

I'm
blood
type

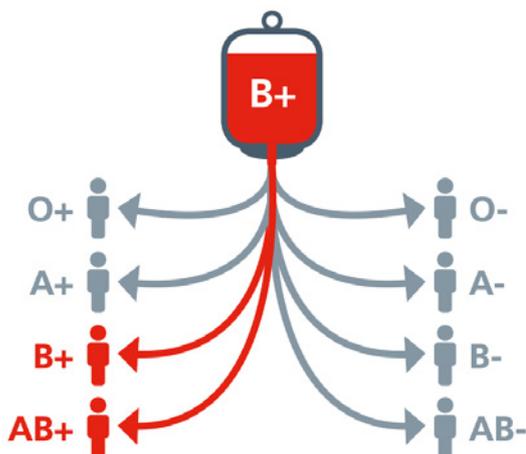

Your blood type is likely to be B positive

Only about 8% of people have B positive blood.

In total, only 10% of people belong to blood group B, making it one of the least common blood groups.

You're somebody's type

Your B positive red blood cells can be used to treat patients with blood types B positive and AB positive.

(You can receive transfusions from B positive, B negative, O positive or O negative donors.)
