

Blood and Transplant

The Update for April 2024

RCI reports will be available from Sp-ICE only, from 1 April 2025

Hard copy reports will no longer be posted

This means hospitals will receive results faster as well as being environmentally friendly. We'll be giving you more information in further updates.

Wisdom Musabaike - Assistant Director, Red Cell Immunohaematology

Do you use your personal email address for OBOS?

Please check and change to your work email to keep your account active

We do not endorse using your personal email addresses for your user account because it is a security risk.

If your personal email address is registered in your account your OBOS administrator will be informed and we ask that you change it by the end of May.

Accounts with personal email addresses will be deactivated on 30 May.

Cheryl Kempton - Regional Customer Service Manager, Hospital Customer Service Team

HOT resources to support the TACO National Patient Safety Slert issued by MHRA on 4 April 2024

In response to the alert which addresses the rising deaths from TACO, we have produced a FAQ, a gap analysis tool and leaflet to support implementation.

[Read the alert on gov.uk](#), also available on the [Central Alert System \(CAS\) FAQ, gap analysis tool on the TACO cumulative data webpage](#)

[Leaflet \(PDF 229KB\)](#)

Caryn Hughes - SHOT Operations Manager

New Transfusion Training Hub now available on the NBTC website

Developed by the Transfusion 2024 team, the hub provides links to resources, supporting education and training for healthcare professionals working within blood transfusion and others who want to develop their transfusion knowledge.
