

## NHS BLOOD AND TRANSPLANT

### LIVER ADVISORY GROUP

#### OUTCOME OF APPEALS

##### INTRODUCTION

- 1 This report provides information on all patients referred to the National Appeals Panel over the 6-month period from 1 November 2015 to 30 April 2016. It includes the outcome of the appeal and the patient's status as at 1 May 2016, unless otherwise indicated.

##### OUTCOME

- 2 Between 1 November 2015 and 30 April 2016, there were nine patients referred to the National Appeals Panel. **Table 1** summarises these.
- 3 Three patients were from **King's College** and two were accepted for an elective and a super-urgent registration. The third appeal to electively register a patient was declined due to pre-emptive transplantation and possible unfavourable pathology. The super-urgent patient was transplanted, and then went on to be re-listed and then removed due to deteriorating condition. They died just over a month after initial registration. The elective patient remains active.
- 4 Two patients were referred from **Newcastle** and both were accepted for elective liver transplant registration. One patient was transplanted and follow up information is not yet due. The other patient is currently active.
- 5 Two patients were referred from **The Royal Free** and accepted for elective and super-urgent liver transplant registration. The super-urgent patient has been transplanted and follow up information is not yet due. The elective patient is currently active.
- 6 One patient was referred from **Edinburgh** and accepted for super-urgent liver transplant registration. They were removed within a week due to improved condition.
- 7 One patient was referred from **Leeds** and accepted for elective liver transplant registration. They have not yet been registered.
