Patient Consent Scheme

Feedback for Cardiothoracic Advisory Group (August 2013)

Members will be aware that the NHSBT patient consent scheme for obtaining explicit consent for use of personal data for registration, organ allocation and transplant follow-up was rolled out to all Cardiac transplant centres on 1 October 2005.

Reports are sent to centres on a monthly basis and monitor consent for the period dated April 2008 – July 2013. Of the 2499 patients who were registered on the national list for a cardiac transplant, 99 have given consent for use of their personal data.

Further detail is provided in the table below.

| Centre | Total registrations | Consent forms outstanding | Percentage collected |
|----------------------------------|----------------------------|----------------------------------|-----------------------------|
| Newcastle Freeman | 652 | 0 | 100 |
| Papworth Hospital | 477 | 1 | 99 |
| Harefield Hospital | 503 | 1 | 99 |
| Manchester, Wythenshawe Hospital | 321 | 1 | 99 |
| Glasgow, Golden Jubilee | 81 | 0 | 100 |
| London, Great Ormond Street | 194 | 0 | 100 |
| Birmingham, Queen Elizabeth | 271 | 0 | 100 |
| TOTALS | 2499 | 4 | 98 |

I would like to take this opportunity to thank centres for their continuing support in ensuring the success of the Scheme in all Cardiac centres.

Alison Gane
