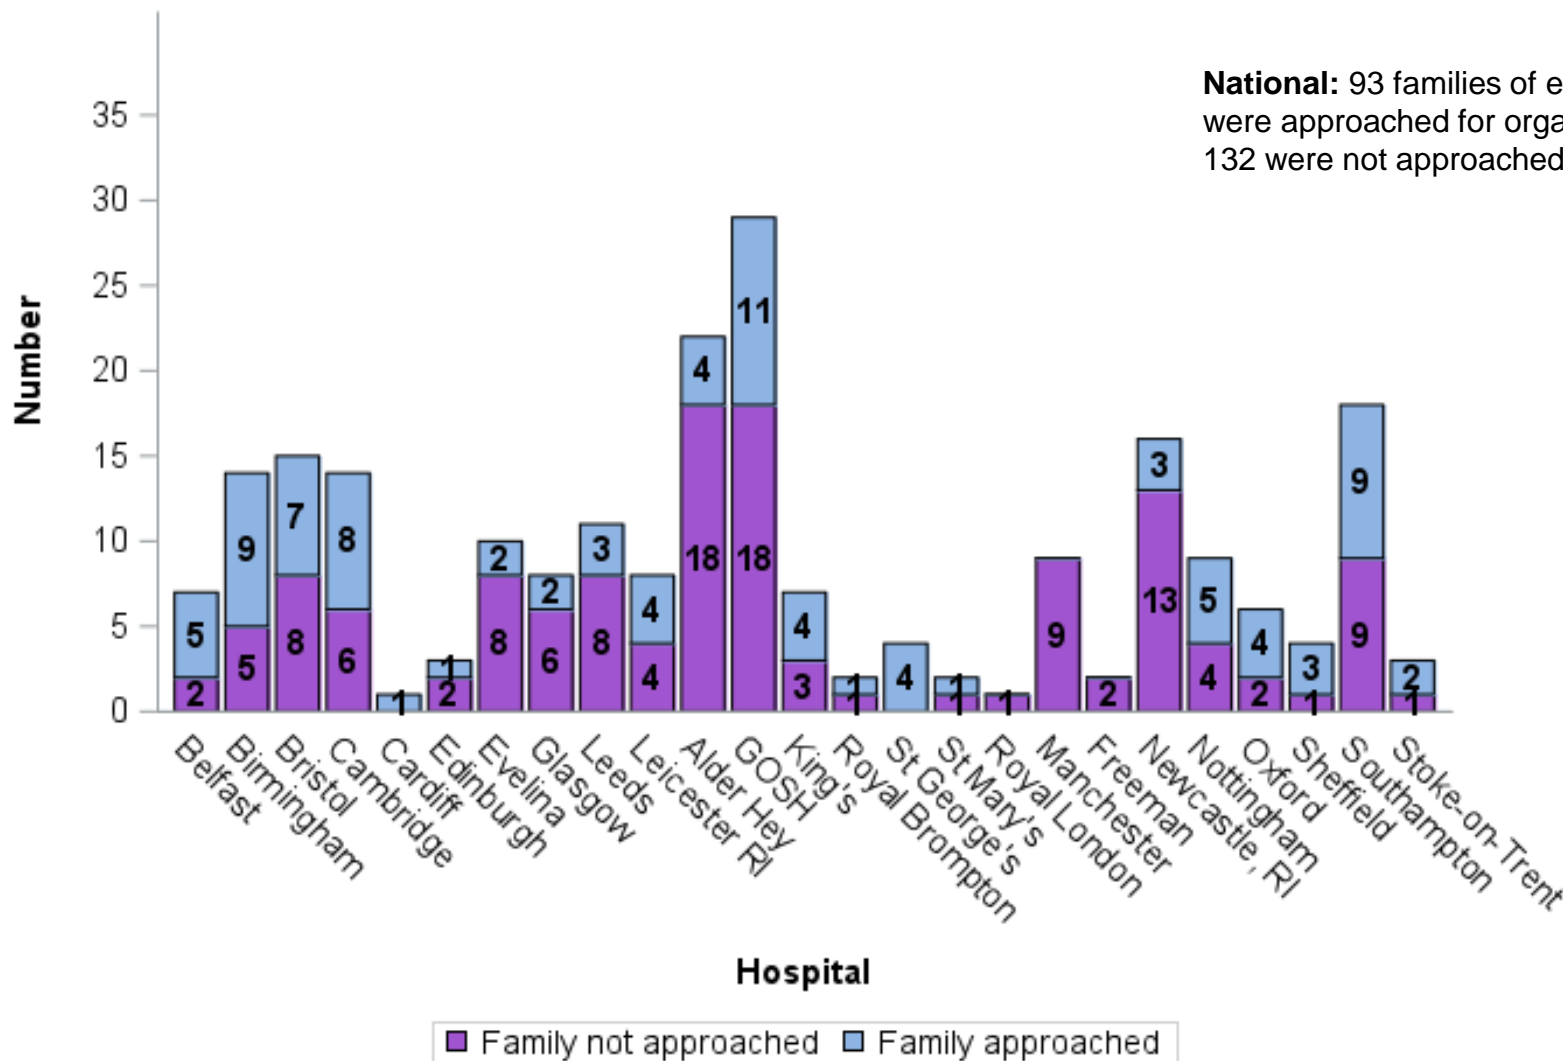

# Eligible donors by hospital, April 2022 – March 2023

National: 47 eligible DBD and 178 eligible DCD donors

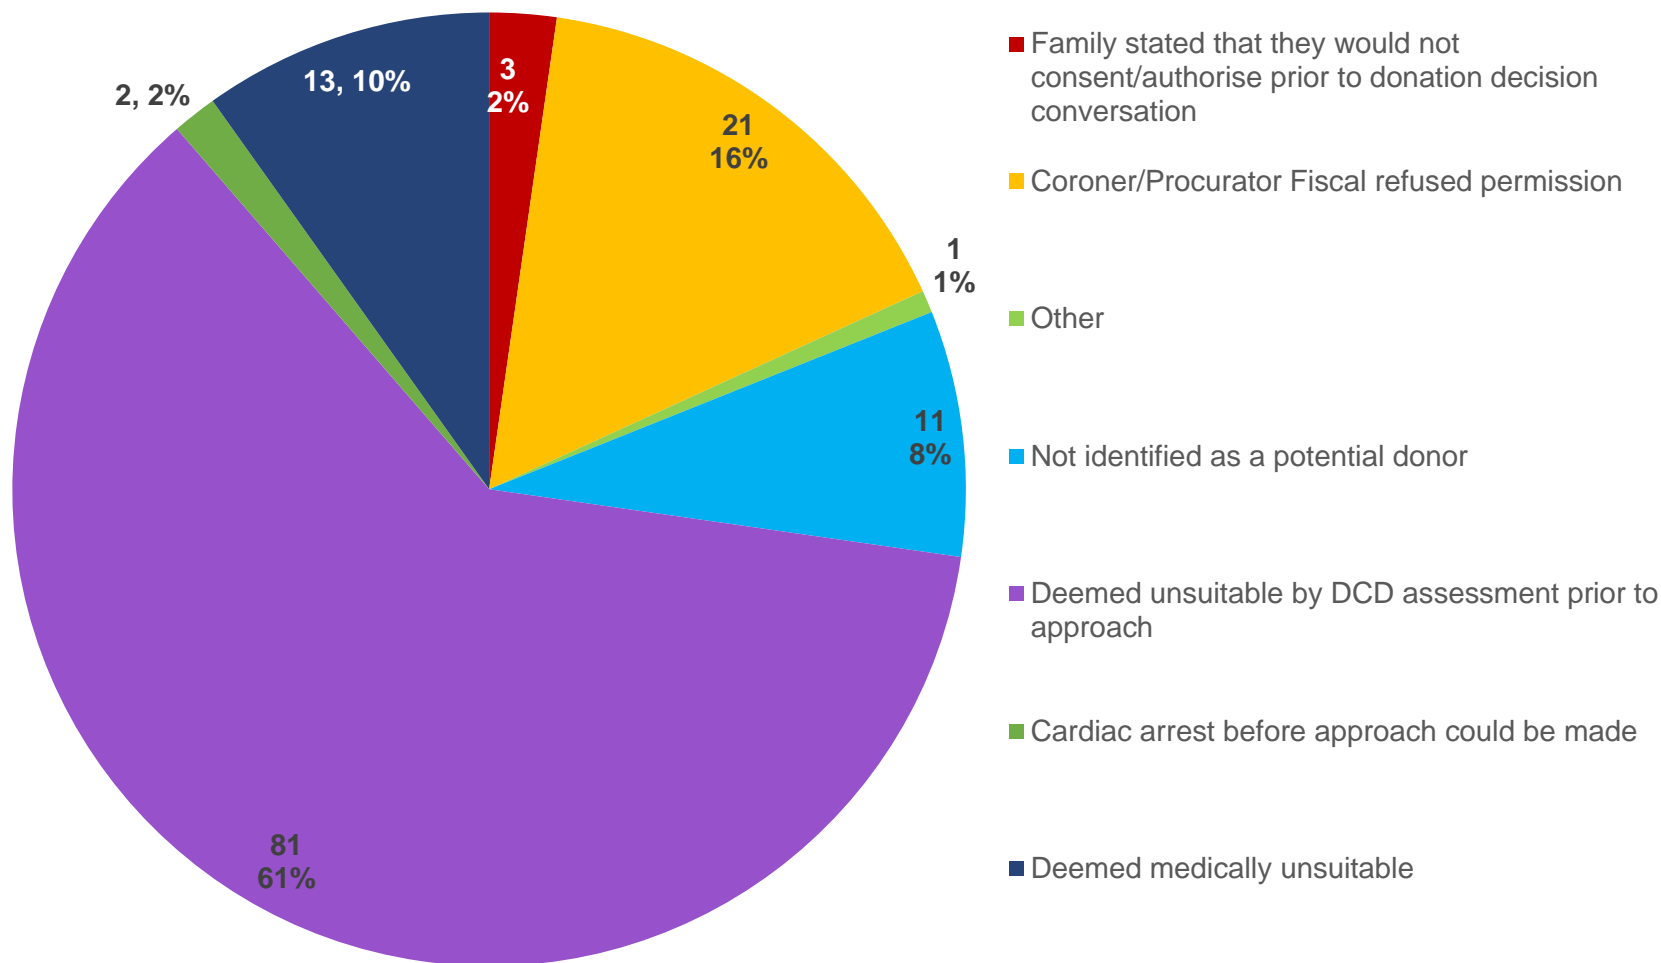

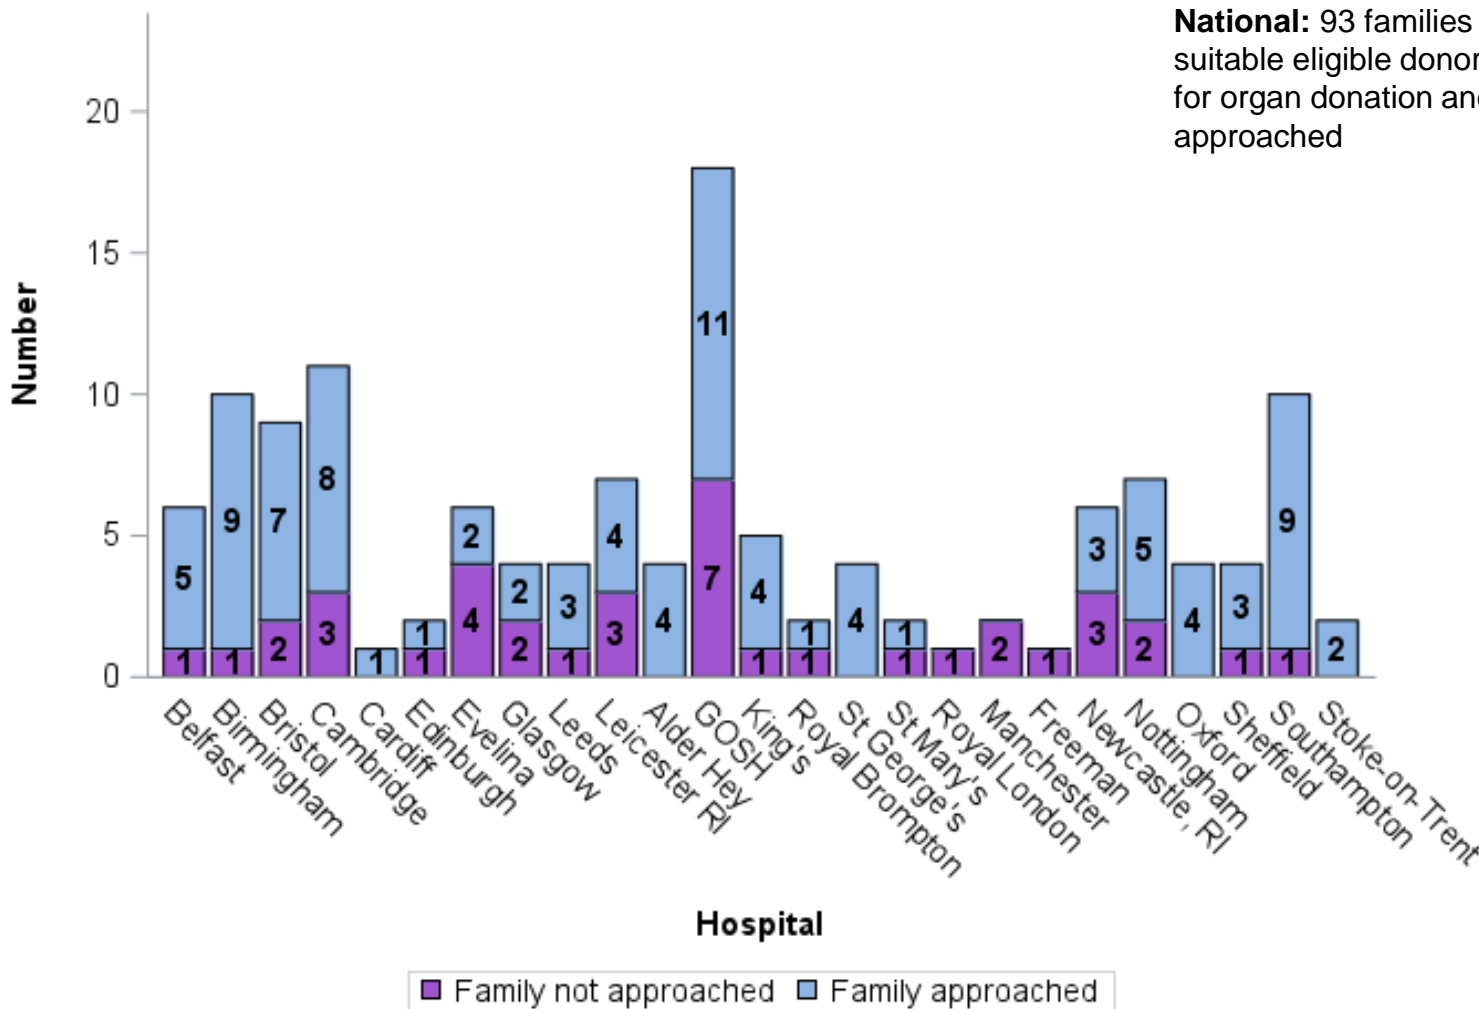

# Eligible donors by hospital and whether the family were approached, April 2022 – March 2023

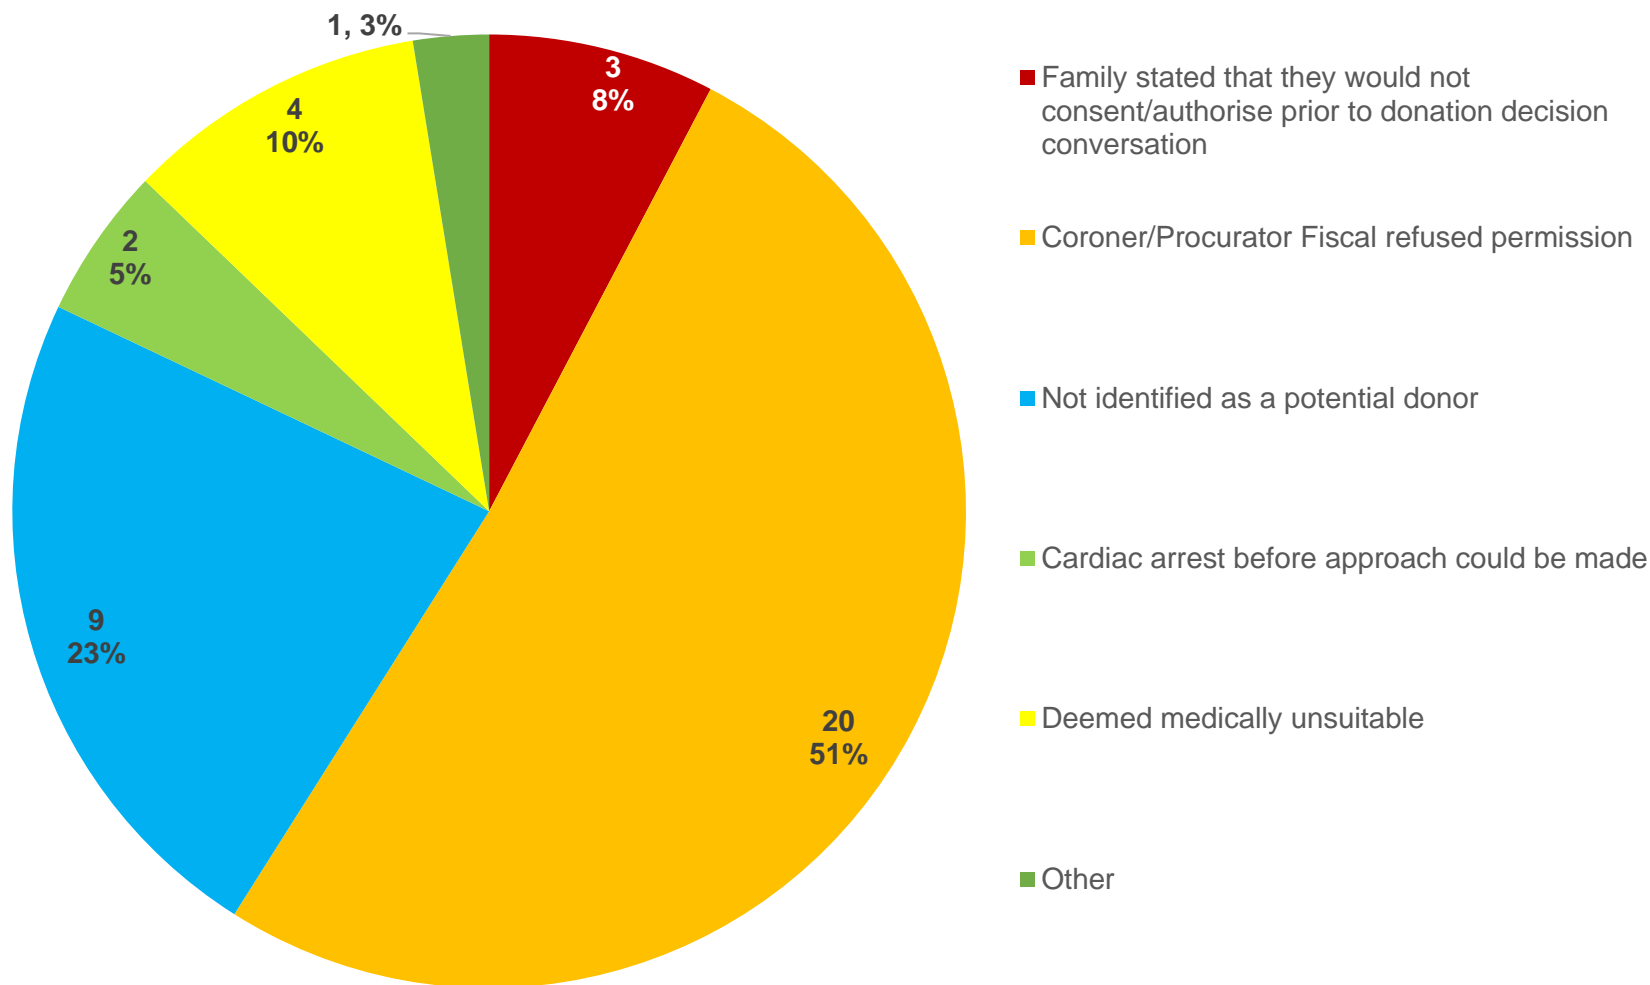

