Proposal from NHSBT:

As our co-operation will initially involve intestine only grafts, I have tried to include fairly broad inclusion criteria at this stage, and have included BMI as an additional factor if this data is being collected. If we find there are too many offers and little uptake of these offers we could work towards making the criteria a bit more restrictive.

Proposed Donor profile: Intestinal transplant alone (jejunum/ileum +/- colon)

Min age	6 months
Max age	60 years
Min Weight	none
Max weight	90 kg
BMI	< 30
Special requests	Sometimes the graft would need inclusion of the colon
