

IPEX Questions

Lot Number N083 3131	Expiry Date 2024.01.18
-----------------------------	------------------------

Patient X is a 81 year old female who has had a fall and has been taken to A&E with a hip injury and may require surgery the next day.

Patient Y is 68 year old female who has been admitted to hospital with chronic anaemia and is being treated for B-cell chronic lymphocytic leukemia using Cladribine.

Patient Z is a 58 year old male who is being treated with Rituximab for chronic rheumatoid arthritis and has been admitted to hospital with a laceration to his head.

Questions

1. Comment on the clinical significance of any antibodies found in samples X, Y and Z.
2. If required, what blood should be selected for these patients? Are there any special considerations?
