

NHS BLOOD AND TRANSPLANT
BOWEL ADVISORY GROUP
PATIENT CONSENT SCHEME AUDIT

INTRODUCTION

- 1 Members will be aware that the NHS Blood and Transplant (NHSBT) Patient Consent Scheme for obtaining explicit consent for use of personal data for purposes of registration, organ allocation and transplant follow-up has been in place since October 2005. Each month, transplant centres with outstanding consent are issued a report to help identify those patients where consent should be obtained.

IFALD PATIENT CONSENT RATES

- 2 Of the 155 patients across the United Kingdom that have been listed for an intestinal transplant, at some point in time since April 2008, 100% have their level of consent for the use of their personnel data recorded on the UK Transplant Registry. The patient consent rates achieved by each centre are summarised in **Appendix I**.
- 3 NHSBT remains grateful for the efforts made by centres to ensure the continued success of this statutory scheme.

ACTION

- 4 All centres have consent rates of 100% so no specific action is required. ODT Information Services remain committed to supporting centres with these returns and should you require further assistance, please do not hesitate to contact odtdatasupportteam@nhsbt.nhs.uk. Centres are requested to ensure a robust process is in place to make certain that consent is obtained in every case prior to patient listing.
