

**NHS BLOOD AND TRANSPLANT**  
**ORGAN DONATION AND TRANSPLANTATION DIRECTORATE**  
**LIVER ADVISORY GROUP**  
**ACTIVITY, UTILISATION AND OUTCOMES SCORE CARD**

A proposal to introduce a centre-specific *activity, utilisation and outcomes score card* was presented at the meeting of the Liver Advisory Group (LAG) in November 2013 (LAG(13)52). The score card attempts to capture the key metrics of transplant activity with respect to overall patterns and variance between centres on a single visualisation. It will be updated on a quarterly basis.

The metrics approved by the LAG are:

1. Overall transplant activity
2. Transplant activity normalised to waiting list size
3. Waiting-times to transplantation, by blood group
4. Waiting-list mortality
5. First-offer utilisation rates
6. Index of aggressiveness of organ utilisation (AJT 2013; 13:936-42)
7. 30-day post-transplant survival
8. Retransplantation rates

A suggested format is included on the next page (to follow) for discussion. If LAG agrees with this format, this initiative can be introduced by the Statistics and Clinical Studies team.
