SHARING OF INFORMATION REQUIRED TO SUPPORT ORGAN AND TISSUE DONATION**Section 6****Core information**

Blood samples will be obtained from the patient for testing, including pregnancy (for organ donors only, if applicable), tissue typing, HIV, Hepatitis, HTLV and Syphilis. These samples may be subsequently stored for future testing as necessary.

In order to ensure the safety and quality of transplantation, if an abnormality were found during the retrieval/ processing, tissue sample(s) will be taken for analysis and subsequently stored for potential further testing.

In the event of any screening results that may have implications for the family, relevant individuals may be contacted if their health could be affected.

For paediatric donation only:

Blood samples will be obtained from the patient and the patient's mother where the patient is under 18 months old and/or the patient has been breast fed in the last 12 months for testing, including tissue typing, HIV, Hepatitis, HTLV and Syphilis. These samples may be subsequently stored for future testing as necessary. In the event of any screening results that may have implications for the family, relevant individuals may be contacted if their health could be affected.

Organ donation:

Tissue samples for example, lymph node and spleen that have been obtained for screening will be subsequently biopsied, analysed and stored for future testing as necessary.

Blood vessels will be retrieved and stored to support organ transplant or other surgical procedures, if not used within 14 days will be disposed of in accordance with the hospital/tissue establishment policy.

Tissue donation:

The tissue donated (including hepatocytes and heart for valves) for transplantation will be stored for extended periods in tissue establishments whilst it is prepared for transplantation.

Surrounding tissue:

As part of the organ and/or tissue retrieval process surrounding tissue will be removed to support the safety and quality of transplantation. Only where necessary will this include part or whole organs.

The patient's medical records have/will be accessed by relevant healthcare professionals to obtain a past medical/behavioural history. This information may be passed on a need-to-know basis to other healthcare professionals in support of the donation and transplantation process. This information may also be retained by the Organ Donation Teams/Tissue Establishment.

The information collected from you on the consent form will be stored securely and only be used in support of the donation and transplantation process. For further information please see the privacy statement on NHSBT's website:
