

# Norfolk and Norwich University Hospitals NHS Foundation Trust

#### Taking Organ Transplantation to 2020

In 2020/21, from 29 consented donors the Trust facilitated 19 actual solid organ donors resulting in 49 patients receiving a life-saving or life-changing transplant. Data obtained from the UK Transplant Registry.

In addition to the 19 proceeding donors there were 10 consented donors that did not proceed.

#### Best quality of care in organ donation

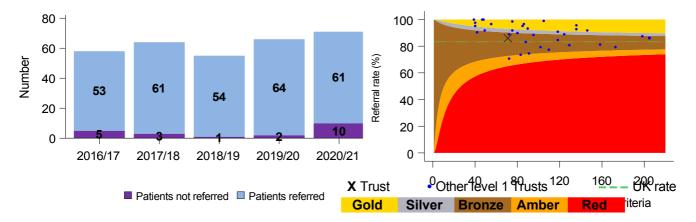

We acknowledge that the data presented in this section includes the period most significantly impacted by COVID-19 and appreciate that the COVID-19 pandemic affected Trusts/Boards differently across the UK.

# Referral of potential deceased organ donors

Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service

#### Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

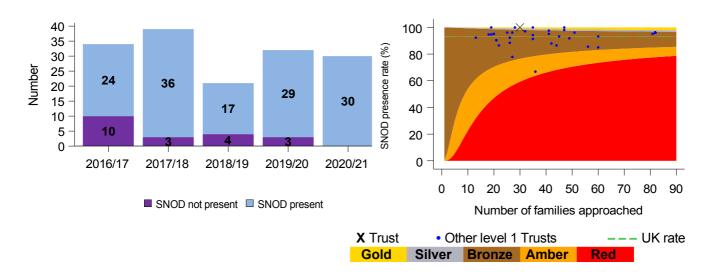

The Trust referred 61 potential organ donors during 2020/21. There were 10 occasions where potential organ donors were not referred.

# Presence of Specialist Nurse for Organ Donation

# Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families

## Aim: There should be no purple on the chart

Aim: The Trust (marked with a cross) should fall within Bronze, Silver, or Gold

A SNOD was present for 30 organ donation discussions with families during 2020/21. There were no occasions where a SNOD was not present.

## Why it matters

• If suitable patients are not referred, the patient's decision to be an organ donor is not honoured or the family does not get the chance to support organ donation.

- The consent rate in the UK is much higher when a SNOD is present.
- The number of patients receiving a life-saving or life-changing solid organ transplant in the UK is increasing but patients are still dying while waiting.

Regional donors, transplants, waiting list, and NHS Organ Donor Register (ODR) data									
	East Of England*	UK							
April 2020 - 31 March 2021 Deceased donors Transplants from deceased donors Deaths on the transplant list	110 333 27	1,180 2,943 497							
As at 31 March 2021 Active transplant list Number of NHS ODR opt-in registrations (% registered)**	236 2,548,771 (42%)	4,256 26,746,406 (41%)							
*Regions have been defined as per former Strategic Health Authoriti ** % registered based on population of 6.08 million, based on ONS									

# Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) at the Trust are shown below, including a UK comparison. Data obtained from the Potential Donor Audit (PDA).