# Reason families of eligible donors were not approached, April 2022 – March 2023

# Medically suitable eligible donors by hospital and whether the family were approached, April 2022 – March 2023

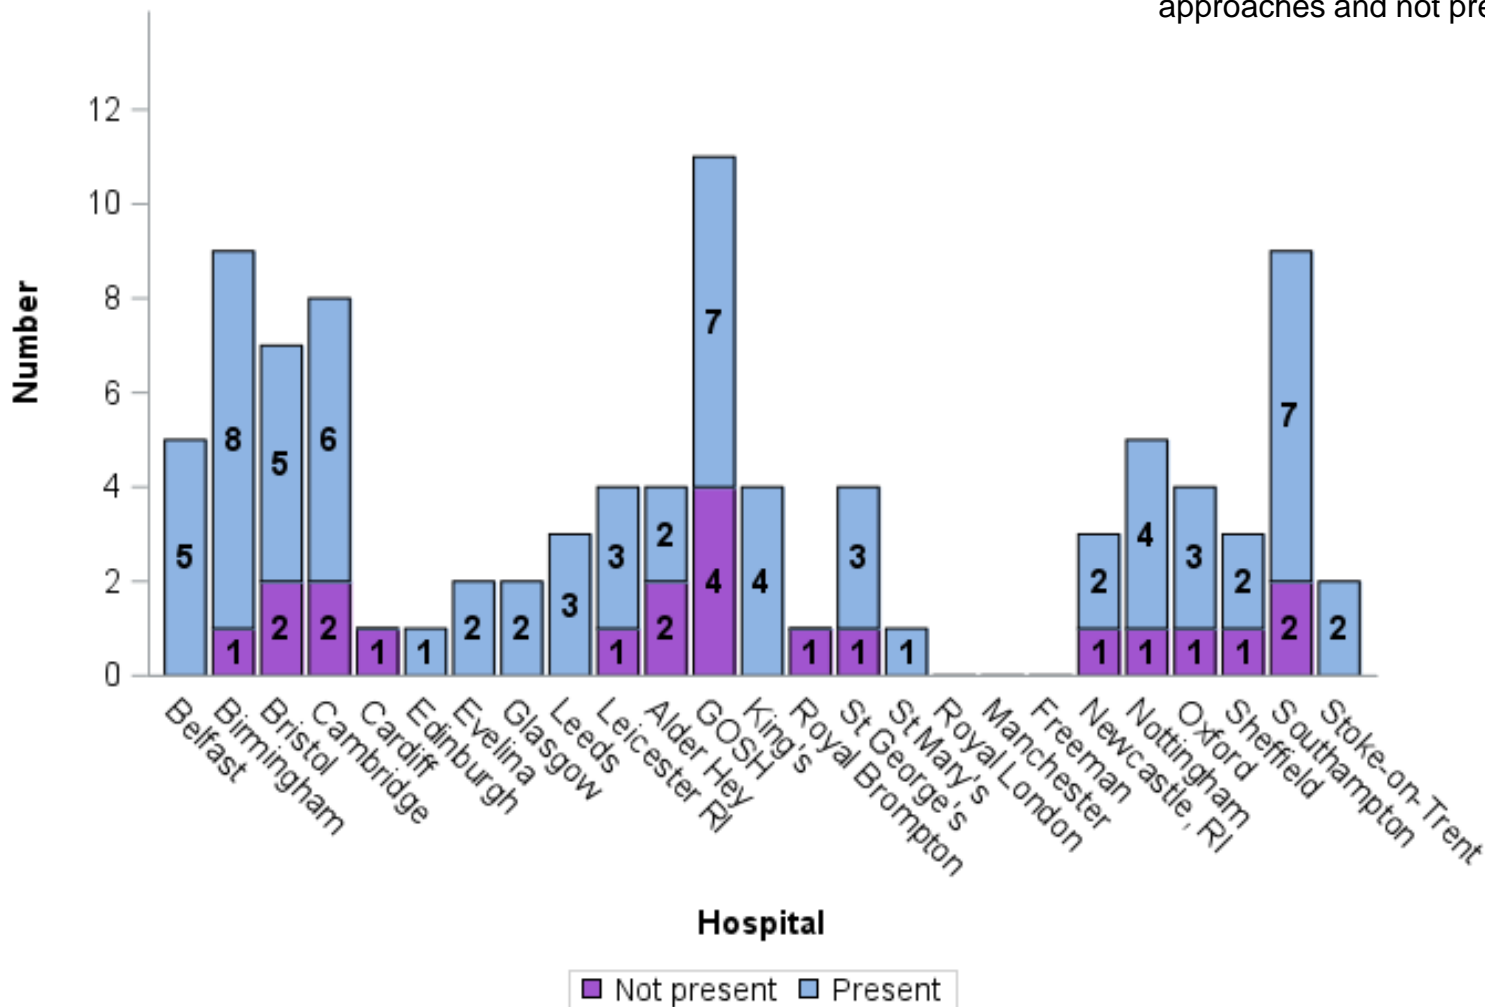

