

NHS BLOOD AND TRANSPLANT

MULTI-VISCERAL AND COMPOSITE TISSUE ADVISORY GROUP

SUMMARY FROM STATISTICS AND CLINICAL RESEARCH

INTRODUCTION

- 1 This paper provides an update from Statistics and Clinical Research and summarises current and future work in the area of multi-visceral and composite tissue transplantation.

UPDATE FROM STATISTICS AND CLINICAL RESEARCH

- 2 New and updated reports, all Advisory Group papers and conference presentations continue to be posted on the OTDT Clinical Site www.odt.nhs.uk.
- 3 The 2022/23 Annual Report on Intestine Transplantation has been published on the organ-specific report page of the OTDT Clinical Site (<https://www.odt.nhs.uk/statistics-and-reports/organ-specific-reports/>), and circulated to intestinal transplant centres and commissioners. The report shows there were fewer patients on the active intestine transplant list at the end of 2022/23 compared to the end of the previous year. In 2022/23, 25 intestine transplants were performed, a slight decrease from a record high of 27 the previous year. Of these transplants, 21 were performed in adults and 4 in paediatrics.
- 4 Please note our current arrangements for staff responsibilities in support of organs and tissues.
