

## NHS BLOOD AND TRANSPLANT PANCREAS ADVISORY GROUP

### CURRENT AND PROPOSED CLINICAL RESEARCH ITEMS

#### INTRODUCTION

- 1 This paper provides a brief summary of data applications for the standard pancreas transplant data set and applications approved by the Chair of PAG, since the last PAG meeting.

#### DATA APPLICATIONS

- 2 Details of the content of the standard pancreas transplantation data set are now available on the ODT website, together with an updated Data Access Policy - <https://www.odt.nhs.uk/statistics-and-reports/access-data/>.
- 3 **Table 1** gives details of the main applicant, study title and status of the data applications received. Studies receiving national data will now be listed on the ODT website, <https://www.odt.nhs.uk/statistics-and-reports/access-data/research-studies/> and details of publications will be added when known.

<b>Table 1</b> <b>Details of applications received</b>			
<b>Applicant</b>	<b>Centre</b>	<b>Study Title and brief aims</b>	<b>Status</b>
Agiris Asderakis	Cardiff	Characteristic of Pancreas Transplants that survive over 10 years	Standard data set provided
Jeevan Gopal	Manchester	Outcomes and utilisation of simultaneous pancreas kidney transplantation from older donors-The UK transplant registry analysis	Application being reviewed
