

Blood Stocks Management Scheme HOSPITAL VANESA DATA ENTRY

September 2022 - August 2023

- Data Submission Analysis
- 12 Month Summary

Blood Stocks Management Scheme

Whilst BSMS data entry isn't mandated, it is considered good practice. Hospital data is valuable to the blood service and to hospital peers participating in the BSMS to enable good inventory management practices and help blood services maintain a consistent supply through using real hospital data.

This evaluation of hospital data entry is intended to encourage hospitals to review and improve their data entry.

What is 'complete VANESA data entry'?

- 100% RBC stock entry = ≥ 15 data entries/month**
PLT, FFP and Cryo Stock entry= Although submission of stock data for other components is valuable, there is currently no guidance in place for entry requirements.
- 100% RBC, PLT, FFP and Cryo wastage entry = ≥ 1 entry/month**

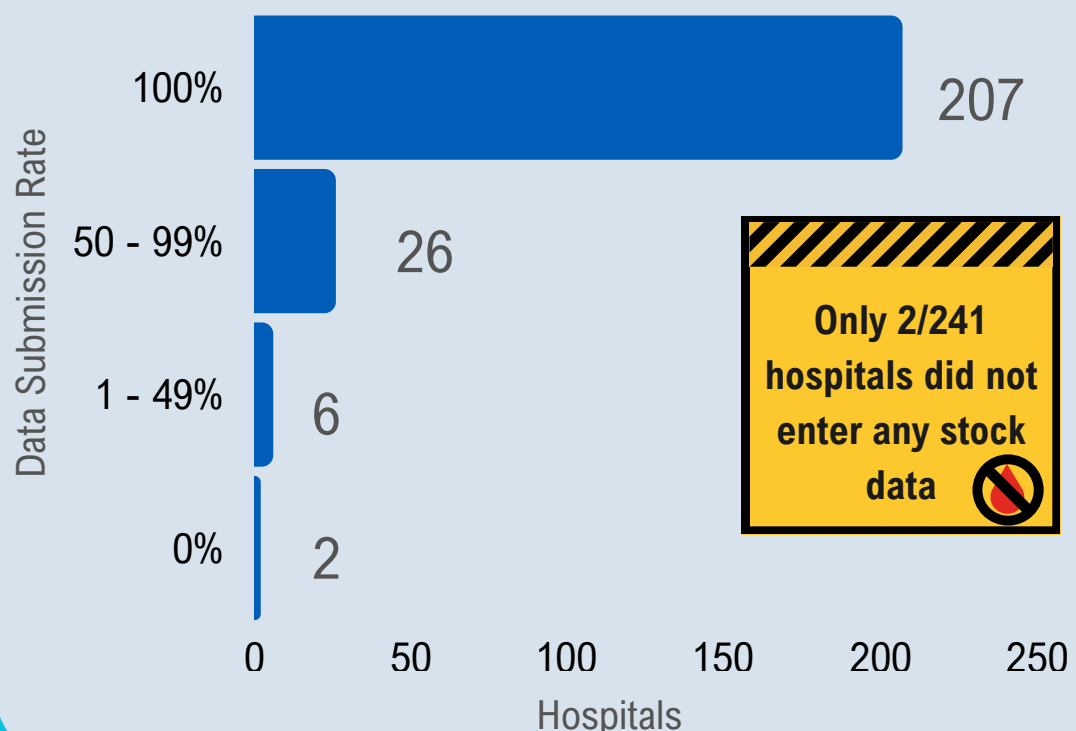

Complete Vanesa Data Entry Analysis

RBC STOCK ENTRY (≥ 15 data entries/month)

Complete RBC stock data

n = 241

365 Days of Stock Data

19 (8%)

hospitals entered data every day for 12 months!