# Reason families of medically suitable eligible donors were not approached, April 2022 – March 2023

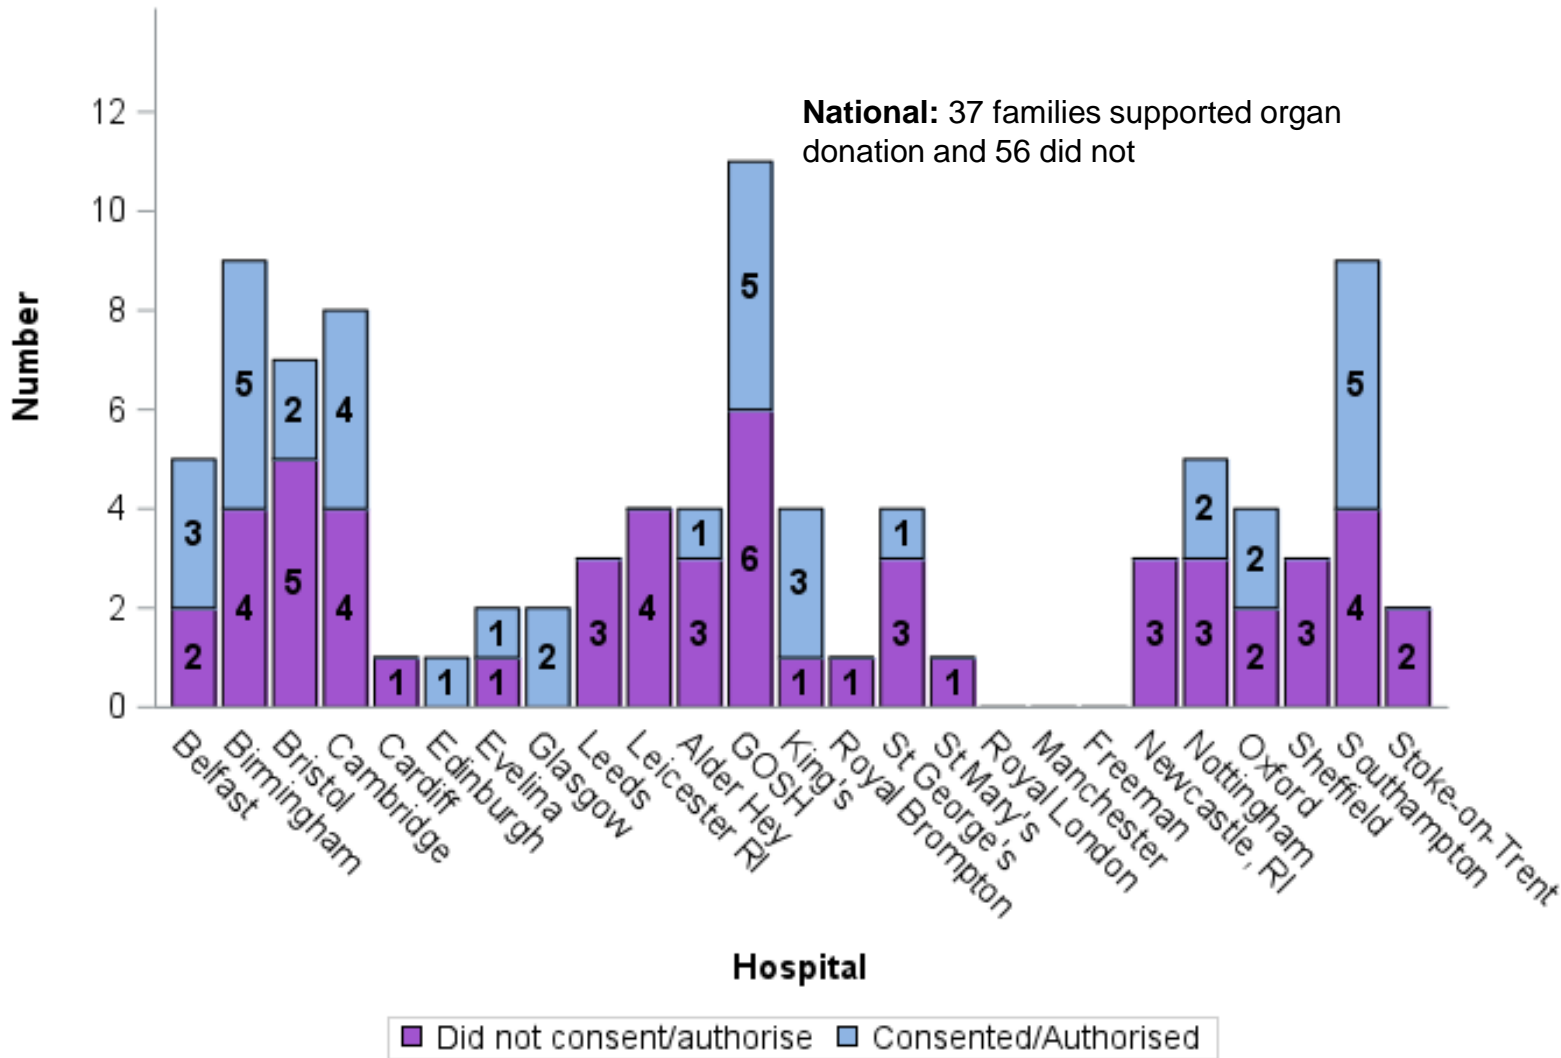

# Number of approaches where a SNOD was present/not present by hospital, April 2022 – March 2023

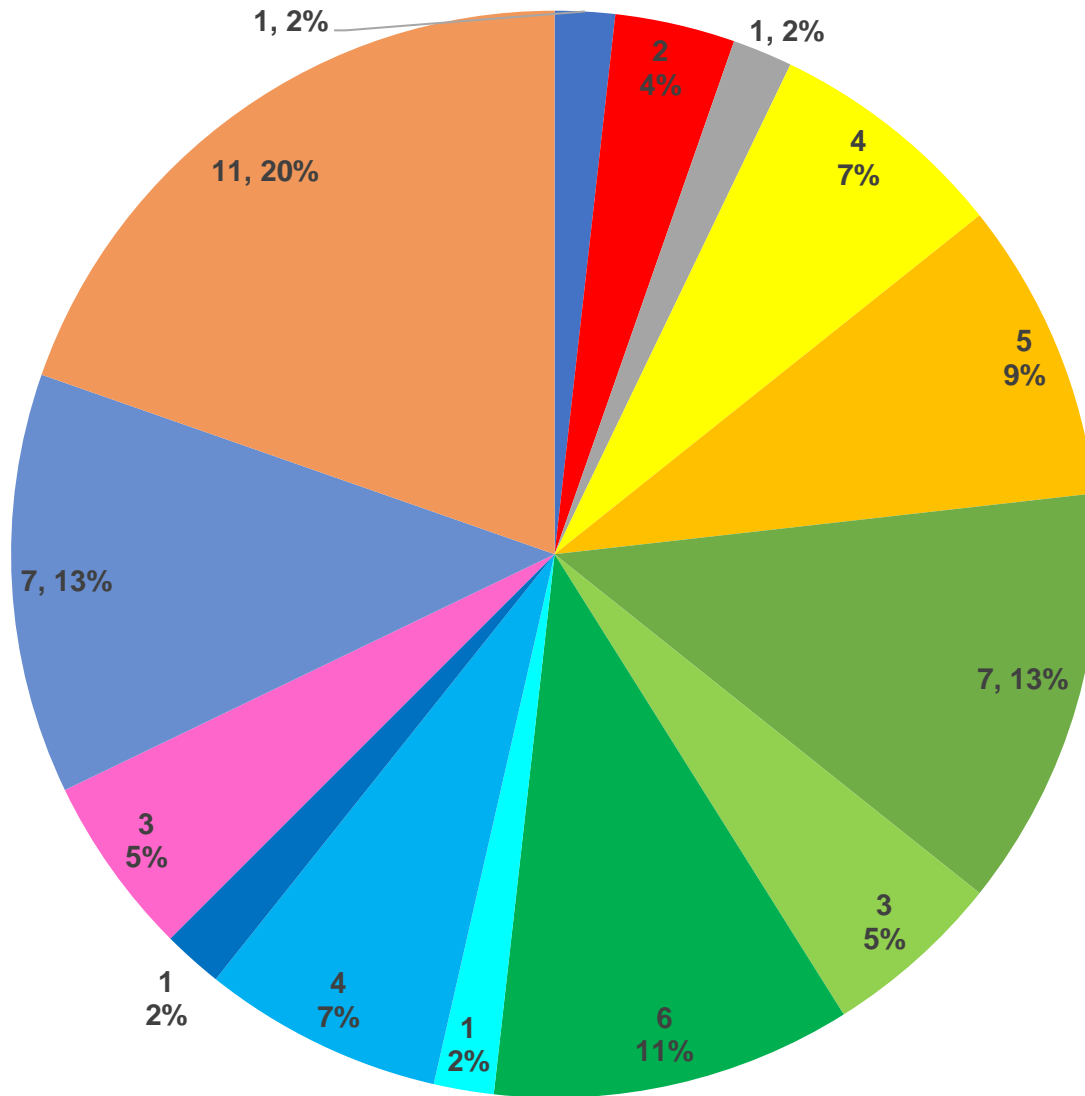

**National:** A SNOD was present in 72 approaches and not present in 21

# Number of families