## Section 2. Principal Risk Detail

This section of the report provides detail of the principal risks and the contributory risks influencing the score. The section provides detail against the following areas:

**Principal Risk Detail** Risks that could significantly affect the achievement or performance of NHSBT's priorities / strategic obligations.

**Contributory risks** Dynamic risk level consisting of current directorate level risks which are influencing the status of the principal risk areas

**Detail of risks recorded within the Risk Limit** Provides detail of risks recorded at the Risk Limit

### Risk Appetite Detail

Appetite Level	Appetite Range				
	Low Risk (considered low risk and managed as such)	Optimal	Tolerance Zone (A level of risk which NHSBT is willing to operate)	Judgement Zone (level of risk which requires management oversight and direction)	Risk Limit (Risk level which cannot be accepted or tolerated)
Minimal	1 to 3	4	5 to 8	9 to 12	15 to 25
Cautious	1 to 6	8	9 to 10	12 to 15	16 to 25

Managed By	Clinical Risk Manager	Responsible Executive	Chief Nursing Officer	Oversight Committee	Clinical Governance Committee	Date Assessed	18-Mar-2024	

<b>Responsible Manager Summary</b>	Progress in management of risk 1 was presented to Clinical Governance Committee on 8th March 2024. The principal risk remains in the judgement zone (score of 12) driven by contributing risk CS-02 "There is a risk of incorrect clinical decision making, due to poor accessibility and integrity of digital patient records, resulting in patient harm." This risk materialised in Oct 2023 as a serious incident and there have been additional near misses linked to the risk. These incidents revealed previously unidentified gaps in the risk control. Corrective action for the serious incident is underway to improve the process of transferring clinical advice into the LIMS. However, mitigation for the risk of incorrect decision making in medical authorisation of non-standard components, due to lack of digitised patient records in Hospital Services, has not yet been identified.

E&F-016	Southampton Unsupported Potential Roof Collapse	07-Dec-2023	5	4	20	05-Mar-2024	

<b>Risk Description</b>	There is a risk of injury and possible loss of lives to staff and personnel caused by accessing areas of the Southampton Centre with RAAC issues, without roof propping (VAT room 3, corridors, former donor suite, and former hospital services department), resulting in serious injuries, death, sanctions and penalties from regulation and damage to NHSBT reputation,
-------------------------	---

Management	Mitigating Control	Effectiveness	Gap In Control
	1. Propped roofs to manage weak roof and enable possible access to complete regulatory mandated responsibilities like fire alarm testing, isolation of water and electrical services where possible, etc. 2. Use of PPE by staff at the moment for possible access where required. 3. Permit to work must be completed to access these areas. 4. The business must re-provision or relocate essential services to available location or spaces e.g. relocation to the garage area; portakabins or containers could be used in this area.	 Partially effective	1. Close the areas of the building affected by the RAAC risks. 2. The business will need to make a critical decision on whether to replace the roof, relocate the entire centre, and move all products and services out.

Assurance	Source of Assurance	Effectiveness	Gaps in Assurance
	1. PPEs are available. Already procured. And being used by staff exposed to the risk e.g. clinical staff	 Moderate	1. Closure of the building then full restoration of the centre after comprehensive repairs.

## 2.6. Principal Risk - P-06. Clinical Outcome of Patients

### Principal Risk Detail

Risk Description				Risk Score (Residual)	Current Appetite Status	No. of Child Risks at Risk Limit	Trend	
There is a risk that NHSBT fails to deliver continuous improvements to its service provision, caused by a lack of comprehensive information about the clinical outcomes of patients we treat, or who receive our products, resulting in a failure to achieve our strategic ambition of reducing health inequalities and providing every patient with the treatment or donation they need.				12	Tolerable risk position (12 to 15)	0

Managed By	Clinical Risk Manager	Responsible Executive	Chief Nursing Officer	Oversight Committee	Clinical Governance Committee	Date Assessed	18-Mar-2024	

<b>Responsible Manager Summary</b>	Principal risk 6 was the subject of a risk workshop attended by Chief Nursing Officer and Chief Medical Officer on 18th March 2024. The workshop was convened because it has proved difficult to identify the contributing risks and mitigations to the risk as currently articulated. Following discussion at the workshop, it was agreed that lack of patient outcomes is a risk contributing to patient safety (i.e. principal risk 1). Also that health inequality and interoperability of our systems with outside data sources are additional contributory risks to principal risk 1, which are being addressed by NHSBT strategy and business planning. A briefing paper will be circulated to governing committees, proposing removal of principal risk 6 and broadening of principal risk 1 to include patient outcome, health inequality and interoperability.

## 2.9. Principal Risk - P-09. Regulatory Compliance (Primary Regulators)

### Principal Risk Detail

Risk Description				Risk Score (Residual)	Current Appetite Status	No. of Child Risks at Risk Limit	Trend
<p>There is a risk that NHSBT will become non-compliant with current or emerging regulations which could result in NHSBT being subject to significant regulatory action and/or licences being revoked. This would impact on the ability of NHSBT to provide critical services and products and/or have a serious impact on patient safety. It also has the potential to significantly, and detrimentally, affect the reputation of the organisation. <b>Responsible Manager Summary</b>	Principal Risk 09 continues to be reviewed at the monthly Quality SMT, and at a monthly strategic risk review meeting with the risk owner (Director of Quality). An emerging risk relating to the use of e-signatures in the organisation is currently being articulated, and will be reviewed at Quality SMT in March 2024, and is likely to be a contributory risk for Principal Risk 09.
