

Helping to solve complex pre-transfusion problems

Soluble recombinant proteins

For research use only

KNIR (Knops inhibition reagent)

For inhibition of CR1-related antibodies

srCD38

For inhibition of anti-CD38 therapeutic antibodies

ADVANTAGES:

- Simple pre-testing treatment procedure
- Specific inhibition of anti-CD38, or anti-CR1 related antibodies
- No interference in other allo-antibody investigations
- Long expiry due to storage below -20°C
- Individual test vials ensuring minimal wastage

New customer offer

KNIR - **£35 /vial**

srCD38 - **£100 /vial**

Offer ends 31/12/2024