consented/authorised organ donation by hospital, April 2022 – March 2023

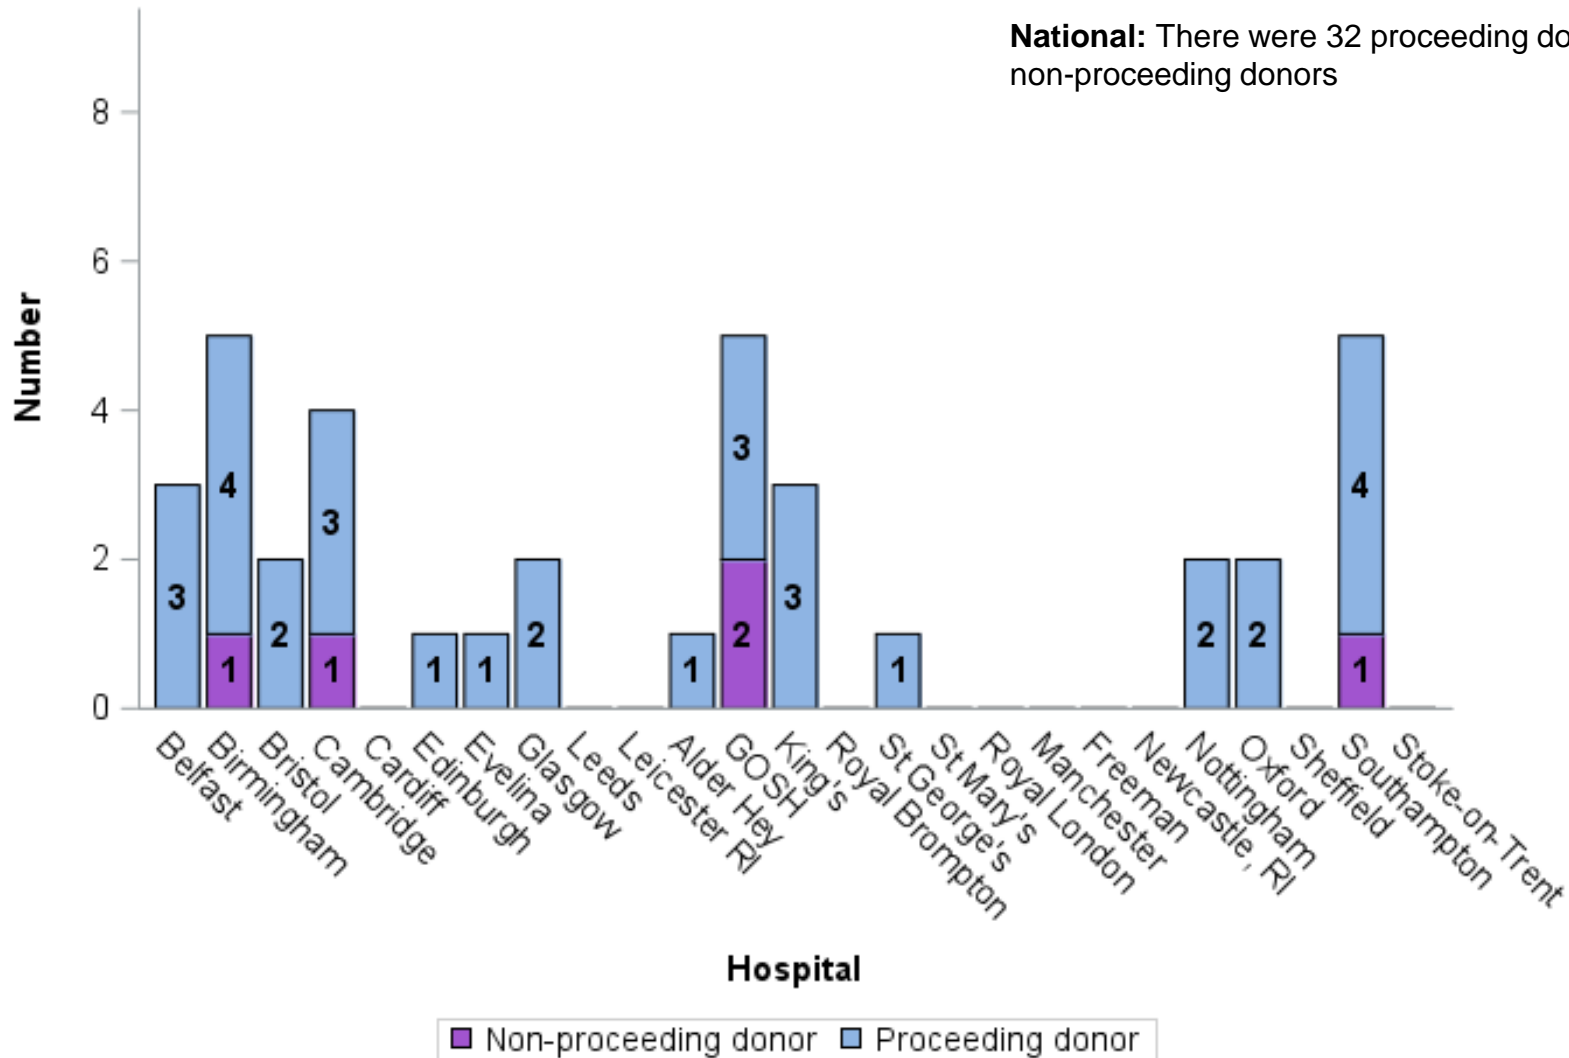

# Reason families of eligible donors did not support organ donation, April 2022 – March 2023

- Patient had registered a decision to Opt Out
- Patient had previously expressed a wish not to donate
- Family were not sure whether the patient would have agreed to donation
- Family did not believe in donation
- Family felt it was against their religious/cultural beliefs
- Family felt the patient had suffered enough
- Family did not want surgery to the body
- Family wanted to stay with the patient after death
- Family had difficulty understanding/accepting neurological testing
- Family felt the length of time for donation process was too long
- Family believe patient's treatment may have been limited to facilitate organ donation
- Family felt the body needs to be buried whole (unrelated to religious or cultural reasons)
- Strong refusal - probing not appropriate
- Other

