CLINICAL LEADS UTILISATION CLU SCHEME

The CLU scheme began in November 2020 and has continued to evolve

Aims

- Identify local and national barriers to optimal organ utilisation
- Improve collaboration within and across transplant units
- Deliver organ utilisation improvement strategies at a local unit level

CLU Posts Filled

5 ORGAN LEAD CLU

Aaron Ranasinghe, B'ham

Vicki Gerovasili, Harefield

Anya Adair, Edinburgh

David van Dellen, Manchester

Nick Inston, Birmingham

Present and future of the CLU scheme

Independent report

Honouring the gift of donation: utilising organs for transplant - summary report of the Organ Utilisation Group

Published 21 February 2023

Recommendation 3

Standardised patient pathways must be developed and made available for each organ type, with well-defined timescales for each stage of the pathway. Data available for each stage of the pathway informs monitoring against best practice. Clinical Leads for Utilisation support the review of the data to identify and drive local improvement initiatives.

Every unit must have a Clinical Lead for Utilisation who is responsible for data oversight and monitoring within their unit, and works with clinical and management colleagues to deliver improvements.

Organ Utilisation Development Team

Supporting colleagues and working together to make the best use of every precious organ offered

OrganUtilisationDevelopmentTeam@nhsbt.nhs.uk

Our Vision

Supporting colleagues to make the best use of every precious organ offered, to achieve maximum positive impact on patients.

Our Mission

We work together to increase the number of people positively impacted by increased organ utilisation, through the dissemination of data and information, and the sharing of knowledge and expertise across our clinical community.

Organ Utilisation Development Team

- *Chris Callaghan, AMD for Organ Utilisation*
- *Diana Garcia Saez, Clinical Lead Cardiothoracic Organ Utilisation*
- *Liz Armstrong, Head of Transplant Development*
- *Carrie Scuffell, Transplant Development Nurse*
- *Laura Barton, OTDT Programme Manager*
- *Sam Tomkings, Medical Director & Group Support Team*

UPDATE Organ Utilisation in 2024

- Ongoing Offer Review Schemes led by Organ Lead CLU
- Recipient Coordinator Organ Utilisation Spotlight session –May 2024
- CLU SURVEY July 2024 Excellent response rate of 88.7%
- NHSBT Annual Organ Utilisation Report – NOUC 2024 by Jenny Mehew
- Framework for offer decline meetings –Anya Adair, Rodrigo Figueiredo and Vicky Gerovasili

Organ Utilisation Development Team

The Organ Utilisation Development Team (OUDT) aim to increase overall organ utilisation from deceased donors across the UK.

The team work with colleagues nationally, overseeing projects related to the utilisation of heart, lung, kidney, liver and pancreas organs for transplantation. OUDT areas of focus include data, Leadership & Engagement, and education and culture.
