ORGAN DONATION AND TRANSPLANTATION
PATIENT CONSENT SCHEME**

Feedback for Liver Advisory Group

Members will be aware that NHSBT patient consent scheme for obtaining explicit consent for use of personal data for registration, organ allocation and transplant follow-up has been in place since October 2005.

Reports are sent to Units on a monthly basis to all Units with outstanding consent for the period dated April 2008 – September 2013. Of the 5202 patients who were registered on the national list for a liver transplant, 99% have given consent for use of their personal data.

Further detail is provided in the table below.