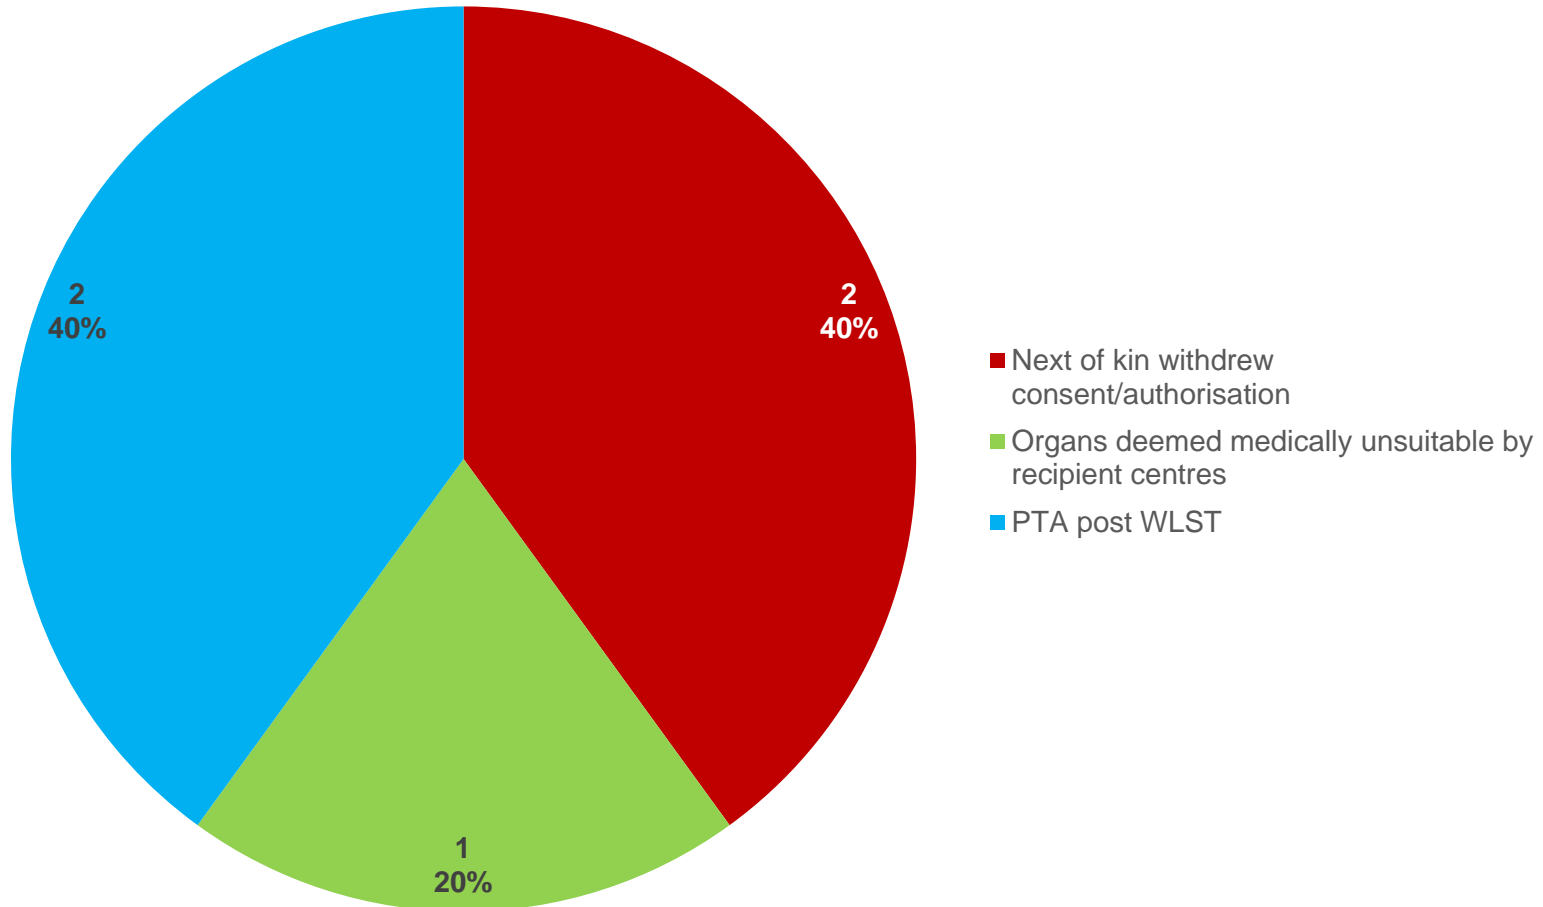

# Number of proceeding/non-proceeding donors by hospital, April 2022 – March 2023

**National:** There were 32 proceeding donors and 5 non-proceeding donors

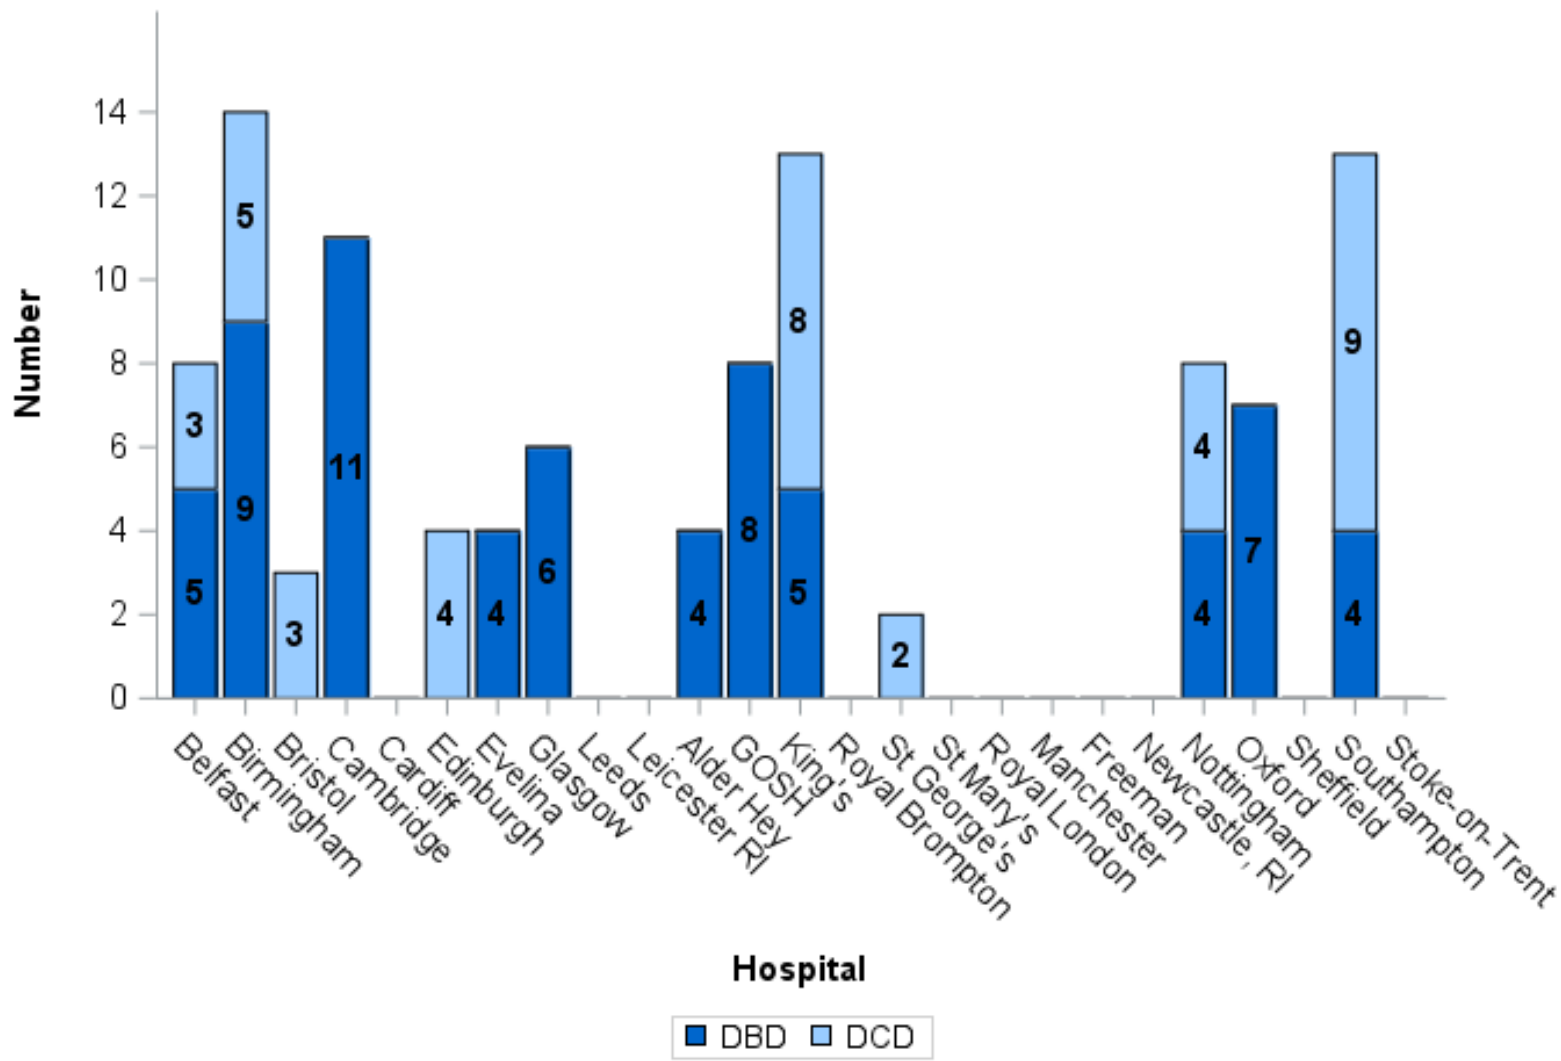

# Reason eligible donors whose families consented/authorised organ donation did not proceed to organ donation, April 2022 – March 2023

# Transplants from proceeding donors by