

Femoral Head Freeze Dried Washed Irradiated Whole Bone - Product code T0005

Product description

A whole femoral head from a deceased donor. Processed in cleanrooms to remove soft tissue, cut to uniform size and washed to remove blood and marrow. Freeze dried and irradiated in the final pack. Supplied as individual units weighing at least 40g.

Clinical applications

For use in orthopaedic surgery, primarily hip and knee revision.

Processing

This product is collected aseptically by highly trained Tissue Services staff stored below -40°C at the tissue bank until donor release. It is processed in pharmaceutical grade cleanrooms to remove soft tissue marrow and red cells leaving a cleaned cancellous bone graft with cortical shell. Dried to allow storage at ambient temperature and irradiated to a minimum of 25 kGy.

Delivery

This product is stored in two heatsealed plastic bags within a flat-pack outer bag. Delivery is via recorded next day delivery Postal Service in

Benefits/advantages

- Supplied by Tissue Services, a specialist function of NHS Blood and Transplant (NHSBT) undertaking all aspects of tissue donor evaluation, medical screening, consent, testing, storage, cleanroom processing, quality assurance and supply.
- Uniform product with minimal variation.
- Flat packed taking less storage space.
- Irradiated in the final pack for added safety.
- Non cellular therefore does not require a user storage license.
- Can be stored at ambient temperature.

a padded envelope all included in the product price. More urgent delivery e.g. same day or by a specified time can be arranged at additional cost.

Storage requirements

This product must be stored away from direct sunlight. It does not require specific storage temperatures so can be kept at ambient temperature.

Regulatory requirements

This product is cell depleted therefore does not require a storage licence. Some stages of the quality system defined by law (EU Tissue and Cells Directive) relating to storage, tracking and adverse event or reaction reporting can only be managed by the hospital. Because of this a signed current service level agreement defining responsibilities must be in place prior to the supply of tissue. Tissue Services will send this agreement directly to the hospital, usually via the CEO for signature. Details can be supplied on request.
