

NHS BLOOD AND TRANSPLANT

MULTI-VISCERAL AND COMPOSITE TISSUE ADVISORY GROUP

PERFORMANCE REPORT ON THE NATIONAL BOWEL ALLOCATION SCHEME: JULY 2022 – DECEMBER 2022

INTRODUCTION

- 1 The National Bowel Allocation Scheme (NBAS) was introduced in 2013 with the agreement that it would be monitored regularly and reviewed if there were signs of inappropriate or unfair offering. Full details of the scheme are available online here: <https://www.odt.nhs.uk/transplantation/tools-policies-and-guidance/policies-and-guidance/>
- 2 This is a brief report showing the recent performance of the NBAS, detailing patients active on the transplant list between 1 July 2022 and 31 December 2022, a comparison of 1 year post-registration outcomes over time, median time to transplant, and prolonged registrations.

DATA ANALYSIS

- 3 In the second half of 2022, there were a total of 36 patients on the active intestinal transplant list at any time, corresponding to 36 registrations; 27 were adult and 9 were paediatric. Details of these patients are shown in **Table 1 (removed as patient identifiable)**. Seventeen registrations had ended in a transplant by March 2023. Of the 16 patients who remained on the list at 10 March 2023, 10 are active on the list, 6 are blood group O, 4 have sensitisation points and 1 has in-hospital urgency points.
- 4 Since the NBAS was implemented, in the first two years compared with the two years prior, we observed a non-significant increase in the proportion of patients transplanted within 1 year of listing ($p=0.3$) and a decrease in the number of deaths (including removals due to deteriorating condition) within 1 year of listing (7 compared with 2) (**Figure 1**), for both adult and paediatric patients. However, in the most recent period, the number of deaths has increased (11 deaths on the list), but overall the proportion of deaths pre-NBAS compared to the whole period after is not significantly different ($p=0.1$). When looking at median waiting time for first registrations in the period, we have seen an initial reduction in waiting time for both liver requiring patients and non-liver requiring patients, but this has increased in the more recent period (**Table 2**). **Table 3** shows both adult and paediatric waiting times initially reduced following the introduction of the NBAS but have increased in the most recent period.
- 5 Prolonged intestinal registrations are defined as active registrations for an intestinal transplant for longer than six months. Prolonged suspensions are defined as suspensions for longer than three months. **Table 4** presents the number of prolonged registrations and suspensions as at 1 March 2023. Across centres, six patients have been active for more than six months (ranging from 0.6 years to 3.9 years) and four patients have been suspended for more than three months (ranging from 0.3 years to 1.6 years).

ACTION

- 6 This report is presented for members' information. Members are asked to review it and comment. Members are also reminded to notify NHSBT (via ODT Online) of any data amendments, e.g. deaths, removals.

Figure 1 Comparison of 1 year registration outcomes for elective intestinal transplant registrations before and after the NBAS was implemented

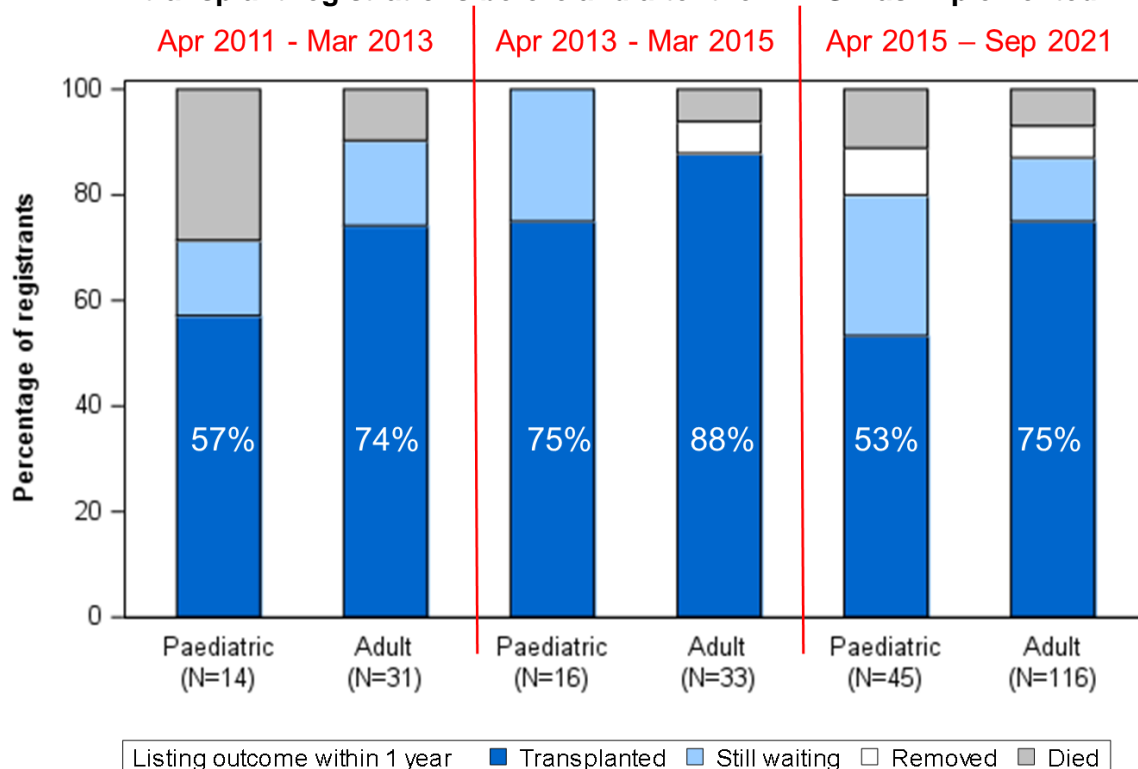

Table 2 Median waiting time to elective intestine transplant in the UK, for first registrations between 1 April 2011 – 30 September 2021, by era and registration type

Registration era	Registration type	Number of patients registered	Waiting time (days)	
			Median	95% Confidence interval
Apr 2011-Mar 2013	Liver required	21	272	105 – 439
	No liver required	22	154	18 – 290
	Total in era	43	168	84 – 252
Apr 2013-Mar 2015	Liver required	27	85	50 – 120
	No liver required	19	65	28 – 102
	Total in era	46	65	53 – 77
Apr 2015-Sep 2021	Liver required	79	190	148 – 232
	No liver required	75	91	60 – 122
	Total in era	154	119	66 – 172

Note: any periods of suspension from the list are included in the calculation of median waiting times

Registration era	Age group	Number of patients registered	Waiting time (days)	
			Median	95% Confidence interval
Apr 2011-Mar 2013	Paediatric	14	188	129 – 247
	Adult	29	66	0 – 133
	Total in era	43	168	84 – 252
Apr 2013-Mar 2015	Paediatric	15	179	50 – 308
	Adult	31	49	24 – 74
	Total in era	46	65	53 – 77
Apr 2015-Sep 2021	Paediatric	40	252	159 – 345
	Adult	114	100	75 – 125
	Total in era	154	119	66 – 172

Note: any periods of suspension from the list are included in the calculation of median waiting times

Listing status	Transplant centre	Number of patients	Number of years
Active	Birmingham	1	2.5
	Cambridge	3	3.9, 0.8, 0.6
	King's College	2	1.3, 0.6
Suspended	Cambridge	2	1.6, 0.3
	Oxford	2	1.0, 0.9
