

## South West Organ Donation Services Team

### Taking Organ Transplantation to 2020

In 2020/21, from 122 consented donors the South West Organ Donation Services Team facilitated 101 actual solid organ donors resulting in 259 patients receiving a life-saving or life-changing transplant. Data obtained from the UK Transplant Registry.

In addition to the 101 proceeding donors there were 21 consented donors that did not proceed.

### Best quality of care in organ donation

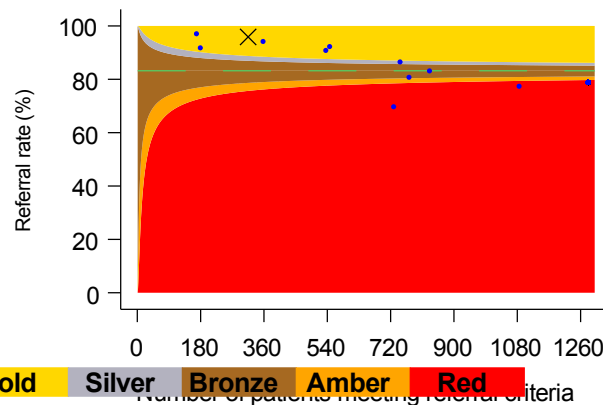

We acknowledge that the data presented in this section includes the period most significantly impacted by COVID-19 and appreciate that the COVID-19 pandemic affected Trusts/Boards differently across the UK.

#### Referral of potential deceased organ donors

**Goal: Every patient who meets the referral criteria should be identified and referred to NHS Blood and Transplant's Organ Donation Service**

**Aim: There should be no purple on the chart**

**Aim: The team (marked with a cross) should fall within Bronze, Silver, or Gold**

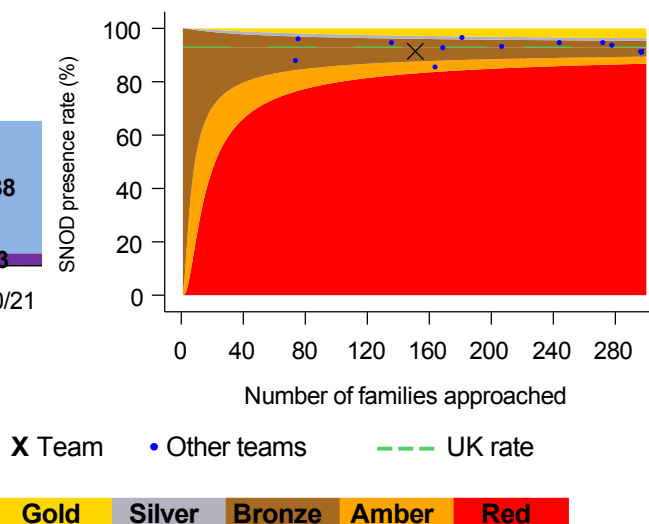

302 potential organ donors were referred to the team during 2020/21. There were 13 occasions where potential organ donors were not referred.

## Presence of Specialist Nurse for Organ Donation

**Goal: A Specialist Nurse for Organ Donation (SNOD) should be present during every organ donation discussion with families**

**Aim: There should be no purple on the chart**

**Aim: The team (marked with a cross) should fall within Bronze, Silver, or Gold**

A SNOD was present for 138 organ donation discussions with families during 2020/21. There were 13 occasions where a SNOD was not present.

## Further information

Further information on potential donors after brain death (DBD) and potential donors after circulatory death (DCD) within the region are shown below, including a UK comparison. Data obtained from the Potential Donor Audit (PDA).

<sup>1</sup> DBD - A patient with suspected neurological death  
DCD - A patient in whom imminent death is anticipated, ie a patient receiving assisted ventilation, a clinical decision to withdraw treatment has been made and death is anticipated within 4 hours

<sup>2</sup> DBD - Death confirmed by neurological tests and no absolute contraindications to solid organ donation  
DCD - Imminent death anticipated and treatment withdrawn with no absolute contraindications to solid organ donation

Note that a patient that meets both the referral criteria for DBD and DCD organ donation is featured in both the DBD and DCD data but will only be counted once in the deceased donors total