hospital, April 2022 – March 2023

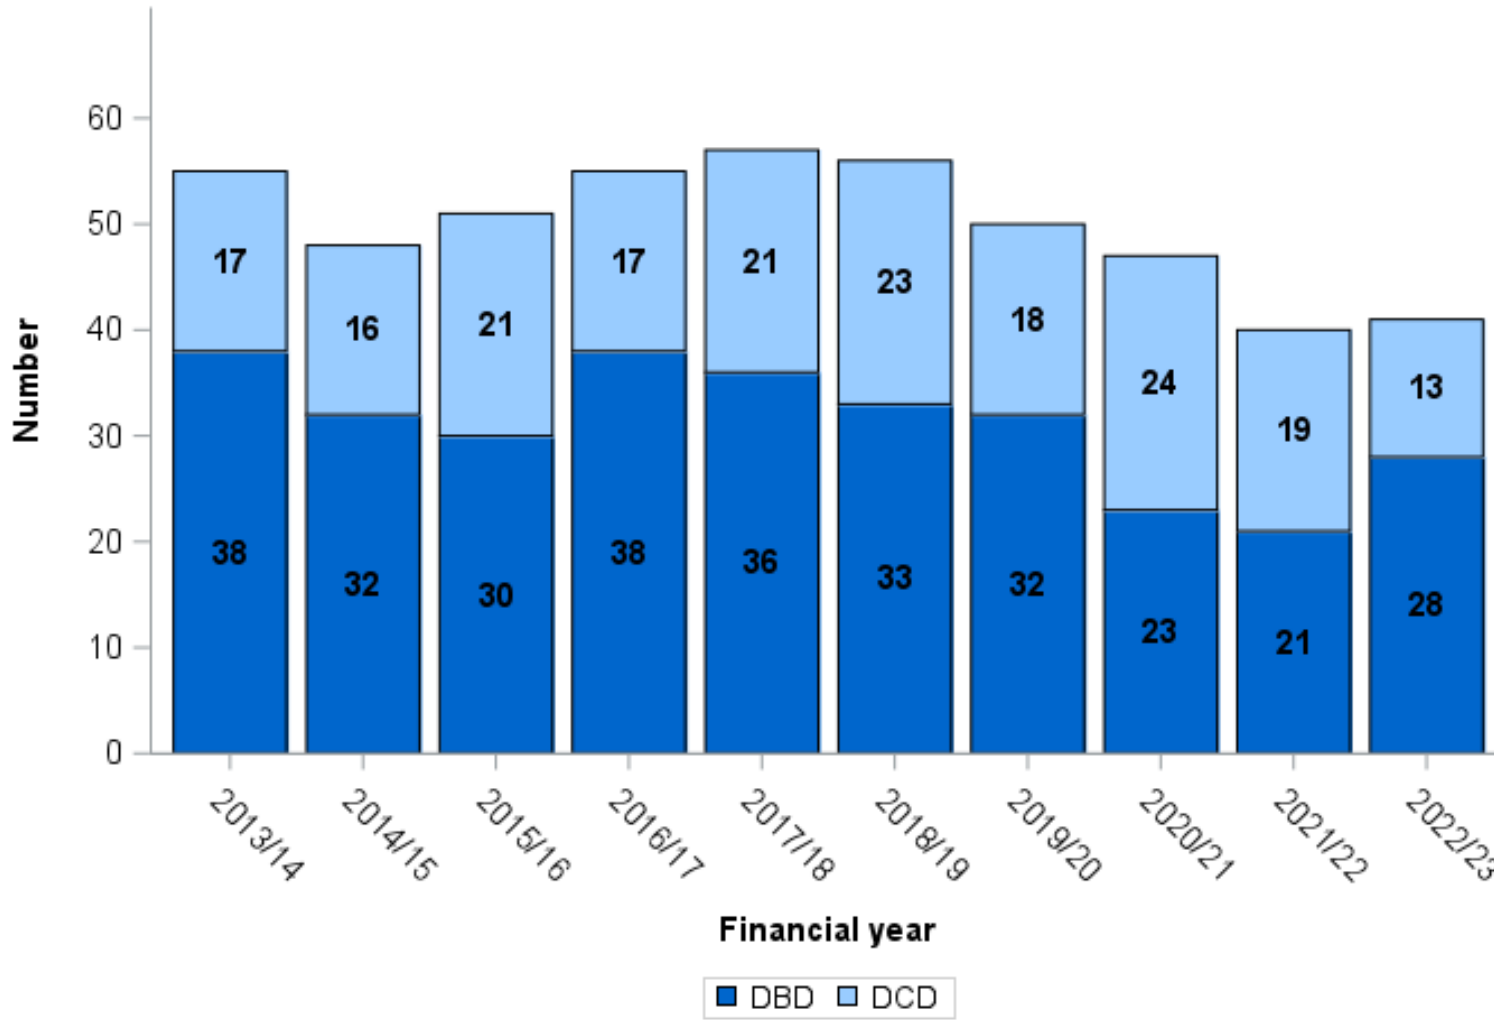

# **Deceased paediatric donors (aged under 18 years)**

**2013/14 – 2022/23**

A decorative wavy line in shades of purple and magenta curves across the bottom of the slide.

# Deceased paediatric donors (<18 years) by donor type, April 2013 – March 2023

# Deceased paediatric donors (2 years and under) by donor type, April 2013 – March 2023
